Introduction to Silicon Valley Bank Gilad James, PhD, Silicon Valley Bank (SVB) is a bank that specializes in providing financial services to technology and life science companies, as well as venture capital and private equity firms. The bank was founded in 1983 by a group of entrepreneurs in Santa Clara, California, who were frustrated with the traditional banking industry's lack of understanding and support for their high-growth, high-risk businesses. SVB has since grown to become one of the most prominent banks in the innovation economy, with offices across the United States and around the world. SVB's primary offerings include commercial banking, investment banking, and asset management services. The bank's commercial banking services include traditional banking products such as deposit accounts, loans, and lines of credit, as well as customized financial solutions for the unique needs of technology and life science companies. SVB's investment banking arm provides merger and acquisition advisory services, underwriting of public and private offerings, and strategic consulting to the bank's clients. Finally, the bank's asset management division manages investment funds that provide capital to venture capital and private equity firms, as well as direct investments in the bank's clients. Overall, SVB's focus on the innovation economy has allowed it to develop deep expertise in a niche market and build a compelling value proposition for technology and life science companies.

Turmoil in the Banking System Stigler Center,2023-07-07 On March 10, 2023, U.S. regulators shut down Silicon Valley Bank after a run on its deposits. Several other banks, including Signature Bank, Credit Suisse, and First Republic Bank, had to be bought or shut down in the following weeks. This collection of articles from some of the world's top economists, written and published as events unfolded, explore the reasons for the 2023 banking crisis, the failure of regulators and politicians to prevent this moment, and how governments and banks must reform their policies to prevent similar crises in the future.

Banking in the Age of the Platform Economy Giorgio Bou-Daher,2023-05-22 The 2008 global financial crisis and the concurrent rise of the platform economy have had profound effects on the banking sector. Over the past decade and a half, banking leaders have had to contend with rapidly evolving regulatory, technological, and competitive forces. The pace of technological change has been formidable with advances in artificial intelligence, cloud computing, and blockchain technology. These forces have brought to the forefront new managerial imperatives that banking leaders have to make sense of as they strategise in light of these unfolding new realities. Banking in the Age of the Platform Economy explores the strategies that managers and leaders at banks and other financial institutions have adopted in response to the rise of the platform economy, the new forces of interdependence that it entails, and the risks/opportunities involved in cocreating value with external stakeholders. With its discussion of the strategies of interdependence and value cocreation that the top twenty banks in Europe adopted between 2008 and 2019, this book is essential reading for academics, banking and fintech professionals, and management consultants that advise banks and fintechs.

The Speculator of Financial Markets Daniele D'Alvia,2023-12-30 The book illustrates financial markets from the point of view of their subjectivity, namely by analysing one of the most prominent figures among market operators: the speculator. Whereas many textbooks or monographs are strictly devoted to the analysis of financial law or history, this book tells a remarkable story based on markets' boom-bust, expectations, banks' fragilities, market sentiment, desires, and dreams. In light of this, D'Alvia provides unique financial knowledge and delivers a book that constitutes an outstanding introduction to the topic of the speculator through its historical account and its evolution till modern days. Academics, lawyers, financial regulators, and retail and qualified investors should save a space for it on their shelves.

Win-Win Corporations Shashank Shah,2016-12-07 Why did Ratan Tata decide to pay for all the victims of 26/11 whether injured in the Taj or anywhere else? Why did HDFC 's Aditya Puri insist that employees leave for home by 5.30 p.m.? How did HUL develop a cheaper, better product to beat its competitor, Nirma? What do Taj Hotels, HDFC, HUL, L&T and BPCL have in common? They are the win-win corporations! Based on over a decade of research, Shashank Shah takes these truly outstanding Indian companies and studies how they do business. Each of these companies has exceptional practices when it comes to stakeholder management. Whether the stakeholder is an employee, customer, investor, vendor or even society at large, these companies reveal how looking at everyone else's interests doesn't really mean compromising on your own. Often, the two complement each other and that is what makes a win-win solution for everyone. This book gives an inside look into what motivates exceptional companies and how they are a cut above the rest. Full of fascinating anecdotes, leadership philosophy and background stories of organizations, Win-Win Corporations is an inspiring read into what makes companies great.

The Rift Alex Perry,2015-11-17 A vivid, powerful, and controversial look at how the world gets Africa wrong, and how a resurgent Africa is forcing it to think again. Africa has long been misunderstood -- and abused -- by outsiders. Correspondent Alex Perry traveled the continent for most of a decade, meeting with entrepreneurs and warlords, professors and cocaine smugglers, presidents and jihadis. Beginning with a devastating investigation into a largely unreported war crime-in 2011, when the US and the major aid agencies helped cause a famine in which 250,000 Somalis died-he finds Africa at a moment of furious self-assertion. To finally win their freedom, Africans must confront three last false prophets-Islamists, dictators and aid workers-who would keep them in their bonds. Beautifully written, intimately reported, and sure to spark debate, The Rift passionately argues that a changing Africa revolutionizes our ideas of it, and of ourselves.

