Silicon Values Jillian C. York, 2022-03-15 The battle for online rights and for the future of democracy Who decides what is permissible on the internet: Politicians? Mark Zuckerberg? Users? Who determines when political debate becomes hate speech? How does this impact our identity or our ability to create communities and to protest? *Silicon Values* reports on the war for digital rights and how major corporations—Facebook, Twitter, Google and Tiktok—threaten democracy as they harvest our personal data in the pursuit of profit.

Bit Tyrants Rob Larson, 2020-02-04 If the stories they tell about themselves are to be believed, all of the tech giants—Apple, Google, Microsoft, Facebook, and Amazon—were built from the ground up through hard work, a few good ideas, and the entrepreneurial daring to seize an opportunity when it presented itself. With searing wit and blistering commentary *Bit Tyrants* provides an urgent corrective to this froth of board room marketing copy that is so often passed off as analysis. For fans of corporate fairy-tales there are no shortage of official histories that celebrate the innovative genius of Steve Jobs, liberal commentators who fall over themselves to laude Bill Gates's selfless philanthropy, or politicians who will tell us to listen to Mark Zuckerberg for advice on how to protect our democracy from foreign influence. In this highly unauthorized account of the Big Five's origins, Rob Larson sets the record straight, and in the process shreds every focus-grouped bromide about corporate benevolence he could get his hands on. Those readers unwilling to smile and nod as every day we become more dependent on our phones and apps to do our chores, our jobs, and our socializing can take heart as Larson provides us with maps to all the shallow graves, skeleton filled closets, and invective laced emails Big Tech left behind on its ascent to power. His withering analysis will help readers crack the code of the economic dynamics that allowed these companies to become near-monopolies very early on, and, with a little bit of luck, his calls for digital socialism might just inspire a viral movement for online revolution.

Containing Big Tech Tom Kemp, 2023-08-22 The path forward to rein in online surveillance, AI, and tech monopolies Technology is a gift and a curse. The five Big Tech companies—Meta, Apple, Amazon, Microsoft, and Google—have built innovative products that improve many aspects of our lives. But their intrusiveness and our dependence on them have created pressing threats to our civil rights, economy, and democracy. Coming from an extensive background building Silicon Valley-based tech startups, Tom Kemp eloquently and precisely weaves together the threats posed by Big Tech: • the overcollection and weaponization of our most sensitive data • the problematic ways Big Tech uses AI to process and act upon our data • the stifling of competition and entrepreneurship due to Big Tech's dominant market position This richly detailed book exposes the consequences of Big Tech's digital surveillance, exploitative use of AI, and monopolistic and anticompetitive practices. It offers actionable solutions to these problems and a clear path forward for individuals and policymakers to advocate for change. By containing the excesses of Big Tech, we will ensure our civil rights are respected and preserved, our economy is competitive, and our democracy is protected.

Just Business: Multinational Corporations and Human Rights (Norton Global Ethics Series) John Gerard Ruggie, 2013-03-25 From Asian sweatshops to oil-based violence in Nigeria, the challenges of regulating harmful corporate practices in some of the world's most difficult regions long seemed insurmountable. Human rights groups and businesses were locked in a stalemate. In 2005 the United Nations appointed John Ruggie to examine the problem and identify a path forward. From this inauspicious start, Ruggie produced his "Protect, Respect and Remedy" Framework and "Guiding Principles" to implement it. A road map for responsible corporate practices that takes a pragmatic yet rights-based approach, the Guiding Principles hold

both states and businesses accountable for providing more effective protection to individuals and communities. These “Ruggie Rules” were endorsed unanimously by the UN. They are being incorporated by governments and companies around the world and are employed by human rights and workers' groups. Just Business shows how this powerful transformation came about and what it means for governments, businesses, and people everywhere.

