The Getting Things Done Workbook David Allen, Brandon Hall, 2019-09-03 An accessible, practical, step-by-step how-to guide that supplements Getting Things Done by providing the details, the how-to's, and the practices to apply GTD more fully and easily in daily life The incredible popularity of Getting Things Done revealed people's need to take control of their own productivity with a system that reduces the stress of staying on top of it all. Around the world hundreds of certified trainers and coaches are engaged full time in teaching the process, supported by a grassroots movement of Meetup groups, LinkedIn groups, Facebook groups, podcasts, blogs and dozens of apps based on it. While Getting Things Done remains the definitive way to gain perspective over work and create the mental space for creativity and mindfulness, The Getting Things Done Workbook enhances the original by providing an accessible guide to the GTD

methodology in workbook form. The workbook divides the process into small, manageable segments to allow for easier learning and doing. Each chapter identifies a challenge the reader may be facing--such as being overwhelmed by too many to-do lists, a messy desk, or email overload--and explains the GTD concept to address. The lessons can be learned and implemented in almost any order, and whichever is adopted will provide immediate benefits. This handy instructional manual will give both seasoned GTD users and newcomers alike clear action steps to take to reach a place of sustained efficiency.

Simply put, ZTD teaches you: (1) The key habits needed to be organized and productive. (2) How to implement these habits. (3) How to organize the habits into a simple system that will keep everything in your life in its place. (4) How to simplify what you need to do. (5) How to implement an even simpler version called Minimal ZTD. If you're tired of doing things the hard way and just want a simple, easy, yet effective way to accomplish your goals, Zen To Done is just what you need.

How do we help the overloaded and distracted next generation deal with increasing complexity and help them not only survive, but thrive? How do we help them experience stress-free productivity and gain momentum and confidence? How do we help them achieve autonomy, so that they can confidently take on whatever comes their way? Getting Things Done for Teens will adapt its lessons by offering a fresh take on the GTD methodology, framing life as a game to play and GTD as the game pieces and strategies to play your most effective game. It presents GTD in a highly visual way and frames the methodology as not only as a system for being productive in school, but as a set of tools for everyday life. Power Plant Life Management and Performance Improvement John E Oakey, 2011-09-28 Coal- and gas-based power plants currently supply the largest proportion of the world's power generation capacity, and are required to operate to increasingly stringent environmental standards. Higher temperature combustion is therefore being adopted to improve plant efficiency and to maintain net power output given the energy penalty that integration of advanced emissions control systems cause. However, such operating regimes also serve to intensify degradation mechanisms within power plant systems, potentially affecting their reliability and lifespan. Power plant life management and performance improvement critically reviews the fundamental degradation mechanisms that affect conventional power plant systems and components, as well as examining the operation and maintenance approaches and advanced plant rejuvenation and retrofit options that the industry are applying to ensure overall plant performance improvement and life management. Part one initially reviews plant operation issues, including fuel flexibility, condition monitoring and performance assessment. Parts two, three and four focus on coal boiler plant, gas turbine plant, and steam boiler and turbine plant respectively, reviewing environmental degradation mechanisms affecting plant components and their mitigation via advances in materials selection and life management approaches, such as repair, refurbishment and upgrade. Finally, part five reviews issues relevant to the performance management and improvement of advanced heat exchangers and power plant welds. With its distinguished editor and international team of contributors, Power plant life management and performance improvement is an essential reference for power plant operators, industrial engineers and metallurgists, and researchers interested in this important field. Provides an overview of the improvements to plant efficiency in coal- and gas-based power plants Critically

reviews the fundamental degradation mechanisms that affect conventional power plant systems and components, noting mitigation routes alongside monitoring and assessment methods Addresses plant operation issues including fuel flexibility, condition monitoring and performance assessment

Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social

media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.
