Ice 'n' Go Jenny Moshak, Debby Schriver, 2013-05-30 The 1972 passage of Title IX, the federal law that prohibits sex discrimination in education, was a gamechanger for women and girls in athletics. In the forty years since the law was enacted, participation in sports—especially of girls and women—has grown dramatically. With that growth have come challenges. In *Ice-n-Go: A Perspective on Sports and Life*, Jenny Moshak, celebrated trainer of the legendary Lady Vols basketball team and associate athletic director for sports medicine at the University of Tennessee, Knoxville, reflects on the role of sports in society and addresses the high stakes and costs of winning in sports today. *Ice-n-Go* is a culmination of the breadth of knowledge and unique insight from Moshak's more than twenty-five years of work in major college sports. In this highly readable new book, she covers social issues, medical concerns, motivational techniques, gender roles and expectations, the impact of sports on our children, and how the body works, heals, and recovers. Though she writes on serious subjects in a serious way, Moshak's tone is always upbeat and positive with surprisingly simple strategies for improving the athletic experience for all, especially kids. An outstanding athlete herself, she shares lessons learned on her own demanding coast-to-coast bicycle ride across the United States. In sharing her stories, sound advice and fresh ideas, Moshak seeks to do for us what she has always done for the players in her care: to help protect, nurture, and grow the athlete who is in each one of us. Jenny Moshak is the celebrated trainer of the legendary Lady Vols basketball team and associate athletic director for sports medicine at the University of Tennessee, Knoxville. A frequent speaker at workshops and conferences across the country, Moshak is an adjunct professor in the exercise science department at the University of Tennessee. The U.S.A. Olympic Committee cited Moshak for "Outstanding athletic training support" at the United States Olympic Festival. Now retired from the University of Tennessee, Knoxville, Debby Schriver was the first woman to be elected president of the National Orientation Directors Association. She is the author of *In the Footsteps of Champions: The University of Tennessee Lady Volunteers, the First Three Decades*.

Environmentalism and NGO Accountability Kemi C. Yekini, Liafisu Sina Yekini, Paschal Ohalehi, 2020-11-27 It is increasingly being recognised across society that the preservation of our natural environment should shape political, economic and social policies. This book delves into the partnership of non-governmental organisations (NGOs), Environmental NGOs (ENGOS), their communities, and their governmental counterparts in responding to this need.

Rules, Norms and NGO Advocacy Strategies Yumiko Yasuda, 2015-09-16 There is much controversy over the development of new dams for hydropower, where concerns for environmental protection and the livelihoods of local people may conflict with the goals of economic development. This book analyses the opportunities and barriers that NGOs and civil society actors face when conducting advocacy campaigns against such developments. Through a comparison of two NGO coalitions in Cambodia and Vietnam advocating against the Xayaburi hydropower dam on the Mekong River, the book explores the intricate interactions of formal and informal rules and norms and how they influence advocacy strategies. A framework for analysis is proposed which serves as a tool for analysis by civil society actors. The author generates fresh

insights into the way in which opportunities and barriers are created for NGOs to influence state-centric decision-making processes. The book also discusses Mekong riparian states' negotiation process over the Xayaburi hydropower dam in detail, providing an analysis of the Mekong River's governance under the 1995 Mekong Agreement. The book concludes by suggesting ways to improve the engagement of civil society actors in the governance of transboundary rivers and development projects.

Many-Body Quantum Theory in Condensed Matter Physics Henrik Bruus, Karsten Flensberg, 2004-09-03 This book is an introduction to the techniques of many-body quantum theory with a large number of applications to condensed matter physics. The basic idea of the book is to provide a self-contained formulation of the theoretical framework without losing mathematical rigor, while at the same time providing physical motivation and examples. The examples are taken from applications in electron systems and transport theory. On the formal side, the book covers an introduction to second quantization, many-body Green's function, finite temperature Feynman diagrams and bosonization. The applications include traditional transport theory in bulk as well as mesoscopic systems, where both the Landau-Büttiker formalism and recent developments in correlated transport phenomena in mesoscopic systems and nano-structures are covered. Other topics include interacting electron gases, plasmons, electron-phonon interactions, superconductivity and a final chapter on one-dimensional systems where a detailed treatment of Luttinger liquid theory and bosonization techniques is given. Having grown out of a set of lecture notes, and containing many pedagogical exercises, this book is designed as a textbook for an advanced undergraduate or graduate course, and is also well suited for self-study.

The NGO Challenge for International Relations Theory William E.

DeMars, Dennis Dijkzeul, 2015-02-11 It has become commonplace to observe the growing pervasiveness and impact of Non-Governmental Organizations (NGOs). And yet the three central approaches in International Relations (IR) theory, Liberalism, Realism and Constructivism, overlook or ignore the importance of NGOs, both theoretically and politically. Offering a timely reappraisal of NGOs, and a parallel reappraisal of theory in IR—the academic discipline entrusted with revealing and explaining world politics, this book uses practice theory, global governance, and new institutionalism to theorize NGO accountability and analyze the history of NGOs. This study uses evidence from empirical data from Europe, Africa, Latin America, the Middle East and Asia and from studies that range across the issue-areas of peacebuilding, ethnic reconciliation, and labor rights to show IR theory has often prejudged and misread the agency of NGOs. Drawing together a group of leading international relations theorists, this book explores the frontiers of new research on the role of such forces in world politics and is required reading for students, NGO activists, and policy-makers.
