Manatee Blues #4 Laurie Halse Anderson,2008-02-28 Dr. Mac has brought Brenna, Maggie, and Zoe to Florida to visit her friend Gretchen, a marine biologist who runs a manatee rescue center that's in desperate need of money. Consider the Platypus Maggie Ryan Sandford,2019-08-27 Interested in the origins of the species? Consider the Platypus uses pets such as dogs and cats as well as animal outliers like the axolotl and naked mole rat to wittily tackle mind-bending concepts about how evolution, biology, and genetics work. Consider the Platypus explores the history and features of more than 50 animals to provide insight into our current understanding of evolution. Using Darwin's theory as a springboard, Maggie Ryan Sandford details scientists' initial understanding of the development of creatures and how that has expanded in the wake of genetic sequencing, including the: Peppered Moth, which changed color based on the amount of soot in the London air; California Two-Spotted Octopus, which has the amazing ability to alter its DNA/RNA not over generations but during its lifetime; miniscule tardigrade, which is so hearty it can withstand radiation, lack of water and oxygen, and temperatures as low as -328°F and as high 304 °F; and, of course, the platypus, which has so many disparate features, from a duck's bill to venomous spur to mammary patches, that scientists originally thought it was a hoax.

Surprising, witty, and impeccably researched, Sanford describes each animal's significant features and how these have adapted to its environment, such as the zebra finch's beak shape, which was observed by Charles Darwin and is a cornerstone of his Theory of Evolution. With scientifically accurate but charming art by Rodica Prato, *Consider the Platypus* showcases species as diverse as the sloth, honey bee, cow, brown kiwi, and lungfish, to name a few, to tackle intimidating concepts in an accessible way.

Wild at Heart Laurie Halse Anderson, Wayne Lynch, 2002 *Wild at Heart*, an exciting and informative fiction series from American Girl, shares the stories of five very different young people, all of whom have a passion for pets. Brenna, Zoe, David, Magie, and Sunita are volunteer workers at a veterinary clinic called Wild at Heart. Their experiences at the clinic tug at their hearts, test their beliefs, and, sometimes, put their lives in danger. Along the way, they witness the routines and challenges of veterinarians and learn how to care for cats, dogs, birds, horses, and even wild animals. They also share the challenges of their preteen years—school, parents, friends, and responsibility and compassion that grows as they do.

Both Sides Now Peyton Thomas, 2021-08-24 A witty and warm-hearted novel about a trans teen finding his place in the world perfect for fans of *Red, White and Royal Blue* There's only one thing standing between Finch Kelly and a full-blown case of high school senioritis: the National Speech & Debate Tournament. Taking home the gold would not only be the pinnacle of Finch's debating career, but the perfect way to launch himself into his next chapter: college in Washington, DC, and a history-making career as the first trans congressman. What could possibly go wrong? Well, for starters, Finch could develop a teeny tiny crush on his very attractive, very taken, and very gay debate partner, Jonah. Never mind that Finch has never considered whether he's interested in more than just girls. And that dream of college in DC? Finch hasn't exactly been accepted anywhere yet, let alone received the full-ride scholarship he'll need to make this dream a reality. Worst of all, though, is this year's topic for Nationals: transgender rights. If he wants to cinch the gold, and get into college, Finch might have to argue against his own humanity. People say there are two sides to every argument. But, as Finch is

about to discover, some things—like who you are and who you love—are not up for debate.
