Hyundai and Kia Motors: the Early Years and Product Development Donald G. Southerton,2012-06-20 Hyundai and Kia Motors: The Early Years and Product Development by Donald G Southerton provides deep insights into the rise of the Korean car industry.From the 1960s to early 2000s, political and economic forces impacted the growth and development of the South Korean carmakers, including Hyundai and Kia Motors. In addition, the brands at times partnered for technology with Ford, Mazda, and Mitsubishi, along with world class designers like Giorgetto Giugiaro. Expanding rapidly the Korean brands soon looked to new international markets, including the U.S.Despite the failure of Kia Motors to survive the IMF Crisis, the merger with Hyundai led to integrated technology research, development, and manufacturing-- not to mention the economies of scale needed for the Korean automaker to compete globally with industry heavyweights such as Toyota, Ford, GM, and VW. Car models discussed including the Kia's Brisa, Pride, Sephia, Sportage, and Rio along with Hyundai's Pony, Excel and Santa Fe.

Electrical Systems 1 Abdenour Soualhi,Hubert Razik,2020-04-09 Methods of diagnosis and prognosis play a key role in the reliability and safety of industrial systems. Failure diagnosis requires the use of suitable sensors, which provide signals that are processed to monitor features (health indicators) for defects. These features are required to distinguish between operating states, in order to inform the operator of the severity level, or even the type, of a failure. Prognosis is defined as the estimation of a system's lifespan, including how long remains and how long has passed. It also encompasses the prediction of impending failures. This is a challenge that many researchers are currently trying to address. *Electrical Systems*, a book in two volumes, informs readers of the theoretical solutions to this problem, and the results obtained in several laboratories in France, Spain and further afield. To this end, many researchers from the scientific community have contributed to this book to share their research results.

African American Dramatists Emmanuel S. Nelson,2004-10-30 Despite their

significant contributions to the American theater, African American dramatists have received less critical attention than novelists and poets. This reference offers thorough critical assessments of the lives and works of African American playwrights from the 19th century to the present. The book alphabetically arranges entries on more than 60 dramatists, including James Baldwin, Arna Bontemps, Ossie Davis, Zora Neale Hurston, and Richard Wright. Each entry is written by an expert contributor and includes a biography, a discussion of major works and themes, a summary of the playwright's critical reception, and primary and secondary bibliographies. The volume closes with a selected, general bibliography. African American dramatists have made enormous contributions to the theater and their works are included in numerous editions and anthologies. Some of the most popular plays of the 20th century have been written by African Americans, and high school students and undergraduates study their works. But for all their popularity and influence, African American playwrights have received less critical attention than poets and novelists. This reference offers thorough critical assessments of more than 60 African American dramatists from the 19th century to the present.

Fault Diagnosis and Detection Mustafa Demetgul, Muhammet Ünal, 2017-05-31 Mass production companies have become obliged to reduce their production costs and sell more products with lower profit margins in order to survive in competitive market conditions. The complexity and automation level of machinery are continuously growing. This development calls for some of the most critical issues that are reliability and dependability of automatic systems. In the future, machines will be monitored remotely, and computer-aided techniques will be employed to detect faults in the future, and also there will be unmanned factories where machines and systems communicate to each other, detect their own faults, and can remotely intercept their faults. The pioneer studies of such systems are fault diagnosis studies. Thus, we hope that this book will contribute to the literature in this regard.

Proceedings of the International Conference on Applied CyberSecurity (ACS) 2021 Hani Ragab Hassen, Hadj Batatia, 2022-02-01 Cybersecurity has gained in awareness and media coverage in the last decade. Not a single week passes without a major security

incident that affects a company, sector, or governmental agencies. This proceedings of the International Conference on Applied CyberSecurity 2021 (ACS21), held in Dubai on 13 and 14 November, contains thirteen original contributions. More than half of the contributions are about applications of machine learning to accomplish several cybersecurity tasks, such as malware, phishing email detection, and Botnet detection. This was consistent with the current research and market trends. We divided this book into two parts; the first is focused on machine learning applications to cybersecurity, whereas the second groups the other approaches. This book is suitable for cybersecurity researchers and practitioners as well as fresh graduates. It is also suitable for artificial intelligence researchers interested in exploring applications in cybersecurity.

Mommy, Daddy What Is This? Chef Anthony Thomas, 2019-07-30 As most toddler parents can relate, one of the biggest recent developments I've seen in my 3 year-old daughter, Ashlyn, has been that of an ever-inquisitive mind - noted by the hypnotic flow of a few signature questions that 10x whenever we leave our home. Mommy, Daddy What Is This? is inspired by our family visits to the grocery store accompanied by Ashlyn, with the title paying homage to her most trusted go-to catchphrase. As a full time dad-chef, I personally make a lot of grocery store runs with Ashlyn in tow, constantly exposing her to and familiarizing her with an array of produce - ranging from the everyday Gala Apple to and exotic variety of Roamnesco. My vision with Mommy, Daddy What Is This? is to share a food-centric educational system that my family & I have adopted via our produce section escapades - highlighting one produce item per letter in the alphabet, from A to Z. My greater mission is to inspire fellow toddler parents to re-imagine grocery trips with their children as exciting educational journeys that also happen to stock the fridge (and lunchboxes) with healthy and delicious meals and snacks!
