*Spychips* Katherine Albrecht,Liz McIntyre,2006-09-26 Winner of the Lysander Spooner Award for Advancing the Literature of Liberty As you walk down the street, a tiny microchip implanted in your tennis shoe tracks your every move; chips woven into your clothing transmit the value of your outfit to nearby retailers; and a thief scans the chips hidden inside your money to decide if you're worth robbing. This isn't science fiction; in a few short years, it could be a fact of life. Spsychips takes readers into the frightening world of Radio Frequency Identification (RFID). While manufacturers and the government want you to believe that they would never misuse the technology, the future looks like an Orwellian nightmare when you consider the possibilities of surveillance and tracking these chips embody. Combining in-depth research with firsthand reporting, Spsychips reveals how RFID technology, if left unchecked, could soon destroy our privacy, radically alter the economy, and open the floodgates for civil liberty abuses.

*Infant Formula* Institute of Medicine,Food and Nutrition Board,Committee on the Evaluation of the Addition of Ingredients New to Infant Formula,2004-06-10 Infant formulas are unique because they are the only source of nutrition for many infants during the first 4 to 6 months of life. They are critical to infant health since they must safely support growth and development during a period when the consequences on inadequate nutrition are most severe. Existing guidelines and regulations for evaluating the safety of conventional food ingredients (e.g., vitamins and minerals) added to infant formulas have worked well in the past; however they are not sufficient to address the diversity of potential new ingredients proposed by manufacturers to develop formulas that mimic the perceived and potential benefits of human milk. This book, prepared at the request of the Food and Drug Administration (FDA) and Health Canada, addresses the regulatory and research issues that are critical in assessing the safety of the addition of new ingredients to infants.