World Report 2019 Human Rights Watch,2019-02-05 The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Nevertheless, They Persist Nadejda Marques,2018-12-14 This book is the result of seven years in Silicon Valley and over 100 focused interviews with women in a range of professions. Through the narratives of women whose lived experience spans decades and scores of institutions, it seeks to understand the history of sexism and current gender dynamics in the Valley. It presents stories of survival, resistance, courage and insistence of women who refuse to accept today what has always been a given: that Silicon Valley is run by and for men, with little understanding or concern for the impact of this unquestioned sexism on women. This book also presents an alternative path which might be taken identifying approaches and ideas that can lead us to a different, better, more egalitarian, and also more profitable future. As such, the book is both a study and a guide. It seeks to inform and question, but also to prepare and arm women--and men--to engage and succeed in Silicon Valley.

The Transformation of Human Rights Fact-Finding Philip Alston,Sarah Knuckey,2015-11-23 Fact-finding is at the heart of human rights advocacy, and is often at the center of international controversies about alleged government abuses. In recent years, human rights fact-finding has greatly proliferated and become more sophisticated and complex, while also being subjected to stronger scrutiny from governments. Nevertheless, despite the prominence of fact-finding, it remains strikingly under-studied and under-theorized. Too little has been done to bring forth the assumptions, methodologies, and techniques of this rapidly developing field, or to open human rights fact-finding to critical and constructive scrutiny. The Transformation of Human Rights Fact-Finding offers a multidisciplinary approach to the study of fact-finding with rigorous and critical analysis of the field of practice, while providing a range of accounts of what actually happens. It deepens the study and practice of human rights investigations, and fosters fact-finding as a discretely studied topic, while mapping crucial transformations in the field. The contributions to this book are the result of a major international conference organized by New York University Law School's Center for Human Rights and Global Justice. Engaging the expertise and experience of the editors and contributing authors, it offers a broad approach encompassing contemporary issues and analysis across the human rights spectrum in law, international relations, and critical theory. This book addresses the major areas of human rights fact-finding such as victim and witness issues; fact-finding for advocacy, enforcement, and litigation; the role of interdisciplinary expertise and methodologies; crowd sourcing, social media, and big data; and international guidelines for fact-finding.

Team Human Douglas Rushkoff,2019-01-22 “A provocative, exciting, and important rallying cry to reassert our human spirit of community and teamwork.”—Walter Isaacson Team Human is a manifesto—a fiery distillation of preeminent digital theorist Douglas Rushkoff’s most urgent thoughts on civilization and human nature. In one hundred lean and incisive statements, he argues that we are essentially social

creatures, and that we achieve our greatest aspirations when we work together—not as individuals. Yet today society is threatened by a vast antihuman infrastructure that undermines our ability to connect. Money, once a means of exchange, is now a means of exploitation; education, conceived as way to elevate the working class, has become another assembly line; and the internet has only further divided us into increasingly atomized and radicalized groups. Team Human delivers a call to arms. If we are to resist and survive these destructive forces, we must recognize that being human is a team sport. In Rushkoff's own words: "Being social may be the whole point." Harnessing wide-ranging research on human evolution, biology, and psychology, Rushkoff shows that when we work together we realize greater happiness, productivity, and peace. If we can find the others who understand this fundamental truth and reassert our humanity—together—we can make the world a better place to be human.

The 9/11 Generation Sunaina Marr Maira, 2016-09-01 Explores how young people from communities targeted in the War on Terror engage with the "political," even while they are under constant scrutiny and surveillance Since the attacks of 9/11, the banner of national security has led to intense monitoring of the politics of Muslim and Arab Americans. Young people from these communities have come of age in a time when the question of political engagement is both urgent and fraught. In *The 9/11 Generation*, Sunaina Marr Maira uses extensive ethnography to understand the meaning of political subjecthood and mobilization for Arab, South Asian, and Afghan American youth. Maira explores how young people from communities targeted in the War on Terror engage with the "political," forging coalitions based on new racial and ethnic categories, even while they are under constant scrutiny and surveillance, and organizing around notions of civil rights and human rights. *The 9/11 Generation* explores the possibilities and pitfalls of rights-based organizing at a moment when the vocabulary of rights and democracy has been used to justify imperial interventions, such as the U.S. wars in Iraq and Afghanistan. Maira further reconsiders political solidarity in cross-racial and interfaith alliances at a time when U.S. nationalism is understood as not just multicultural but also post-racial. Throughout, she weaves stories of post-9/11 youth activism through key debates about neoliberal democracy, the "radicalization" of Muslim youth, gender, and humanitarianism.

