Bridging the Sino-American Divide Mei Renyi, 2009-05-27 Within China, the discipline of American Studies spans a wide variety of concerns and preoccupations, reflecting its practical diversity in a transnational setting. Essays in this volume by close to forty scholars, the majority most of them based in mainland China, reflect on the past history and current teaching of American Studies within China, placing these in comparative perspectives. The nature of globalization, the transmission of ideas and practices across cultural boundaries, the formulation and meaning of identity in cross-national communications, constitute major themes in contemporary American Studies in China. For officials and commentators alike, the past, present, and future state of Sino-American relations are also an overriding preoccupation of China's America-watchers. Overall, this collection allows the reader to sample and appreciate the state of the field of American Studies in today's China.

The Case for Marriage Linda Waite, Maggie Gallagher, 2002-03-05 A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced—physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. Bennett, author of The Book of Virtues "Makes the absolutely critical point that marriage has been misrepresented and misunderstood." -- The Wall Street Journal www.broadwaybooks.com

Building Shanghai Edward Denison, Guang Yu Ren, 2013-12-20 Shanghai's illustrious history and phenomenal future is celebrated in this book, which examines the evolution of the city's architecture and urban form in order to contextualise the challenges facing the city today. The physical legacies that reflect Shanghai's uniqueness historically and contemporarily are examined chronologically using specific case studies of exemplary architecture interwoven in a compelling narrative that unlocks the many mysteries surrounding this amazing metropolis. Some of the most influential colonial architecture in the world, outstanding examples of Modernism and Art Deco, and an exceptional selection of eclectic and vernacular architecture reflecting Shanghai's many adopted cultures are revealed. This is the first book ever to examine this remarkable subject in a manner that is both comprehensive and captivating in its written content and stunningly illustrated with over 300 archive and contemporary photographs and maps.

How to Read Chinese Poetry Zong-qi Cai, 2008 In this guided anthology, experts lead students through the major genres and eras of Chinese poetry from antiquity to the modern time. The volume is divided into 6 chronological sections and features more than 140 examples of the best shi, sao, fu, ci, and qu poems. A comprehensive introduction and extensive thematic table of contents highlight the thematic, formal, and prosodic features of Chinese poetry, and each chapter is written by a scholar who specializes in a particular period or genre. Poems are presented in Chinese and English and are accompanied by a tone-marked romanized version, an explanation of Chinese linguistic and poetic conventions, and recommended reading strategies. Sound recordings of the poems are available online free of charge. These unique features facilitate an intense engagement with Chinese poetical texts and help the reader derive aesthetic pleasure and insight from these works as one could from the original. The companion volume How to Read Chinese Poetry Workbook presents 100 famous poems (56 are new selections) in Chinese, English, and romanization, accompanied by prose translation, textual notes, commentaries, and recordings. Bringing the World Home Theodore Hutters, 2017-04-01 Bringing the World Home sheds new light on China's vibrant cultural life between 1895 and 1919—a crucial period that marks a watershed between the conservative old regime and the ostensibly iconoclastic New Culture of the 1920s. Although generally overlooked in the effort to understand modern Chinese history, the era has

much to teach us about cultural accommodation and is characterized by its own unique intellectual life. This original and probing work traces the most significant strands of the new post-1895 discourse, concentrating on the anxieties inherent in a complicated process of cultural transformation. It focuses principally on how the need to accommodate the West was reflected in such landmark novels of the period as Wu Jianren's *Strange Events Eyewitnessed in the Past Twenty Years* and Zhu Shouju's *Tides of the Huangpu*, which began serial publication in Shanghai in 1916. The negative tone of these narratives contrasts sharply with the facile optimism that characterizes the many essays on the New Novel appearing in the popular press of the time. Neither iconoclasm nor the wholesale embrace of the new could square the contradicting intellectual demands imposed by the momentous alternatives presenting themselves. Intrinsically Disordered Proteins Vladimir N. Uversky, 2014-08-05 In this brief, Vladimir Uversky discusses the paradigm-shifting phenomenon of intrinsically disordered proteins (IDPs) and hybrid proteins containing ordered domains and functional IDP regions (IDPRs). Beginning with an introduction to the concept of protein intrinsic disorder, Uversky then goes on to describe the peculiar amino acid sequences of IDPs, their structural

heterogeneity, typical functions and disorder-based binding modes. In the final sections, Uversky discusses IDPs in human diseases and as potential drug targets. This volume provides a snapshot to researchers entering the field as well as providing a current overview for more experienced scientists in related areas.

Notes of a Desolate Man T'ien-wen Chu, 1999-05-06 Winner of the coveted China Times Novel Prize, this postmodern, first-person tale of a contemporary Taiwanese gay man reflecting on his life, loves, and intellectual influences is among the most important recent novels in Taiwan. The narrator, Xiao Shao, recollects a series of friends and lovers, as he watches his childhood friend, Ah Yao, succumb to complications from AIDS. The brute fact of Ah Yao's death focuses Shao's simultaneously erudite and erotic reflections magnetically on the core theme of mortality. By turns humorous and despondent, the narrator struggles to come to terms with Ah Yao's risky lifestyle, radical political activism, and eventual death; the fragility of romantic love; the awesome power of eros; the solace of writing; the cold ennui of a younger generation enthralled only by video games; and life on the edge of mainstream Taiwanese society. His feverish journey through forests of metaphor and allusion—from Fellini and Lévi-Strauss to classical Chinese poetry—serves as a litany protecting him from the ravages of time and finitude. Impressive in scope and detail, *Notes of a Desolate Man* employs the motif of its characters' marginalized sexuality to highlight Taiwan's vivid and fragile existence on the periphery of mainland China. Howard Goldblatt and Sylvia Li-chun Lin's masterful translation brings Chu T'ien-wen's lyrical and inventive pastiche of political, poetic, and sexual desire to the English-speaking world.

Food Safety Culture Frank Yiannas, 2008-12-10 Food safety awareness is at an all time high, new and emerging threats to the food supply are being recognized, and consumers are eating more and more meals prepared outside of the home. Accordingly, retail and foodservice establishments, as well as food producers at all levels of the food production chain, have a growing responsibility to ensure that proper food safety and sanitation practices are followed, thereby, safeguarding the health of their guests and customers. Achieving food safety success in this changing environment requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of organizational culture and the human dimensions of food safety. To improve the food safety performance of a retail or foodservice establishment, an organization with thousands of employees, or a local community, you must change the way people do things. You must change their behavior. In fact, simply put, food safety equals behavior. When viewed from these lenses, one of the most common contributing causes of food borne disease is unsafe behavior (such as improper hand washing, cross-contamination, or undercooking food). Thus, to improve food safety, we need to better integrate food science with behavioral science and use a systems-based approach to managing food safety risk. The importance of organizational culture, human behavior, and systems thinking is well

documented in the occupational safety and health fields. However, significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety.
