World Report on Road Traffic Injury Prevention Marjorie Peden, 2008-09 Every day thousands of people are killed and injured on our roads. Millions of people each year will spend long weeks in the hospital after severe crashes and many will never be able to live, work or play as they used to do. Current efforts to address road safety are minimal in comparison to this growing human suffering. This report presents a comprehensive overview of what is known about the magnitude, risk factors and impact of road traffic injuries, and about ways to prevent and lessen the impact of road crashes. Over 100 experts, from all continents and different sectors -- including transport, engineering, health, police, education and civil society -- have worked to produce the report. Charts and tables.

Criminal Liability for Serious Traffic Offences Alwin van Dijk, Hein Wolswijk, 2017-12-17 The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. (Series: Governance & Recht - Vol. 11) [Subject: Criminal Law, Traffic Law, Comparative Law]

Traffic Law Enforcement Dominic Zaal, 1994 A study was undertaken to review the recent Australian and international literature relating to traffic law enforcement. The specific areas examined included alcohol, speed, seat belts and signalised intersections. The review documents the types of traffic enforcement methods and the range of options available to policing authorities to increase the overall efficiency (in terms of cost and human resources) and effectiveness of enforcement operations. The review examines many of the issues related to traffic law enforcement including the deterrence mechanism, the effectiveness of legislation and the type of legal

sanctions administered to traffic offenders. The need to use enforcement in conjunction with educational and environmental/engineering strategies is also stressed. The need for publicity to support enforcement operations, police training and education programs is also documented. The review concludes with a series of recommendations regarding the most promising options available to authorities to improve the effectiveness of traffic law enforcement operations.

Work Zone Speed Management John W. Shaw, Madhav V. Chitturi, William Bremer, David Alan Noyce, 2015 This synthesis documents information regarding the current state of practice for work zone speed management. The report compiles data, procedures, techniques, and technical issues related to observing and comparing work zone speeds. The speed management measures have been organized into four categories: engineering, operational, enforcement, and public education and outreach. Information included in this study was acquired through a review of the literature, two surveys of state department of transportation representatives in all states, a compilation of state agency public information campaigns, and follow-up interviews with select survey respondents from several U.S. states and one Canadian province.

Managing Speed, 1998 TRB Special Report 254 - Managing Speed: Review of Current Practices for Setting and Enforcing Speed Limits reviews practices for setting and enforcing speed limits on all types of roads and provides guidance to state and local governments on appropriate methods of setting speed limits and related enforcement strategies. Following an executive summary, the report is presented in six chapters and five appendices.

Policing the Open Road Sarah A. Seo,2019 Policing the Open Road examines how the rise of the car, that symbol of American personal freedom, inadvertently led to ever more intrusive policing--with disastrous consequences for racial equality in our criminal justice system. When Americans think of freedom, they often picture the open road. Yet nowhere are we more likely to encounter the long arm of the law than in our cars. Sarah Seo reveals how the rise of the automobile transformed American freedom in radical ways, leading us to accept--and expect--pervasive police power. As Policing the Open Road makes clear, this expectation has had far-reaching political and legal consequences.--

Are We There Yet?: The American Automobile Past, Present, and Driverless Dan Albert,2019-06-11 Tech giants and automakers have been teaching robots to drive. Robot-controlled cars have already logged millions of miles. These technological marvels promise cleaner air, smoother traffic, and tens of thousands of lives saved. But even if robots turn into responsible drivers, are we ready to be a nation of passengers? In *Are We There Yet?*, Dan Albert combines historical scholarship with personal narrative to explore how car culture has suffused America's DNA. The plain, old-fashioned, human-driven car built our economy, won our wars, and shaped our democratic creed as it moved us about. Driver's ed made teenagers into citizens; auto repair made boys into men. Crusades against the automobile are nothing new. Its arrival sparked battles over street space, pitting the masses against the millionaires who terrorized pedestrians. When the masses got cars of their own, they learned to love driving too. During World War II, Washington nationalized Detroit and postwar Americans embraced car and country as if they were one. Then came 1960s environmentalism and the energy crises of the 1970s. Many predicted, even welcomed, the death of the automobile. But many more rose to its defense. They embraced trucker culture and took to Citizen Band radios, demanding enough gas to keep their big boats afloat. Since the 1980s, the car culture has triumphed and we now drive more miles than ever before. Have we reached the end of the road this time? Fewer young people are learning to drive. Ride hailing is replacing car buying, and with electrification a long and noble tradition of amateur car repair--to say nothing of the visceral sound of gasoline exploding inside a big V8--will come to an end. When a robot takes over the driver's seat, what's to become of us? *Are We There Yet?* carries us from muddy tracks to superhighways, from horseless buggies to driverless electric vehicles. Like any good road trip, it's an adventure so fun you don't even notice how much you've learned along the way.