World Report 2020 Human Rights Watch, 2020-01-28 The best country-by-country assessment of human rights. The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual *World Report* is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

#HumanRights Ronald Niezen, 2020-07-28 Social justice and human rights movements are entering a new phase. Social media, artificial intelligence, and digital forensics are reshaping advocacy and compliance. Technicians, lawmakers, and advocates, sometimes in collaboration with the private sector, have increasingly gravitated toward the possibilities and dangers inherent in the nonhuman. *#HumanRights* examines how new technologies interact with older models of rights claiming and communication, influencing and reshaping the modern-day pursuit of justice. Ronald Niezen argues that the impacts of information technologies on human rights are not found through an exclusive focus on sophisticated, expert-driven forms of data management but in considering how these technologies are interacting with other, traditional forms of media to produce new avenues of expression, public sympathy, redress of grievances, and sources of the self. Niezen considers various ways that the pursuit of justice is happening via new technologies, including crowdsourcing, social media-facilitated mobilizations (and enclosures), WhatsApp activist networks, and the selective attention of Google's search engine algorithm. He uncovers

how emerging technologies of data management and social media influence the ways that human rights claimants and their allies pursue justice, and the new victimology that prioritizes and represents strategic lives and types of violence over others. #HumanRights paints a striking and important panoramic picture of the contest between authoritarianism and the new tools by which people attempt to leverage human rights and bring the powerful to account.

Working in Silicon Valley: Economic and Legal Analysis of a High-velocity Labor Market Alan Hyde, 2015-06-11 This work examines the relationship between the rapid technological and economic growth characteristic of high technology districts and their distinct labor market institutions - short job tenures, rapid turnover, flat firm hierarchies, weak internal labor markets, high use of temporary labor, unusual uses of independent contracting, little unionization, unusual employee organization (e.g., chat groups, and ethnic organization), unequal income, minimal employment discrimination litigation, flexible compensation (especially stock options), and heavy use of immigrants on short-term visas. The author suggests that while these distinctive labor market institutions are somewhat unorthodox and may present legal problems, they play essential roles in high growth.

Seeing Human Rights Sandra Ristovska, 2021-08-03 As video becomes an important tool to expose injustice, an examination of how human rights organizations are seeking to professionalize video activism. Visual imagery is at the heart of humanitarian and human rights activism, and video has become a key tool in these efforts. The Saffron Revolution in Myanmar, the Green Movement in Iran, and Black Lives Matter in the United States have all used video to expose injustice. In *Seeing Human Rights*, Sandra Ristovska examines how human rights organizations are seeking to professionalize video activism through video production, verification standards, and training. The result, she argues, is a proxy profession that uses human rights videos to tap into journalism, the law, and political advocacy. Ristovska explains that this proxy profession retains some tactical flexibility in its use of video while giving up on the more radical potential and imaginative scope of video activism as a cultural practice. Drawing on detailed analysis of legal cases and videos as well as extensive interviews with staff members of such organizations as Amnesty International, Human Rights Watch, WITNESS, the International Criminal Tribunal for the former Yugoslavia (ICTY), and the International Criminal Court (ICC), Ristovska considers the unique affordances of video and examines the unfolding relationships among journalists, human rights organizations, activists, and citizens in global crisis reporting. She offers a case study of the visual turn in the law; describes advocacy and marketing strategies; and argues that the transformation of video activism into a proxy profession privileges institutional and legal spaces over broader constituencies for public good.

