Electric Contacts Ragnar Holm, 2013-06-29 This book is a completely revised and rewritten edition of *Electric Contacts Handbook* published in 1958. A large number of new investigations are considered, and many of the basic theories are revised in detail and even in general. The body of information had to be limited as it was not advisable to increase the volume of the book. In particular, no attempt was made to cover all of the practical applications. They appear as examples following concentrated explanations of basic phenomena. As in several branches of technology, the solutions of problems arising in the field of electric contacts involve insight into various disciplines of physics. It is felt that reviews of some of those topics, especially adapted to electric contact phenomena, are welcome to many readers. For example, chapters have been devoted to the structure of carbon, the band theory of electric conduction in solids, certain problems in statistics, and the theory of the electric arc. As regards arc problems, new ideas have been introduced. In order to make the main text less cumbersome, such reviews are presented as appendices. Throughout this edition, the MKSA-unit system is used in accord with the latest recommendation for standardization of units in scientific and technical writings. The chapter *History of Early Investigations on Contacts* forming Part IV in the preceding edition of 1958 has not been repeated in this book.

Book 13. «All Extraterrestrial Contacts» Oris Oris, 1999-01-01 In today's world there is a lot of information about UFOs, about the meetings of individuals and even whole governments with aliens, as well as materials of telepathic Contacts with representatives of various extraterrestrial civilizations, etc. Unfortunately this information, while passing through different dimensions to us, in our three-dimensional world, is often subject to very strong distortions and is very often misunderstood by us due to the specifics of our three-dimensional way of thinking. Offered to you materials of Oris's Contacts with the commanders and crew members of the Sirius-A and Sirius-B starships, as well as with other extraterrestrial Consciousnesses and Civilizations, including the Consciousness of Christ, Lord Maitreya, God of the Sun (the Logos of our Solar System), Elohim (the Creators of our Universe), and the four Archangels (Michael, Uriel, Gabriel and Metatron), are unique because they are literally received «first-hand» and contain very valuable information, useful for all humanity, which lives on the eve of the Transfiguration of the Earth. The Pleiadians and Sirians, who are the true spiritual Teachers of Earth's humanity, are happy to share with us the knowledge without which we earthlings cannot emerge from the endless series of earthly incarnations and join as equals the extraterrestrial civilizations that are part of the «Commonwealth of the Light Ring» on the expanses of Cosmic and Galactic Creativity. About this and much more you can learn from this book series called «Extraterrestrial Contacts».

Contacts, Opportunities, and Criminal Enterprise Carlo Morselli, 2005-01-01 In *Contacts, Opportunities, and Criminal Enterprise*, Carlo Morselli examines how business-oriented criminals who have personal networks designed to promote high numbers of diverse contacts achieve and maintain competitive advantages in their earning activities and overall criminal careers.

Electronic Structure of Metal-Semiconductor Contacts Winfried Mönch, 2012-12-06 Interface and surface science have been important in the development of semiconductor physics right from the beginning on. Modern device concepts are not only based on p-n junctions, which are interfaces between regions containing different types of dopants, but take advantage of the electronic properties of semiconductor insulator interfaces, heterojunctions between distinct semiconductors, and metal semiconductor contacts. The latter ones stood almost at the very beginning of semi

conductor physics at the end of the last century. The rectifying properties of metal-semiconductor contacts were first described by Braun in 1874. A physically correct explanation of unilateral conduction, as this deviation from Ohm's law was called, could not be given at that time. A prerequisite was Wilson's quantum theory of electronic semi-conductors which he published in 1931. A few years later, in 1938, Schottky finally explained the rectification at metal-semiconductor contacts by a space-

Contacts and Contrasts in Educational Contexts and Translation Barbara Lewandowska-Tomaszczyk, 2019-01-05 This volume covers descriptions and interpretations of social and cognitive phenomena and processes which emerge at the interface of languages and cultures in educational and translation contexts. It contains eleven papers, divided into two parts, which focus respectively on the issues of language and culture acquisition and a variety of translation practices (general language, literature, music translation) from socio-cultural and cognitive perspectives.

Contacts of Languages and Peoples in the Hittite and Post-Hittite World Federico Giusfredi, Valerio Pisaniello, Alvise Matessi, 2023-07-03 Ever since the early 2nd millennium BCE, Pre-Classical Anatolia has been a crossroads of languages and peoples. Indo-European peoples - Hittites, Luwians, Palaeans - and non-Indo-European ones - Hattians, but also Assyrians and Hurrians - coexisted with each other for extended periods of time during the Bronze Age, a cohabitation that left important traces in the languages they spoke and in the texts they wrote. By combining, in an

interdisciplinary fashion, the complementary approaches of linguistics, history, and philology, this book offers a comprehensive, state-of-the-art study of linguistic and cultural contacts in a region that is often described as the bridge between the East and the West. With contributions by Paola Cotticelli-Kurras, Alfredo Rizza, Maurizio Viano, and Ilya Yakubovich.
