Open TV Aymar Jean Christian, 2018-01-09 How the internet transformed television Before HBO's hit show *Insecure*, Issa Rae's comedy about being a nerdy black woman debuted as a YouTube web series *The Misadventures of Awkward Black Girl*, her response to the absence of diverse black characters on the small screen. *Broad City*, a feminist sitcom now on Comedy Central, originated as a web series on YouTube, developed directly out of funny women Ilana Glazer and Abbi Jacobson's real-life friendship. These unconventional stories took advantage of the freedom afforded outside the traditional television system: online. Open TV shows how we have left "the network era" far behind and entered the networked era, with the web opening up new possibilities for independent producers, entrepreneurs, and media audiences. Based on interviews with writers, producers, show-runners, and network executives, visits to festivals and award shows, and the experience of producing his own series, Aymar Jean Christian argues that the web brought innovation to television by opening up series development to new producers, fans, and sponsors that had previously been excluded. Online access to distribution provides creative freedom for indie producers, allows for more diverse storytelling from marginalized communities, and introduces new ways of releasing and awarding shows. Open TV is essential reading for anyone interested in the changing environment of television and how the internet can inspire alternatives to what's on TV tonight.

Soon, venturing beyond the convenience of viewer choice and control, Internet TV will enable and encourage new types of entertainment, education, and games that take advantage of the Internet's interactive capabilities. We Now Disrupt This Broadcast Amanda D. Lotz,2018-04-06 The collision of new technologies, changing business strategies, and innovative storytelling that produced a new golden age of TV. Cable television channels were once the backwater of American television, programming recent and not-so-recent movies and reruns of network shows. Then came *La Femme Nikita*, *OZ*, *The Sopranos*, *Mad Men*, *Game of Thrones*, and *The Walking Dead*. And then, just as “prestige cable” became a category, came *House of Cards* and Netflix, Hulu, Amazon Video, and other Internet distributors of television content. What happened? In *We Now Disrupt This Broadcast*, Amanda Lotz chronicles the collision of new technologies, changing business strategies, and innovative storytelling that produced an era termed “peak TV.” Lotz explains that changes in the business of television expanded the creative possibilities of television. She describes the costly infrastructure rebuilding undertaken by cable service providers in the late 1990s and the struggles of cable channels to produce (and pay for) original, scripted programming in

order to stand out from the competition. These new programs defied television conventions and made viewers adjust their expectations of what television could be. Le Femme Nikita offered cable's first antihero, Mad Men cost more than advertisers paid, The Walking Dead became the first mass cable hit, and Game of Thrones was the first global television blockbuster. Internet streaming didn't kill cable, Lotz tells us. Rather, it revolutionized how we watch television. Cable and network television quickly established their own streaming portals. Meanwhile, cable service providers had quietly transformed themselves into Internet providers, able to profit from both prestige cable and streaming services. Far from being dead, television continues to transform.
