*Ethical Issues in Aviation* Elizabeth Hoppe,2016-05-13 Applied ethics has been gaining wide attention in a variety of curriculums, and there is growing awareness of the need for ethical training in general. Well-publicized ethical problems such as the Challenger disaster, the Ford Pinto case and the collapse of corporations such as Enron have highlighted the need to rethink the role of ethics in the workplace. The concept of applied ethics originated in medicine with a groundbreaking book published in 1979. Business ethics books began to appear in the 1980s, with engineering ethics following in the 1990s. This volume now opens up a new area of applied ethics, comprehensively addressing the ethical issues confronting the civil aviation industry. Aviation is unique in two major ways: firstly it has a long history of government regulations, and secondly its primary focus is the safety of its passengers and crew. For decades commercial aviation was viewed in the same manner

as public utilities, and thus it was highly regulated by the government. Since the Deregulation Act of 1978, aviation has been viewed as any other business while other experts continue to believe that the sudden switch to deregulation has caused problems, especially since many airlines were unprepared for the change. *Ethical Issues in Aviation* focuses on current concerns and trends, to reflect the changes that have occurred in this deregulated era. The book provides the reader with an overview of the major themes in civil aviation ethics. It begins with theoretical frameworks, followed by sections on the business side of aviation, employee responsibility, diversity in aviation, ground issues regarding airports, air traffic control and security, as well as health and the environment. The contributors to the volume include both academics doing research in the field as well as professionals who provide accounts of the ethical situations that arise in the workplace.

**Data for the People** Andreas Weigend, 2017-01-31 A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that businesses collect and use to make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could. Moreover, whether it is a bank evaluating our credit worthiness, an insurance company determining our risk level, or a potential employer deciding whether we get a job, it is likely that this data will be used against us rather than for us. In *Data for the People*, Andreas Weigend draws on his years as a consultant for commerce, education, healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us. Only then can we the people get back more from Big Data than we give it. Big Data is here to stay. Now is the time to find out how we can be empowered by it.

**Ten Years a Nomad** Matthew Kepnes, 2019-07-16 Part memoir and part philosophical look at why we travel, filled with stories of Matt Kepnes' adventures abroad, an exploration of wanderlust and what it truly means to be a nomad. Matt is possibly the most well-traveled person I know...His knowledge and passion for understanding the world is unrivaled, and never fails to amaze me. —Mark Manson, New York Times bestselling author of *The Subtle Art of Not Giving a F\*ck* *Ten Years a Nomad* is New York Times bestselling author Matt Kepnes' poignant exploration of wanderlust and what it truly means to be a nomad. Part travel memoir and part philosophical look at why we travel, it is filled with aspirational stories of Kepnes' many adventures. New York Times bestselling author of *How to Travel the World on \$50 a Day*, Matthew Kepnes knows what it feels like to get the travel bug. After meeting some travelers on a trip to Thailand in 2005, he realized that living life meant more than simply meeting society's traditional milestones, such as buying a car, paying a mortgage, and moving up the career ladder. Inspired by them, he set off for a year-long trip around the world before he started his career. He finally came home after ten years. Over 500,000 miles, 1,000 hostels, and 90 different countries later, Matt has compiled his favorite stories, experiences, and insights into this travel manifesto. Filled with the color and perspective that only hindsight and self-reflection can offer, these stories get to the real questions at the heart of wanderlust. Travel questions that transcend the basic how-to, and plumb the depths of what drives us to travel — and what extended travel around the world can teach us about life, ourselves, and our place in the world. *Ten Years a Nomad* is for travel junkies, the travel-curious, and anyone interested in what you can learn about the world when you don't have a cable bill for a decade or spend a month not wearing shoes living on the beach in Thailand.

**China Airborne** James Fallows, 2013-02-26 From one of our most influential journalists, here is a timely, vital, and illuminating account of the next stage of China's modernization—its plan to rival America as the world's leading aerospace power and to bring itself from its low-wage past to a high-tech future. In 2011, China announced its twelfth Five-Year Plan, which included the commitment to spend a quarter of a trillion dollars to jump-start its aerospace industry. In *China Airborne*, James Fallows documents, for the first time, the extraordinary scale of China's project, making clear how it stands to catalyze the nation's hyper-growth and hyper-urbanization, revolutionizing China in ways analogous to the building of America's transcontinental railroad in the nineteenth century. Completing this remarkable picture, Fallows chronicles life in the city of Xi'an, home to 250,000 aerospace engineers and assembly-line workers, and introduces us to some of the hucksters, visionaries, entrepreneurs, and dreamers who seek to benefit from China's pursuit of aeronautical supremacy. He concludes by explaining what this latest demonstration of Chinese ambition means for the United States and for the rest of the world—and the right ways for us to respond.

**All Strangers Are Kin** Zora O'Neill, 2016-06-14 An American woman determined to learn the Arabic language travels to the Middle East to pursue her dream in this "witty memoir" (Us Weekly). The shadda is the key difference between a pigeon (hamam) and a bathroom (hammam). Be careful, our professor advised, that you don't ask a waiter, 'Excuse me, where is the pigeon?'—or, conversely, order a roasted toilet . . . If you've ever studied a foreign language, you know what happens when you first truly and clearly communicate with another person. As Zora O'Neill recalls, you feel like a magician. If that foreign language is Arabic, you just might feel like a wizard. They say that Arabic takes seven years to learn and a lifetime to master. O'Neill had put in her time. Steeped in grammar tomes and outdated textbooks, she faced an increasing certainty that she was not only failing to master Arabic, but also driving herself crazy. She took a decade-long hiatus, but couldn't shake her fascination with the language or the cultures it had opened up to her. So she decided to jump back in—this time with a new approach. In this book, she takes us along on her grand tour through the Middle East, from Egypt to the United Arab Emirates to Lebanon and Morocco. She's packed her dictionaries, her unsinkable sense of humor, and her talent for making fast friends of strangers. From quiet, bougainvillea-lined streets to the lively buzz of crowded medinas, from families' homes to local hotspots, she brings a part of the world thousands of miles away right to your door—and reminds us that learning another tongue leaves you rich with so much more than words. "You will travel through countries and across centuries, meeting professors and poets, revolutionaries, nomads, and nerds . . . [A] warm and hilarious book." —Annia Ciezadlo, author of *Day of Honey* "Her tale of her 'Year of Speaking Arabic Badly' is a genial and revealing pleasure." —The Seattle Times
