**Emergency!** Richard Yokley, Rozane Sutherland, 2007-05 The hit television show that helped revolutionize emergency medical care in the streets is still a favorite with fans all over the world. When the show premiered in 1972 fire department paramedic services were being piloted in just a handful of cities. By 1977 over 50% of the US population was within 10 minutes of a paramedic unit. The paramedics of Fire Station 51 showed viewers critical techniques such as CPR that saved lives both on screen and off. *Emergency! Behind the Scene* contains real life tales from the production crew - from medical and fire technical advisors, cast members and writer, to paramedics and fire fighters. Learn more about Johnny Gage, Roy DeSoto, Dixie McCall and the rest of the Station 51 Rampart General Hospital staff. If you are a fire fighter, paramedic or simply a fan you will enjoy this in depth look behind the scenes.

**Reading Sounds** Sean Zdenek, 2015-12-23 The work of writing closed captions for television and DVD is not simply transcribing dialogue, as one might assume at first, but consists largely of making rhetorical choices. For Sean Zdenek, when captioners describe a sound they are interpreting and creating contexts, they are assigning significance, they are creating meaning that doesn't necessarily exist in the soundtrack or the script. And in nine chapters he analyzes the numerous complex rhetorical choices captioners make, from abbreviating dialogue so it will fit on the screen and keep pace with the editing, to whether and how to describe background sounds, accents, or slurred speech, to nonlinguistic forms of sound communication such as sighing, screaming, or laughing, to describing music, captioned silences (as when a continuous noise suddenly stops), and sarcasm, surprise, and other forms of meaning associated with vocal tone. Throughout, he also looks at closed captioning style manuals and draws on interviews with professional captioners and hearing-impaired viewers. Threading through all this is the

novel argument that closed captions can be viewed as texts worthy of rhetorical analysis and that this analysis can lead the entertainment industry to better standards and practices for closed captioning, thereby better serve the needs of hearing-impaired viewers. The author also looks ahead to the work yet to be done in bringing better captioning practices to videos on the Internet, where captioning can take on additional functions such as enhancing searchability. While scholarly work has been done on captioning from a legal perspective, from a historical perspective, and from a technical perspective, no one has ever done what Zdenek does here, and the original analytical models he offers are richly interdisciplinary, drawing on work from the fields of technical communication, rhetoric, media studies, and disability studies.

Written for an industry in perpetual motion, *Digital Radio Production* takes a holistic approach and prepares students to join the business of radio in both large and small markets and across multiple digital platforms. The author shares his 20 years of experience and invaluable insights into radio production, communication, and promotion. The potential of developing technologies like artificial intelligence and voice cloning and their impacts on the world of radio and the professionals who work in it cannot be ignored. In the fourth edition these topics are discussed, along with how and what people listen to on the radio in the twenty-first century. A new chapter on podcasting explores the development of podcasts, as well as the preplanning and equipment needed to create an episode. The flexibility of today's digital consoles, audio processing software, and delivery formats create more opportunities for creativity and growth in the industry. Fully updated, the text enhances students' technical skills and knowledge of digital audio recording and transmission. Each chapter features suggested activities outside the classroom, key informative websites, and a glossary of industry terms. The text is accompanied by over 80 audio examples of virtually every aspect of radio production (from microphone techniques to commercial production samples), an outstanding selection of

production music that can be creatively reworked and transformed, and a custom studio-tracking session with suggested activities. [To download the audio and music demo cuts, click here.](#)

**Someone Has to Pluck the Chicken / Someone Gets to Sound the Alarm** Vern Duane Porter,2009-07-16 Let me take you back in time to simpler days when my fourth great-grandfather ran around with Daniel Boone. Some of your stereotypes may be challenged when I describe an orphaned Indian boy brought to my fifth great-grandfather by Chief Logan at the boys request so that he could be raised by whites in order to become a minister of the gospel. You will learn much about early 1900s farm life. My wifes stepfather was from the mining

country in the Idaho panhandle, so I will take you deep down below the surface looking for the ore body. Some of my relatives worked in the open-pit iron mines of northern Minnesota, so they will get some attention. After we had moved to California, we eventually bought a small house on a large enough lot to have a few chickens. When Mom wanted to have fried chicken ready for supper when Dad got home, it was up to me to chop its head off and, with Moms help, pluck it. Thus I learned that someone has to pluck the chicken, and I grew up with a respect for the country work ethic and the ingenuity of the American farmer. My exposure to the diverse cultures of Minnesota farmland and suburban California presented me with a view of the winds of cultural change blowing across the country, which were bringing a demand for lowering standards of behavior and the lessening of punishment. My comments on the source and susceptibility to the push for change are accompanied by anecdotes from history, and the lives of relatives and my own life experiences. I was in the Deep South during the Reverend Kings marches for civil rights. When the antiwar crowd was breaking windows on the first floor of the chancellors office at UC Berkeley, I was on the second floor servicing a mimeograph machine. The time I spent on high school and grade school campuses opened my eyes to the flow of changing standards in our culture. There will be an effort to describe the pivotal changes in my life and destiny, which I believe came about as the result of prayer, the importance of the Southern Baptist Church in my teenage years, and the Church of Jesus Christ of Latter-day Saints as I became an independent adult. I will also describe the events that led to my leaving the LDS church for twenty-five years and why I came back recently. The challenges of raising a family in a home divided on religious belief will also be covered. On the job, I dared to stand up for the rights of those I supervised to take their breaks. At another company I worked for, I took a stand against corporate greed. It cost me in promotions and raises and eventually resulted in