Atlas Rising Atlas Rising Institute, 2018-06-20 Ayn Rand's admirers comprise a Who's Who of innovative achievers, particularly in Silicon Valley. But isn't Ayn Rand merely an advocate of ruthless capitalist greed and screwing the poor? She is known as such among those mentally incapable of understanding what she wrote. Others know better. These others are the subject of this report. Many are wealthy, many are not. But they're all thinkers and achievers. And virtually all admit they would not be as capable and effective as they are without her ideas and inspiration. Those influenced by her Objectivist philosophy and related Libertarian activism are making history. They're making history with radical achievements in Legal Reforms, Education, Life Extension, Environmentalism, Space Travel and Development, Radical Problem-Solving Methodologies, Brain Science, Technology, Worldwide Access to Knowledge, Human Rights and Political Liberation. Even if you're already an admirer of Ayn Rand, as

you read the stories of those who carry her ideas ever forward in life and work, chances are you won't see life's possibilities and opportunities quite the same ever again.

The Global Bioethics of Artificial Intelligence and Human Rights Dominique J. Monlezun, 2020-07-22 Human annihilation has never been so easy. Artificial intelligence-guided genetic-engineered nanotechnology and robotics (AI-GNR) are widely recognized as our most transformative technological revolution ever, yet we do not even have a common moral language to unite our pluralistic world to prevent an AI apocalypse should this revolution explode out of our control. This book is the first known comprehensive global bioethical analysis of AI and AI-GNR by defining the Thomistic-Aristotelian personalist foundation of the rights and duties-based social contract framework of the United Nations, and then applying it to AI. As such, it creates a compelling approach which will appeal to scientists, health professionals, policy makers, politicians, students, and anyone interested in our shared survival around shared solutions.

Human Rights and the Environment Lyuba Zarsky, 2012 The impact of environmental damage on human rights - civil, political or welfare and labour rights - is becoming ever-more widely appreciated and has direct bearing on the behaviour of companies and their norms of conduct. In this volume, contributors draw on the tools and insights of a range of disciplines, including law, anthropology, economics, geography and social science, to analyze the issues and show how new standards that protect rights and liberties can be established.

Power, Information Technology, and International Relations Theory D. McCarthy, 2015-02-03 This book examines the internet as a form of power in global politics. Focusing on the United States' internet foreign policy, McCarthy combines analyses of global material culture and international relation theory, to reconsider how technology is understood as a form of social power.

Research Handbook on Global Governance, Business and Human Rights Marx, Axel, Van Calster, Geert, Wouters, Jan, Otteburn, Kari, Lica, Diana, 2022-03-10 This essential Research Handbook provides a comprehensive and critical assessment of the global governance instruments related to business and human rights from an interdisciplinary perspective. Contributions from a diverse range of leading international scholars offer an overview of the existing literature and rapidly-evolving research discipline, as well as identifying key trends and outlining an ambitious future research agenda.

Beyond the Valley Ramesh Srinivasan, 2020-09-01 How to repair the disconnect between designers and users, producers and consumers, and tech elites and the rest of us: toward a more democratic internet. In this provocative book, Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics, economics, and other inefficient, inharmonious human activities. We may love the immediacy of Google search results, the convenience of buying from Amazon, and the elegance and power of our Apple devices, but it's a one-way, top-down process. We're not asked for our input, or our opinions—only for our data. The internet is brought to us by wealthy technologists in Silicon Valley and China. It's time, Srinivasan argues, that we think in terms beyond the Valley. Srinivasan focuses on the disconnection he sees between designers and users, producers and consumers, and tech elites and the rest of us. The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy. In search of a more democratic internet, Srinivasan takes us to the mountains of Oaxaca, East and West Africa, China, Scandinavia, North America, and elsewhere, visiting the “design labs” of rural, low-income, and indigenous people around the world. He talks to a range of high-profile public figures—including Elizabeth Warren, David Axelrod, Eric Holder, Noam Chomsky, Lawrence Lessig, and the founders of Reddit, as well as community organizers, labor

leaders, and human rights activists.. To make a better internet, Srinivasan says, we need a new ethic of diversity, openness, and inclusivity, empowering those now excluded from decisions about how technologies are designed, who profits from them, and who are surveilled and exploited by them.
