**Assessing agricultural innovation systems for action at country level** Food and Agriculture Organization of the United Nations, 2022-03-15 Since 2017, in line with COAG's recommendation, the Research and Extension Unit engaged in the development of a participatory AIS assessment framework including a customizable toolbox for countries with a totally new capacity development perspective. The assessment framework is meant for actors of the national agricultural innovation systems, i.e. research, extension and advisory services, innovation support service providers and universities, policy and decision makers, or development organizations, with a mandate or willingness to catalyze system innovation processes and to identify entry points for developing capacities to innovate in a sector, a value chain, a territory or at country level. The expected outputs and outcomes of the assessment are: a) to inform and provide evidence-based practical guidance to policy and decision makers to identify concrete actions and investments geared towards strengthening of the AIS, and simultaneously b) to enhance capacities of relevant actors to effectively engage in these actions. Considering high level of complexity and diversity of agricultural innovation systems and CD needs, the assessment implementers need to be guided to collect and analyze quantitative and qualitative data and information to generate evidence for assisting decision-making and advocacy in their specific context. To meet these objectives, a preliminary assessment framework was developed to be

tested and enriched by pilot countries. This document provides the key concepts, the foundations of analytical and operational assessment frameworks and guiding principles for country assessment teams in piloting countries. It contributes to FAO's Strategic Objective 2 - Increase and improve provision of goods and services from agriculture, forestry and fisheries in a sustainable manner.

China Satellite Navigation Conference (CSNC) 2012 Proceedings Jiadong Sun, Jingnan Liu, Yuanxi Yang, Shiwei Fan, 2012-04-02 Proceedings of the 3rd China Satellite Navigation Conference (CSNC2012) presents selected research papers from CSNC2012, held on 15-19 May in Guanzhou, China. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS), and the latest progress made in the China BeiDou system especially. They are divided into 9 topics to match the corresponding sessions in CSNC2012, which broadly covered key topics in GNSS. Readers can learn about the BeiDou system and keep abreast of the latest advances in GNSS techniques and applications. SUN Jiadong is the Chief Designer of the Compass/BeiDou system, and the Academician of Chinese Academy of Sciences; LIU Jingnan is a professor at Wuhan University, and the Academician of Chinese Academy of Engineering; YANG Yuanxi is a professor at China National Administration of GNSS and Applications, and the Academician of Chinese Academy of Sciences; FAN Shiwei is a researcher on satellite navigation.

**Petroleum Geology of the Black Sea** M.D. Simmons,G.C. Tari,A.I.

Okay,2018-08-14 The Black Sea remains one of the largest underexplored rift basins in the world. Future success is dependent on a better understanding of a number of geological uncertainties. These include reservoir and source rock presence and quality, and the timing of migration of hydrocarbons relative to trap formation. An appreciation of the geological history of the Black Sea basins and the surrounding orogens is therefore key. The timing of basin formation, uplift of the margins, and of facies distribution remain issues for robust debate. This Special Publication presents the results of 15 studies that relate to the tectono-stratigraphy and petroleum geology of the Black Sea. The methodologies of these studies encompass crustal structure, geodynamic evolution, stratigraphy and its regional correlation, petroleum systems, source to sink, hydrocarbon habitat and play concepts, and reviews of past exploration. They provide insight into the many ongoing controversies concerning Black Sea regional geology and provide a better understanding of the geological risks that must be considered for future hydrocarbon exploration.

**Handbook of Sepsis** W. Joost Wiersinga,Christopher W. Seymour,2018-04-13

This practically oriented book provides an up-to-date overview of all significant aspects of the pathogenesis of sepsis and its management,

including within the intensive care unit. Readers will find information on the involvement of the coagulation and endocrine systems during sepsis and on the use of biomarkers to diagnose sepsis and allow early intervention. International clinical practice guidelines for the management of sepsis are presented, and individual chapters focus on aspects such as fluid resuscitation, vasopressor therapy, response to multiorgan failure, antimicrobial therapy, and adjunctive immunotherapy. The closing section looks forward to the coming decade, discussing novel trial designs, sepsis in low- and middle-income countries, and emerging management approaches. The book is international in scope, with contributions from leading experts worldwide. It will be of value to residents and professionals/practitioners in the fields of infectious diseases and internal medicine, as well as to GPs and medical students.