ITF Research Reports Moving Freight with Better Trucks Improving Safety, Productivity and Sustainability OECD,2011-04-19 This report identifies potential improvements in terms of more effective safety and environmental

regulation for trucks, backed by better systems of enforcement, and identifies opportunities for greater efficiency and higher productivity.

Investment for Health and Well-being Dyakova M, 2017-09-27 Governments across the WHO European Region need to take urgent action to address the growing public health inequality economic and environmental challenges in order to achieve sustainable development (meeting current needs without compromising the ability of future generations to meet their own needs) and to ensure health and well-being for present and future generations. Based on a scoping review this report concludes that current investment policies and practices (doing business as usual) are unsustainable with high costs to individuals families communities societies the economy and the planet. Investment in public health policies that are based on values and evidence provides effective and efficient inclusive and innovative solutions that can drive social economic and environmental sustainability. Investing for health and well-being is a driver and an enabler of sustainable development and vice versa and it empowers people to achieve the highest attainable standard of health for all.

The Transport System and Transport Policy Bert van Wee, Jan A. Annema, David Banister, Baiba Pudāne, 2023-08-14 This extensively updated textbook introduces the transport system and its societal impacts in a holistic and multidisciplinary way. A timely second edition, it includes new analyses of travel behaviour and the transport system's impacts on health and well-being.

Road Engineering for Development Richard Robinson, Bent Thagesen, 2018-10-09 Developing countries in the tropics have different natural conditions and different institutional and financial situations to industrialized countries. However, most textbooks on highway engineering are based on experience from industrialized countries with temperate climates, and deal only with specific problems. *Road Engineering for Development* (published as *Highway and Traffic Engineering in Developing Countries* in its first edition) provides a comprehensive description of the planning, design, construction and maintenance of roads in developing countries. It covers a wide range of technical and non-technical problems that may confront road engineers working in this area. The technical content of the book has been fully updated and current development issues are focused on. Designed as a fundamental text for civil engineering students this book also offers a broad, practical view of the subject for practising engineers. It has been written with the assistance of a number of world-renowned specialist professional engineers with many years experience in Africa, the Middle East, Asia and Central America.

Become a Problem-Solving Crime Analyst Ronald Clarke, John E. Eck, 2014-06-03 Crime analysis has become an increasingly important part of policing and crime prevention, and thousands of specialist crime analysts are now employed by police forces worldwide. This is the first book to set out the principles and practice of crime analysis, and is designed to be used both by crime analysts themselves, by those responsible for the training of crime analysts and teaching its principles, and those teaching this subject as part of broader policing and criminal justice courses. The particular focus of this book is on the adoption of a problem solving approach, showing how crime analysis can be used and developed to support a problem oriented policing approach – based on the idea that the police should concentrate on identifying patterns of crime and anticipating crimes rather than just reacting to crimes once they have been committed. In his foreword to this

book, Nick Ross, presenter of BBC Crime Watch, argues passionately that crime analysts are 'the new face of policing', and have a crucial part to play in the increasingly sophisticated police response to crime and its approach to crime prevention – 'You are the brains, the expert, the specialist, the boffin.'

Saving Oil in a Hurry International Energy Agency, 2005 During 2004, oil prices reached levels unprecedented in recent years. Although world oil markets remain adequately supplied, high oil prices reflect increasingly uncertain conditions, and many countries are considering ways to improve capacity to handle market volatility and possible supply disruptions in the future. In light of these concerns, this publication sets out a new quantitative assessment of the potential oil savings and costs of rapid oil demand restraint measures for transport, useful for both large-scale disruptions, and for smaller, localised supply disruptions in individual countries. It examines potential approaches for rapid uptake of measures such as telecommuting, ecodriving, and car-pooling; as well as discussing methodologies for adapting policy measures to national circumstances.

Towards Zero Ambitious Road Safety Targets and the Safe System Approach International Transport Forum, 2008-09-23 This report takes stock of recent developments and initiatives to meet increasingly ambitious road safety targets, and constitutes a major international review of progress in developing Safe System approaches, now adopted in a small number of countries.
