The Challenges of the Digital Transformation in Education Michael E. Auer, Thrasy voulos Tsiatsos, 2019-02-28 This book offers the latest research and new perspectives on Interactive Collaborative Learning and Engineering Pedagogy. We are currently witnessing a significant transformation in education, and in order to face today's real-world challenges, higher education has to find innovative ways to quickly respond to these new needs. Addressing these aspects was the chief aim of the 21st International Conference on Interactive Collaborative Learning (ICL2018), which was held on Kos Island, Greece from September 25 to 28, 2018. Since being founded in 1998, the conference has been devoted to new approaches in learning, with a special focus on collaborative learning. Today the ICL conferences offer a forum for exchanging information on relevant trends and research results, as well as sharing practical experiences in learning and engineering pedagogy. This book includes papers in the fields of: \* New Learning Models and Applications \* Pilot Projects: Applications \* Project-based Learning \* Real-world Experiences \* Remote and Virtual Laboratories \* Research in Engineering Pedagogy \* Technical Teacher Training It will benefit a broad readership, including policymakers, educators, researchers in pedagogy and learning theory, school teachers, the learning industry, further education lecturers, etc.

<u>Disney Gothic</u> Lorna Piatti-Farnell, Jeffrey Andrew Weinstock, 2024-04-24 In this edited collection exploring Disney's dark side, attention to Disney's Gothic reveals the ways through which Disney productions construct and reinforce conceptions of normalcy and deviance in relation to shifting understandings of morality, social roles, and identity categories.

Dance Data, Cognition, and Multimodal Communication Carla Fernandes, Vito Evola, Cláudia Ribeiro, 2022-09-08 Dance Data, Cognition, and Multimodal Communication is the result of a collaborative and transdisciplinary effort towards a first definition of dance data, with its complexities and contradictions, in a time where cognitive science is growing in parallel to the need of a renewed awareness of the body's agency in our manyfold interactions with the world. It is a reflection on the observation of bodily movements in artistic settings, and one that views human social interactions, multimodal communication, and cognitive processes through a different lens—that of the close collaboration between performing artists, designers, and scholars. This collection focuses simultaneously on methods and technologies for creating, documenting, or representing dance data. The editors highlight works focusing on the dancers' embodied minds, including research using neural, cognitive, behavioural, and linguistic data in the context of dance composition processes. Each chapter deals with dance data from an interdisciplinary perspective, presenting theoretical and methodological discussions emerging from empirical studies, as well as more experimental ones. The book, which includes digital Support Material on the volume's Routledge website, will be of

great interest to students and scholars in contemporary dance, neuro-cognitive science, intangible cultural heritage, performing arts, cognitive linguistics, embodiment, design, new media, and creativity studies.