**Abdominal Sepsis** Massimo Sartelli, Matteo Bassetti, Ignacio Martin-Loeches, 2018-03-20 This book examines in detail the topic of sepsis, with a focus on intra-abdominal sepsis. Particular attention is devoted to source control in the management of the infection, antimicrobial therapy and sepsis support, which represent the cornerstones of treating patients with this problem. The importance of a multidisciplinary approach is highlighted not only by the instructive and informative sections on the acute manifestations of appendicitis, cholecystitis, and cholangitis, perforations and diverticulitis, *Clostridium difficile* infection and the role of candida in

abdominal sepsis, but also by an extensive discussion of issues including antimicrobial resistance, damage control surgery, principles of antimicrobial therapy, hemodynamic support, adjunctive therapies, and thromboprophylaxis. Abdominal sepsis is the host's systemic inflammatory response to intra-abdominal infections. It is associated with significant morbidity and mortality rates, and represents the second most common cause of sepsis-related mortality at intensive care units. Gathering contributions by authoritative experts from all around the world, this book will allow acute care surgeons, abdominal surgeons, intensive care clinicians, and students to broaden their understanding of intra-abdominal sepsis in daily clinical practice.

Global Value Chains and Global Production Networks Jeffrey Neilson, Bill Pritchard, Henry Yeung Wai-Chung, 2017-10-02 The global economic system is experiencing a profound period of rapid change. The emergence of globalised production and distribution systems, which bring together diverse constellations of economic actors through a complex regime of global corporate governance, state regulation and new international divisions of labour, demands corresponding and innovative explanatory models. Global value chains (GVCs) and global production networks (GPNs) have been particularly useful as conceptual frameworks for understanding the global market engagement of firms, regions and nations. This book examines the rise of GVCs and GPNs as dominant features of the international political economy. It

brings together leading thinkers in the field and sets out new directions for future scholarship in understanding the contemporary global economic system. In doing so, this book makes a significant contribution to our understanding of the international political economy and the global economic system in the post-Washington Consensus era of contemporary capitalism. This book was published as a special issue of the Review of International Political Economy.

**The Palgrave Encyclopedia of Global Security Studies** ,2023-02-15 This encyclopedia provides an authoritative guide intended for students of all levels of studies, offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non-traditional Security, and their relation to other scholarly fields and aspects of real-world issues in the contemporary geopolitical world.

*The Routledge Handbook of Responsible Investment* Tessa Hebb,James P. Hawley,Andreas G.F. Hoepner,Agnes L. Neher,David Wood,2015-08-11 The UN-supported Principles for Responsible Investment initiative has led to around a third of the world's financial assets being managed with a commitment to invest in a way that considers environmental, social or governance (ESG) criteria. The responsible investment trend has increased dramatically since the global financial crisis, yet understanding of this field remains at an early stage. This handbook provides an atlas of current practice in the field of responsible investment. With a large global team of expert contributors,

the book explores the impact of responsible investment on key financial actors ranging from mainstream asset managers to religious organizations. Offering students and researchers a comprehensive introduction to current scholarship and international structures in the expanding discipline of responsible investment, this handbook is vital reading across the fields of finance, economics and accounting.

**Education, Dominance and Identity** Diane B. Napier, Suzanne Majhanovich, 2013-02-11 This volume is a collection of research cases illustrating the interrelationships among education, dominance and identity in historical- and contemporary contexts. The cases reflect particular ways in which local-, group, and indigenous identities have been affected by a dominant discourse, how education can support or undermine identity, and how languages (including dominant and sub-dominant languages) and the language of instruction in schools are at the centre of challenges to hegemony and domination in many situations. Examining the issues in their research, the contributors reveal how members of minority-, disadvantaged-, or dominated groups (and the teachers and parents of children in their schools) struggle for recognition, for education in their own language, for acceptance within larger society, or for recognition of the validity of their responses to reform initiatives and policies that address a wider agenda but that fail to take into account key factors such as perceptions and subaltern status. Collectively, the chapters document research employing a variety of

methodological approaches and theoretical perspectives, illustrating an array of universal and global issues in the field of comparative and international education. However, each of the cases its own unique character, as research findings and as personal reflections based on the authors' experiential knowledge in particular social, cultural and political contexts. The contexts and regional settings include Chile, Canada, the United States, Hungary and elsewhere in East-Central Europe, France, Germany, Spain, Malaysia, Tanzania, South Africa, Cyprus, Tunisia, Egypt, Iran and elsewhere in the Middle East.

