Retail Recovery Mark Pilkington, 2021-08-19 Shortlisted for the Business Book Awards 2022 The world's retail sector has been devastated in recent years by two unstoppable forces: internet shopping and the Covid-19 lockdown. The result: huge numbers of prestigious brands have gone under, or are now a shadow of their former selves, and large parts of the world economy have fallen into a recession, with reduced employment and incomes across large parts of society. High streets and shopping malls lie half-empty, causing a vacuum at the heart of our communities and societies, and many discretionary products have simply become too expensive for people to buy on a regular basis. There is now an urgent need to regenerate our local shopping areas, so how can retailers and brands respond to this crisis? Fortunately, new shoots of recovery are emerging from the wreckage of the old order – new brands, new ways of providing value, and new and innovative methods of creating interest to draw in consumers, all of which have the potential to kick-start the retail economy. Retail Recovery offers a comprehensive analysis of these new forces that are changing the way in which we browse for and buy products, and how we experience and engage with the brands themselves. It includes in-depth interviews with some of the most innovative players in the UK, Europe and North America, in the hope of drawing out key learning points for the rest of the industry. It also provides essential guidelines for governments, as they strive to rebuild and reinforce the retail spaces within our communities, allowing them to create a more effective economic lifeline for retailers, shoppers, retail workers, manufacturers and distributors.

Electronic Commerce 2018 Efraim Turban,Jon Outland,David King,Jae Kyu Lee,Ting-Peng Liang,Deborrah C. Turban,2017-10-12 This new Edition of Electronic Commerce is a complete update of the leading graduate level/advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook , LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries (e.g., the shared economy models of Uber and Airbnb). The 2018 (9th) edition, brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

Productivity In Singapore's Retail And Food Services Sectors: Contemporary Issues Toh Mun Heng,Thangavelu Shandre M,2016-11-25 The Retail and Food Services sectors play an important role in Singapore. They add to the vibrancy of the economy and contribute to the social well-being of Singaporeans. At the same time, they are often highlighted and scrutinised for their low productivity performance and high reliance on manpower. There is to date a lack of local literature that addresses the issues faced by the two sectors at the enterprise and worker levels. This timely book includes major topics in services productivity in the Singapore context, with emphasis on Retail and Food Services. Topics covered include the key productivity levers of the services sectors: holistic productivity measurement framework, effective entrepreneurship, manpower management, promotion by social media, marketing, costing process and accounting sophistication. These areas are explored through literature reviews and in-depth interviews with companies and consumers. The chapters also include recommendations for policy makers and industry stakeholders. Written in a simple and accessible manner, this book will serve as an insightful guide to researchers, policy-makers, industry practitioners and enterprises and those who are keen to learn from the Singapore experience.