HDFC Bank 2.0 Tamal Bandyopadhyay,2019-01-01 FOREWORD BY NANDAN NILEKANI "Tamal combines his financial knowledge, eye for detail, and an excellent storytelling style to create a vivid portrait of India's most valued bank and its path to the future." NANDAN NILEKANI, Co-founder and Chairman of Infosys and Founding Chairman of UIDAI (Aadhaar) "Tamal has enthusiastically documented the epiphany that HDFC Bank's leadership had in starting out on their digital journey. India is set for seismic changes to day-to-day banking over the next few years and banks who don't commit to fully re-engineering their practice around becoming a

technology company that delivers real-time, contextual banking experiences will wither on the vine. HDFC Bank has made a solid start on this journey, but the final chapter has not yet been written.” BRETT KING, Founder, Moven and bestselling author of Bank 4.0 The seeds of change were sown in September 2014, when HDFC Bank MD Aditya Puri went to Silicon Valley to meet the brightest tech minds in the world. By the time he got back, he knew exactly what needed to be done. It was time for a revolution. Instead of waiting to be disrupted by fintech companies, HDFC Bank went all out to disrupt itself, recasting its role and scope on a scale that has never been attempted before. In one of the biggest transformations ever undertaken in any business, HDFC Bank wants to become a platform facilitating a financial experience. Tamal Bandyopadhyay chronicles HDFC Bank’s own digital disruption exercise through the very people who drove it, narrating a story that’s as compelling as unique in India’s financial system. With his keen eye for detail, deep knowledge of banking and unparalleled storytelling ability, Bandyopadhyay recounts the journey of India’s most valued lender from a life cycle bank to a lifestyle bank. TAMAL BANDYOPADHYAY is a bestselling author, award-winning columnist and a keen observer of the Indian banking sector for over two decades.

Fintech Yves Eonnet,Hervé Manceron,2018-09-13 Following taxis, hotels, and supermarkets, banks are now part of the industries bound to be disrupted. Hindered by cumbersome branch networks, dragging late behind digital trends, abhorred by many of their clients, our good old banks should worry quite a bit... Has the final word been spoken? Not so sure. Banks still have a few good cards to play... as long as they hurry. Startups, tech giants, telcos: the banking fortress is under attack from all sides! Engaged and visionary, this book shows how traditional banks are both striking back and reinventing themselves thanks to fintechs.

The Risk Factor Deborah Perry Piscione,2014-12-23 Our most revered business icons of the last few decades are the bold risktakers, such as Richard Branson, Elon Musk, and Steve Jobs. Yet in today's stock market-driven economy, companies are playing it safe, with too many leaders focused on short-term gains, rather than value creation. The result is a static business culture that generates forgettable results—even as the world demands big solutions. So how do we get back in the risk-taking game? In *The Risk Factor*, Deborah Perry Piscione takes the most comprehensive look at this crucial, undervalued leadership behavior, and outlines how companies must support risk-taking across the enterprise. Exploring the heroes of risk, including entrepreneurs, venture capitalists, and technologists, and the role risk-taking and failure tolerance play in their success, she makes a compelling case not only for big, flashy mergers or acquisitions, but also for unorthodox choices in everything from leadership to corporate social responsibility. Drawing on case studies from a wide range of now-famous giants (Netflix, Salesforce) and successful start-ups (Tesla, NetApp), she distills lessons for both new entrepreneurs and established companies whose longtime risk aversion has cost them more than they realize.

From the Other Side of the World Elmira Bayrasli,2015-09-08 Elmira Bayrasli’s worldview was turned upside down when a woman in Bosnia told her, “thanks for the help. But we need work and jobs, not foreign aid.” That prompted Bayrasli to embark on a worldwide quest to find how talented people have overcome insurmountable obstacles to build high-growth businesses that are driving wealth and building communities, regions and countries. Through seven remarkable stories, Elmira Bayrasli shows why the next Steve Jobs and the next Apple, Google or Facebook is as likely to come from Nigeria, Pakistan or Mexico as Silicon Valley. She discovers that what distinguishes techies in Silicon Valley from women selling bamboo stools in Bangladesh isn’t their sophistication but simply the conditions that are necessary to sustain and scale business ideas. In the absence of these obstacles, global entrepreneurship can flourish. Bayrasli paints compelling stories of extraordinary entrepreneurs creatively battling corruption, lack of infrastructure, capital shortages and underdeveloped supplier and customer networks. She offers solutions that can be utilized by entrepreneurs everywhere, and shows why micro-finance, social entrepreneurship, and foreign aid are not enough. Most importantly, she shows how the key to building successful entrepreneurial ecosystems is to provide the framework that enables start-ups to scale.