**Global Assessment Report on Disaster Risk Reduction 2013** United Nations, 2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction (UNISDR). The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction. This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales. It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks. This report seeks to engage businesses in a dialogue on disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society.

**Big Data in Complex and Social Networks** My T. Thai, Weili Wu, Hui Xiong, 2016-12-01 This book presents recent developments on the theoretical, algorithmic, and application aspects of Big Data in Complex and Social

Networks. The book consists of four parts, covering a wide range of topics. The first part of the book focuses on data storage and data processing. It explores how the efficient storage of data can fundamentally support intensive data access and queries, which enables sophisticated analysis. It also looks at how data processing and visualization help to communicate information clearly and efficiently. The second part of the book is devoted to the extraction of essential information and the prediction of web content. The book shows how Big Data analysis can be used to understand the interests, location, and search history of users and provide more accurate predictions of User Behavior. The latter two parts of the book cover the protection of privacy and security, and emergent applications of big data and social networks. It analyzes how to model rumor diffusion, identify misinformation from massive data, and design intervention strategies. Applications of big data and social networks in multilayer networks and multiparty systems are also covered in-depth.

Textbook of Post-ICU Medicine: The Legacy of Critical Care Robert D. Stevens, Nicholas Hart, Margaret S. Herridge, 2014-05-29 Surviving critical illness is not always the happy ending we imagine for patients. Many ICU survivors suffer from a range of long-lasting physical and psychological issues such end stage renal disease, congestive heart failure, cognitive impairment, neuromuscular weakness, and depression or anxiety, which affect their overall quality of life and ability to lead productive lives. This

lingering burden or 'legacy' of critical illness is now recognized as a major public health issue, with major efforts underway to understand how it can be prevented, mitigated, or treated. The Textbook of Post-ICU Medicine: The Legacy of Critical Care discusses the science of the recovery process and the innovative treatment regimens which are helping ICU survivors regain function as they heal following trauma or disease. Describing the major clinical syndromes affecting ICU survivors, the book delineates established or postulated biological mechanisms of the post-acute recovery process, and discusses strategies for treatment and rehabilitation to promote recovery in the ICU and in the long term. The chapters are written by an interdisciplinary panel of leading clinicians and researchers working in the field. The book serves as a unique reference for general practitioners, internists and nurses caring for long term ICU survivors as well as specialists in intensive care medicine, neurology, psychiatry, and rehabilitation medicine.

Ecologically Unequal Exchange R. Scott Frey, Paul K. Gellert, Harry F. Dahms, 2018-07-04 At a time of societal urgency surrounding ecological crises from depleted fisheries to mineral extraction and potential pathways towards environmental and ecological justice, this book re-examines ecologically unequal exchange (EUE) from a historical and comparative perspective. The theory of ecologically unequal exchange posits that core or northern consumption and capital accumulation is based on peripheral or southern

environmental degradation and extraction. In other words, structures of social and environmental inequality between the Global North and Global South are founded in the extraction of materials from, as well as displacement of waste to, the South. This volume represents a set of tightly interlinked papers with the aim to assess ecologically unequal exchange and to move it forward. Chapters are organised into three main sections: theoretical foundations and critical reflections on ecologically unequal exchange; empirical research on mining, deforestation, fisheries, and the like; and strategies for responding to the adverse consequences associated with unequal ecological exchange. Scholars as well as advanced undergraduate and graduate students will benefit from the spirited re-evaluation and extension of ecologically unequal exchange theory, research, and praxis.

International Cooperation in Competition Law Matters Anton Godt, 2022 The study outlines the status quo of international cooperation in competition law matters. This is done by examining, in chronological order, the various approaches of the many multi- and bi-lateral international agreements that have attempted to solve the problems of competition law (WTO, GATT, etc.). Subsequently, the focus of this thesis is on the analysis of bilateral trade agreements. Within the framework of this analysis, the potential of trade agreements for competition law cooperation is to be shown. For this reason, only those bilateral trade agreements are analyzed that deal with the topic of regulatory cooperation in competition law in specially provided

competition chapters. In doing so, the different stages of cooperation will be analyzed along the different integration phases of any trade agreements. The highest form of trade agreement integration – customs unions – will be dealt with separately, using the EU as an example.
