A Theory of Indexical Shift Amy Rose Deal, 2020 The phenomenon of indexical shift—whereby indexicals embedded in speech or attitude reports draw their meaning from an attitude event rather than the utterance context—has been reported in languages spanning five continents and at least ten language families. In this book, Amy Rose Deal offers a comprehensive overview of the semantics and syntax of indexical shift and develops a constrained typology of the phenomenon across languages—a picture of variation that is both rich enough to capture the known facts and restrictive enough to make predictions about currently unknown data points. Deal draws on studies of indexical shift in a broad range of languages, focusing especially on Nez Perce, Zazaki, Korean, and Uyghur.--

Paradigm Shift in International Economic Law Rule-Making Julien Chaisse, Henry Gao, Chang-fa Lo, 2017-11-13 The TPP was negotiated among 12 economically diverse countries, including some most highly developed and rich countries (i.e., the United States, Japan, Australia, Canada, New Zealand, and Singapore), some newly industrialized countries (i.e., Mexico and Malaysia), and some less-developed countries (i.e., Peru, Chile, and Vietnam). A new paradigm created in this context is that countries with vastly different economic developments can actually agree on a set of very high standards to regulate their economic activities, to liberalize their trade, and to protect intellectual property and foreign investment. The contents of the TPP also reflect its status of being a “new paradigm” as the “21st-Century Trade Agreement” and being a pioneer in rule making in many key regulatory areas. These include not only the improved and enhanced rules on traditional issues already covered by the WTO, such as goods, services, and IP rights, but also the carefully designed rules in areas that have never been addressed in the WTO or comprehensively covered in other FTAs, such as state-owned enterprises, electronic commerce, and labor and environmental issues. Although the United States has withdrawn from the TPP, the remaining countries are still putting efforts into establishing a TPP without the United States or a TPP with China. Economically speaking, the current 11 parties account for about 20 % of the global economy. If such agreement is put into force, there will be significant implications for the region, for the multilateral system, and even for other FTAs. The book addresses the potential of the TPP to change the ways trade and investments are conducted and argues for its potential to be the start of an international trade/economic law revolution. The book elaborates the relationship between the TPP and other existing trade agreements such as the WTO and other FTAs and explains how the TPP is to deal with traditional and new issues. Taken together, the authors argue that the implications of the TPP go beyond its current membership. It is hoped that the book will make an important contribution to the field of international economic law.

Faith Shift Kathy Escobar, 2014-10-21 Hope for spiritual refugees, church burnouts, and freedom seekers. After years of participating in a comfortable faith tradition, many find themselves in a spiritual wilderness, feeling disillusioned with church, longing for more freedom and less religion in their lives. If that describes you, you're in good company. Countless men and women are in the middle of a shifting faith—and aren't sure where to turn. But losing beliefs doesn't mean you have to lose your faith. Pastor, friend, and spiritual director Kathy Escobar has journeyed with many who have experienced significant shifts in the faith they once considered unchangeable. Through their stories and her own, Kathy has discovered that growth and change are natural parts of life in our relationship with God. Filled with honest stories and practical insights, Faith Shift gives language to what many experience as their faith evolves. With an inviting blend of vulnerability and hope, it addresses the losses that come with spiritual shifts and offers tangible practices for rebuilding a free and authentic faith after it unravels. Includes personal reflection and group discussion questions at the end of each chapter.

SignGram Blueprint Josep Quer, Carlo Cecchetto, Caterina Donati, Carlo Geraci, Meltem Kelepir, Roland Pfau, Markus Steinbach, 2017-11-20 We gratefully acknowledge the financial support of COST (European Cooperation in Science and

Technology)), funded by the Horizon 2020 Framework Programme of the European Union. Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability, and it appears scattered in scientific publications where the description is often intertwined with the analysis. In general, comprehensive grammars are a rarity. The SignGram Blueprint is an innovative tool for the grammar writer: a full-fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way, and with the highest scientific standards. The work builds on the existing knowledge in Descriptive Linguistics, but also on the insights from Theoretical Linguistics. It consists of two main parts running in parallel: the Checklist with all the grammatical features and phenomena the grammar writer can address, and the accompanying Manual with the relevant background information (definitions, methodological caveats, representative examples, tests, pointers to elicitation materials and bibliographical references). The areas covered are Phonology, Morphology, Lexicon, Syntax and Meaning. The Manual is endowed with hyperlinks that connect information across the work and with a pop-up glossary. The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity.

Social and Family Issues in Shift Work and Non Standard Working Hours Irena Iskra-Golec,Janet Barnes-Farrell,Philip Bohle,2016-07-13 This book explores the effects of shift work and non standard working hours on family and social life. It features analysis and case studies from an international body of researchers from Europe, the Americas and Australia. It includes contributions from Germany, the United States, the Netherlands, Croatia, Italy, Poland, Australia, and Brazil, that fully examine this increasingly prevalent, and global, issue. The book starts by introducing the problems of work-family linkages, shift work and non-standard work hours. Next, it details the consequences of specific features of shift schedules, such as decreased opportunities for social participation, family problems and negative effects on partners and children as well as the impact of working time arrangements on work-family conflict over time. The book then looks at the consequences of shift work and non-standard work hours on family members and the workers themselves, including the sleep and daytime functioning of adolescent family members and the ways that non-standard work schedules intersect with the particular challenges and stresses of family responsibilities and strategies that workers use to manage these challenges in sectors where non-standard schedules are the norm. Last, the book considers the role of individual differences in understanding problems of work-family relationships, including a consideration of safety and health at work from the perspective of gender and an examination of the moderating role of chronotype and circadian type characteristics on work-family conflict and work-family facilitation among male shift workers.