AmeriGas refusing to recognize the Americans with Disabilities Act for me. Rather than sue them, I decided to leave with a two-year disability and have the California Department of Rehabilitation upgrade my clerical skills so I could get a desk job. The promoters of compassion in this country have succeeded in creating so many categories of disability that it was nearly impossible for this middle-aged white guy to get an entry-level desk job with the State of California. The worsening of my disability and my efforts to overcome it with alternative therapies will be covered in my chapter on health. Its just as well that I wanted to work in spite of my disability. My two-year disability policy required me to apply for a Social Security disability (SSI), so I went to be examined by their doctor. When I walked into the crowded waiting room, I was ushered right in to see the doctor. He explained that the people in the waiting room had to wait for an interpreter, so for that reason alone, they would qualify for SSI. Since I was able to walk in, I would not qualify. I believe in climate change, but it was around long before humankind was here to influence the weather. Over a century ago, at least one scientist determined through an experiment that the concentration of CO2 was already past the point where adding more would increase global warming. The global w

**Alarm Systems and Theft Prevention** Thad L.

Weber,2016-06-06 Alarm Systems and Theft Prevention, Second Edition, recounts the sometimes sad, sometimes humorous, and nearly always unfortunate experiences of manufacturers, distributors, retailers, and individuals who have lost valuable merchandise, money, jewelry, or securities to criminal attacks. In most cases the losses occurred because there was a weak link: a vulnerability in the total security defense. The book presents in practical terms those weaknesses in physical security, alarm systems, or related security procedures that, when blended

together, result in vulnerability. In addition to analyzing these cases and identifying the key elements of vulnerability, remedies for curing the weakness are also offered. Other sections of this book deal with the application, strengths, and limitations of security equipment. For the most part, equipment is presented from the practical viewpoint—what a security device or system will do (or not do) and how it should be applied and operated, rather than the detail of mechanical design, electrical circuitry, or laboratory theories. This book is written in layman's language and is intended to be read by people who supply, use, or need security services and equipment.

**On the Air** John Dunning, 1998-05-07 Now long out of print, John Dunning's *Tune in Yesterday* was the definitive one-volume reference on old-time radio broadcasting. Now, in *On the Air*, Dunning has completely rethought this classic work, reorganizing the material and doubling its coverage, to provide a richer and more informative account of radio's golden age. Here are some 1,500 radio shows presented in alphabetical order. The great programs of the '30s, '40s, and '50s are all here--Amos 'n' Andy, Fibber McGee and Molly, The Lone Ranger, Major Bowes' Original Amateur Hour, and The March of Time, to name only a few. For each, Dunning provides a complete broadcast history, with the timeslot, the network, and the name of the show's advertisers. He also lists major cast members, announcers, producers, directors, writers, and sound effects people--even the show's theme song. There are also umbrella entries, such as News Broadcasts, which features an engaging essay on radio news, with capsule biographies of major broadcasters, such as Lowell Thomas and Edward R. Murrow. Equally important, Dunning provides a fascinating account of each program, taking us behind the scenes to capture the feel of the performance, such as the ghastly sounds of *Lights Out* (a horror drama where heads rolled and bones crunched), and providing engrossing biographies of the main people involved in the show. A wonderful

read for everyone who loves old-time radio, *On the Air* is a must purchase for all radio hobbyists and anyone interested in 20th-century American history. It is an essential reference work for libraries and radio stations.

**Human Factors in Auditory Warnings** Judy

Edworthy, Neville A. Stanton, 2019-01-15 First published in 1999, this book provides answers to many of the problems associated with the design and application of auditory warnings. It represents the position of contemporary auditory warnings research and development in a single unique volume. Application domains include air traffic control, aviation, emergency services, manufacturing, medicine, military and nuclear power. The contributors constitute many key experts in this area, some of whom are psychoacousticians, some psychologists and some ergonomists. Correspondingly, the chapters range from those covering basic topics such as audibility and localization of warnings, through psychological issues concerned with the relationship between design, understanding and the behavioural response, to the more general ergonomic issues of implementing the warnings in a particular context. Although each of the chapters takes a slightly different perspective, they all balance theoretical underpinning with practical application. The editors have undertaken to draw all of the contributions together by providing an overview of warnings research at the beginning of the book and summary of the contributions at the end. This book will appeal to all involved in the research, development, design and implementation of auditory warnings.
