It offers detailed, fully updated sailing directions for almost all the important harbours and anchorages, many of which are documented here for the first time. Applied Bioelectricity J. Patrick Reilly, 2012-12-06 Electric currents and electromagnetic fields have been applied to biological systems, particularly humans, with both therapeutic and pathological results. This text discusses biological responses to electric currents and electromagnetic fields, including medical applications and shock hazards. It covers fundamental physical and engineering principles of responses to short-term electrical exposure and emphasises human reactions, although animal responses are considered as well, and the treatment covers reactions from the just-detectable to the clearly detrimental. An important new chapter discusses standards for human exposure to electromagnetic fields and electric current and demonstrates how these standards have been developed using the principles treated in earlier chapters.

Enhancing Water Use Efficiency in Korea Organisation for Economic Co-operation and Development, 2017 The report, building on a policy dialogue with a range of stakeholders in Korea, analyses how economic policy instruments under the responsibility of the Korean Ministry of Land, Infrastructure and Transport can be adjusted to contribute to water policy objectives. It also investigates how Smart Water Management Korea, an initiative by K-water that combines information and communication technology with water technology, can be harnessed to better contribute to water management in the country. Finally, it identifies some of the limitations of prevalent water allocation regimes which need to be addressed to make the best use of available water resources. Since 1965, the Korean Government has invested heavily in quantitative development strategies to meet water needs, and despite highly variable water availability, this has allowed for and facilitated rapid urbanisation and economic growth. However, several long-term trends are expected to affect the capacity of the current water management system to adequately respond to current and future water risks, such as rapid ageing of the population, fiscal consolidation and climate change. These call for a renewed emphasis on water use efficiency.

The Cult of St Erik in Medieval Sweden Christian Oertel, 2016 In this first comprehensive monograph on St Erik, the author follows the cult of the Swedish royal saint from its obscure beginnings in the twelfth century up to its climax in the time of the Kalmar Union (1397-1523). The focus of the book lies on the interaction of the cult with different groups within medieval Swedish society and these group's attempts to utilize the prestige of the saint to further their political aims. From the middle of the thirteenth

century, the cult was particularly connected to the archbishopric of Uppsala and the royal dynasty of Bjälbo. During the fifteenth century the Swedish royal saint symbolized (together with St Olaf of Norway and St Knut of Denmark) the three kingdoms of the Kalmar Union. At the same time, his prestige was successfully employed in the propaganda of King Karl Knutsson (Bonde) and the three Sture-riksföreståndare to legitimate their anti-Union politics. In order to gain a broader perspective, the author uses a wide variety of sources. These include a number of texts which contain information about the cult of the saint (legend, miracle collection, offices, sermons, chronicles, charters). In addition, different sorts of depictions showing St Erik on wall paintings, altarpieces, seals, and coins are used in order to give a comprehensive account of the multifaceted veneration of this saint.

The Sanctity of Louis IX Geoffrey of Beaulieu, William of Chartres, 2013-11-29 Louis IX of France reigned as king from 1226 to 1270 and was widely considered an exemplary Christian ruler, renowned for his piety, justice, and charity toward the poor. After his death on crusade, he was proclaimed a saint in 1297, and today Saint Louis is regarded as one of the central figures of early French history and the High Middle Ages. In *The Sanctity of Louis IX*, Larry F. Field offers the first English-language translations of two of the earliest and most important accounts of the king's life: one composed by Geoffrey of Beaulieu, the king's long-time Dominican confessor, and the other by William of Chartres, a secular clerk in Louis's household who eventually joined the Dominican Order himself. Written shortly after Louis's death, these accounts are rich with details and firsthand observations absent from other works, most notably Jean of Joinville's well-known narrative. The introduction by M. Cecilia Gaposchkin and Sean L. Field provides background information on Louis IX and his two biographers, analysis of the historical context of the 1270s, and a thematic introduction to the texts. An appendix traces their manuscript and early printing histories. *The Sanctity of Louis IX* also features translations of Boniface VIII's bull canonizing Louis and of three shorter letters associated with the earliest push for his canonization. It also contains the most detailed analysis of these texts, their authors, and their manuscript traditions currently available.

Byzantium and the Viking World Fedir Oleksandrovysh Androshchuk, Fëdor Androshuk, Jonathan Shepard, Monica White, 2016 This interdisciplinary volume, the first on the subject to appear since 1981, brings together work on subjects as diverse as archaeology, history, art history and literature relating to Byzantium and the Nordic, Baltic and East Slavonic lands between the ninth and thirteenth centuries.

Fighting for the Faith Carsten Selch Jensen, Kurt Villads Jensen, Janus Møller Jensen, 2018 The medieval idea of crusading was formative for Western identity and used for centuries--it actually outlived the Middle Ages and has significant polemical potential even today. Crusading was a multi-layered phenomenon that could be mobilised against a great variety of enemies, in many diverse geographical areas around Latin Western Europe. From Norway to Sicily, from the Western Isles till the Eastern Baltic, the idea of crusading was adopted and adapted to local circumstances. It led to major economic and social re-organization of societies but also to a new acceptance of using warfare and violence for supporting and defending good. Crusading was

promoted everywhere and through all media, including the new printing press from the second half of the 15th century. The present book explores the varieties of crusading in their historical context, and also its use as a metaphor throughout the Middle Ages and afterwards.

The Making of Saint Louis Marianne Cecilia Gaposchkin, 2008 M. Cecilia Gaposchkin reconstructs and analyzes the process that led to King Louis IX of France's canonization in 1297 and the consolidation and spread of his cult.

Ora Pro Nobis Nils Holger Petersen, Mia Münster-Swendsen, Thomas K. Heebøll-Holm, Martin Wangsgaard Jürgensen, 2019 This volume contains sixteen articles by international experts from different disciplines touching on various aspects on medieval and early modern cults of saints from different corners of Europe, with a special focus on Scandinavian saints and their artistic receptions up to modern times. The saints represented different aspects of a Christian world-view forming the basis of communal identities, still present in post-Reformation Europe. Notions of cultural memory underpin several of the studies in the volume. Moreover, the reader will also find articles concerning the function of saints' cults, in particular how the material culture of these cults was perceived and experienced by the medieval beholder. The book includes a recording of music from the Middle Ages up to modern times focusing on saints and the notion of sanctity.
