Trapshooting Is a Game of Opposites Dick Bennett,1996-01-01

*Modern Shotgunning* Dave Henderson,2017-07-18 Every year millions of sportsmen and women take to America's fields and forests equipped with some type of shotgun. Millions of others participate annually in shotgun sports such as skeet, trap and sporting clays. In *Modern Shotgunning*, Dave Henderson gives readers a nuts-and-bolts look at modern shotguns. He explains chokes, stocks, barrels, and optics, as well as cleaning and safety practices. He also discusses how to choose the appropriate shotgun, shotgun games, gun fit, hand loading, and building your own specialty guns. Henderson doesn't write above his readers either, offering plainly written advice based on years of experience in the field and at the range. He writes without boast that in a year he probably shoots more rounds than do most hunters in a lifetime. Neither is Henderson leaning toward the heavy-wallet crowd, for he knows the average hunter may not care for or cannot afford two-thousand-dollar shotguns, souped-up slug guns or optics. He offers tips for the budget-conscious, such as creating a cleaning rod from a soft pine dowel with a bicycle handlebar grip on one end and using Bounty paper towels rolled to bore diameter as a cleaning patch. *Modern Shotgunning* is ideal for beginners but not to be overlooked by veterans.

Orvis Guide to Gunfitting Tom Deck,2006-10-01 The Orvis Guide to Gunfitting is required reading for anyone who enjoys shotgun sports. This easy-to-follow manual explains the nuances of gunfit clearly through analysis of technique and can greatly improve a shooter's ability and effectiveness in the field by teaching the Orvis Method of creating a smooth, accurate shooting style. The reader will learn how to match his or her shot gun to correct body movement and discover why gunfit and proper training are inseparable. Shotgun shooters can develop numerous bad habits, due to poor form or a mismatched gun, while shooters new to the sport who have little experience with shotguns - or a lot of experience with rifles - often find that mounting and swinging a shotgun defy the instinct to aim and shoot. Author Tom Deck, who has diagnosed the problems of many students in his Orvis Shooting Schools, understands these issues. With this book he seeks to break down problems and build a new shotgun shooter from the ground up from proper foot placement to the way a shooter sees and comprehends a clay target or bird. Great shooters aren't born - they're made, by capitalizing on natural talents and a willingness to learn, and that's where the Orvis Method comes in. Just relax, and always keep the shotgun moving.

*Shooting Sports for Women* Laurie Morrow,Steve Smith,1996 Provides information about hunting, shooting techniques, buying a gun, gun safety, what to wear on the field, basic ballistics, and a history of women and guns

Skill Sets - Practicing for Sporting Clays Chris Parsons,2020-06-16 Master Class! Congratulations. After much work and a lot of winning in the lower classes of the NSCA competition world, you finally won the last punch you needed to move to Master Class! A great feeling and a great accomplishment! You always knew you were this good! The next sporting clays competition arrives, and you register as MASTER! A proud moment! You go out to the competition course and shoot your game. You have a solid day and put up a solid score, not your best performance but a good score. You wait around after the competition for the final results to be posted. The scores come out and you begin looking for your name at the top of Master Class, because hey, that is where your name has been for months! The top of the class! You look at the top of Master Class and don't see your name. You tell yourself, "That's Ok. Can't expect to win the first time in Master Class." You begin scrolling down the list of names in Master Class expecting to see your name at any moment. You keep scrolling. A quarter of the way down now, and your name still hasn't shown up. You keep scrolling. Halfway down now and geez, there are a lot of names here. You keep scrolling. Getting close to the bottom now. You keep scrolling and there you are, about three quarters of the way down. You finish about fifty out of sixty-five. You are shocked. This can't be right. You check your score. Yes, that is the correct score and then, you start scanning the scores above you. You sigh in disappointment. Six competitions later, your scores bottom out. You are nearly last in Master Class. It was only a few competitions ago that you were good and winning your class. The sport was fun! Now in Master Class, you can't even finish in the top half of the class. You get frustrated. You begin thinking about quitting the sport. You are lost at what to do. So many new Master Class competitors have found themselves in this very scenario. You just made Master Class and want so much to continue winning like you did in the lower classes, but Master Class is different than the other classes. The Professionals who compete for the National Championship every year are in Master Class. The Regional and State "Big Fish" who compete and win the Regional and State Championships every year are in Master Class. The former "Big Fish" who used to win all the time are in Master Class. All of these competitors have competed for over a decade. You realize if you are going to compete and win in Master Class, you need to get better. You realize you need to expand your game and improve your skills. You need a skill set. This book is written to help you create a skill set that will make you competitive in Master Class and the lower classes as well. The material in *Skill Sets: Practicing for Sporting Clays* will discuss the three major skill sets you need to compete and win in sporting clays. It will discuss the technical game, the mental game and the most important and least discussed skill set...execution. I have been competing in sporting clays over fifteen years and have experienced the highs and lows in the sport. The highs include a couple tours on the PSCA circuit, multiple State Championships, a 100 straight in competition and an All American Team to my credits. I have seen the lows as well finishing third from the bottom of Master Class. I have made many mistakes on my climb up the sporting clays mountain. I address many of my mistakes in this book to help you avoid them. This book was written from my vast experience to help you build a skill set to improve your game. Then once you have created this skill set, the book discusses how to practice these skill sets and make it better. Because once you have a skill set, you have to learn how to apply it. If you take the three fundamental skill sets in this book and apply it to your game, you will see your scores improve and the fun return to the sport you love and have worked so hard to master.

Gunfitting Don Currie,2021-12-01 Expert shooting coach, teacher, and competitor Don Currie delivers a solid book on gunfitting based on a lifetime of experience gained from working with Orvis and Purdey. Don knows that shooting with a properly fitted shotgun is critical to a shooter's success, and he delivers on the art and

science of fitting proper shotguns. The science requires the gunfitter to understand the structure of the shooter's body and what stock specifications are needed to accommodate the shooter's physique. To master the art of the process, the fitter must understand how shooters shoot and how the eye and brain see and read the target. The fitter must critically evaluate the shooter's stance, mount, and level of experience along with taking into consideration the shooter's discipline and style and how the shooter will develop and evolve.
