Time and the Psyche Angeliki Yiassemides, 2017-04-21 In *Time and the Psyche*, a diverse selection of contributors explores the multi-layered aspects of time through the lens of analytical psychology. The book aims to bridge the gap between theory and practice, emphasising time's fundamental role in the workings and expressions of the psyche, and additionally exploring cultural and clinical dimensions. The contributors deal with temporality in our inner world and its manifestations as expressed by products of our psyche, covering topics including disturbances of temporality within the psychoanalytic session, the acausal connecting principle of synchronicity, time as expressed in film, objects, literature, and culture, and temporality as understood in various types of dreams and imaginary practices. The book also explores the time-bound world, time versus timelessness, the realm of the eternal, human versus cosmic time, Chronos versus Kairos and other temporality-related dimensions and their relationship to our psyche and our experience in the world. With contributors from backgrounds in clinical work, the arts, literature, and philosophy, this collection is unique in its scope. *Time and the Psyche* is a thought-provoking reading for academics and students of Jungian and post-Jungian studies, analytical psychologists and Jungian analysts in practice and in training.

Agricultural Statistics 2015 Rich Holcomb, 2016-12-13 *Agricultural Statistics* is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use. Professionals in the following fields to include farmers, ranchers, soil conservationists, surveyors, agricultural economist consultants, livestock manufacturers, livestock feedlot operators, food distributors, animal scientists, food chemists, food brokers, farm and land appraisers, statistical professionals, economists, (and more) may have the greatest interest in this volume. Additionally, students pursuing coursework in food science and agribusiness coursework may have an interest in this reference for completing term papers and other assignments. In this volume, you will find foreign agricultural trade statistics that include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. Territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attache and Foreign Service Officers, and the result of office research. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture. The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Censuses of Agriculture taken every five years and check data from various sources. Being estimates, they are subject to revision as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled. Extensive table data include statistics of the following: - Statistics of Grain and Feed - Cotton, Tobacco, Sugar Crops, and Honey - Oilseeds, Fats, and Oils - Vegetables and Melons - Hay, Seeds, and Minor Field Crops - Cattle, Hogs, and Sheep - Dairy and Poultry - Insurance, Credit & Cooperatives - Agricultural Conservation & Forestry - Consumption & Family Living - Fertilizers & Pesticides - Miscellaneous *Agricultural Statistics* such as Foreign Agricultural Trade Statistics including exports, fisheries and more. Intellectual Property, Finance and Corporate Governance Janice Denoncourt, 2018-04-19 IP law has evolved from being a little pool to a big ocean. Corporate governance needs to respond to society's rising expectations of directors and boards as the impact of the global intellectual property ecosystem is felt. How can a responsible corporate culture of IP transparency be stimulated to create a rosy future to connect corporate communication with the desires of shareholders, investors and other stakeholders? The astonishing lack of material quantitative and qualitative information companies report about their IP assets makes it difficult for shareholders and other stakeholders to assess directors' stewardship of those assets – a pressing corporate governance issue in the 21st century. This book advances IP reporting in alignment with the key corporate governance principles of transparency and disclosure. It analyses the juncture between the IP ecosystem; corporate finance and accounting for intangibles; and corporate governance. Patents, mini-case studies and an original business triage style model for assessing IP disclosures are used to illustrate the gaps corporate governance theory needs to address. Focussing on the common law tradition of corporate governance in England and Wales, intangibles and IP reporting developments in other jurisdictions are also explored.

George Lindsay and the Art of Technical Analysis Ed Carlson, 2011-07-22 Eight months in advance, one eccentric genius predicted the start of history's greatest bull market—accurate to within 17 days and 7 Dow Jones points. Then, days before his death, he called its end—precisely. Louis Rukeyser called him uncannily accurate. The Stock Traders Almanac called his work the finest long-term forecast we have ever seen. Honored by his peers, admired for his profound knowledge of history and markets, George Lindsay is now nearly forgotten. Much of his most significant research has been relegated to yellowing, typed newsletters. Until now. In *George Lindsay and the Art of Technical Analysis*, Ed Carlson demonstrates the immense power of Lindsay's methods in today's markets. Using visual models, Carlson explains Lindsay's models clearly, simply, and intuitively. Using this book, investors and traders can apply these techniques without strong mathematical expertise, and without deciphering Lindsay's dense writing style. Carlson walks through using Lindsay's Three Peaks and a Domed House model to uncover surprising patterns in haphazard short-lived movements... using Lindsay's Timing Method for Traders to identify tradeable market tops and get out of bull markets in time... predicting decisive, often violent market movements, and more. This book is an indispensable addition to any technical analysis library—and every technician's trading arsenal. Awarded Best Investment Book of the Year – Stock Traders Almanac 2012

The Cultural Heritage of Sikkim Sarit K. Chaudhuri, Sameera Maiti, Charisma K. Lepcha, 2020-03-10 Sikkim has been a region of anthropological interest since the 1930s when Geoffrey Gorer and John Morris did their fieldwork among the Lepchas of Dzongu, north Sikkim. While it was mentioned in various writings of travellers and administrators during the British period, there is a dearth of literature even today on the rich heritage of Sikkim. This collection of twenty-five essays presented first at the international conference on Cultural Heritage of Sikkim, organized by the Department of Anthropology, Sikkim University, Gangtok goes a long way in breaching this gap. The book will be of immense interest to scholars and students of Anthropology, Sociology and Cultural Studies and will lead to new research on the people and the places of Sikkim and India's North-East. Please note: This title is co-published with Manohar Publishers, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka
