**Dating, Mating, Relating** Pamela Anne Quiroz,2022-06-21 To fit a changing society, the conventional ways we date and mate have given way to brand new methods. People nowadays marry later in life, choose not to marry at all, seek partners after divorce, outlive spouses, relocate to new areas and even endure pandemics. This signifies that we are moving toward larger dating pools, something made possible through public personal advertising. This text details personal advertising in print and digital media, as well as online dating services, speed dating, the use of mobile dating apps and other topics. Interviews reveal the appeal and limitations of personal advertising for meeting people. This book offers a window into the development of trust and relationships, as well as the increasing role technology plays in shaping how people meet and mate in the modern world.

**High** Jodie Gould,2015-04-28 There may be fewer options than usual for feeling good and finding a healthy high while we're both in recovery and in the pandemic, but they're available - even indoors and at home. Explore our universal human need to feel good, to escape, or to feel high, and examine what these altered states look like in the brain. Plus discover the six pleasure principles that can provide you the most natural and long-lasting highs. All creatures naturally seek pleasure and avoid pain. And when just feeling okay isn't enough, people (and many animals as well) often seek or even crave something more—to feel high. For millions of years, humans have used alcohol, marijuana, and other drugs to help them feel better, elephants have sought out fermented fruit, and cats have rolled ecstatically in catnip. At the same time, people have found alternative highs without mood-altering substances, through the joy of natural activities such as play, creative expression, and bonding with others. Drawing on current research and interviews with experts and everyday people, award-winning journalist Jodie Gould explores the universal need to feel good in High: The Guilt-Free Guide to Healthy Pleasure and Escape. Through this engaging read, we explore the history of how and why people have continued to find ways to expand their consciousness and the biology of getting high, including what these altered states look like in the brain. From there we learn why some people can use mood-altering chemicals with few consequences while others struggle with addiction. At the heart of Gould's provocative findings, she identifies six pleasure principles that show how anyone can experience the best and most lasting natural highs through the joy of: • moving and playing • connecting with other people • finding purpose and meaning • creative self-expression • celebrating milestones • and giving to others High is your guide to experiencing the greatest high of all: Life itself!

**Our National Monuments** Q. T. Luong,2021-09-25 From the north woods of Maine to the cactus-filled deserts of Arizona, America's national monuments include vast lands rivaling the national parks in beauty, diversity, and historical heritage. These critically important landscapes, mostly under the Bureau of Land Management

supervision, are often under the radar with limited visitor information available yet offer considerable opportunities for solitude and adventure compared to bustling national parks. The Antiquities Act of 1906 gave Presidents the authority to proclaim national monuments as an expedited way to protect areas of natural or cultural significance. Since then, 16 Presidents have used the Antiquities Act to preserve some of America's most treasured public lands and waters. In 2017, an unprecedented Executive Order was issued questioning these designations by calling for the review of 27 national monuments across 11 states and two oceans, opening the threat of development to vulnerable and irreplaceable natural resources. Our National Monuments introduces these spectacular and unique landscapes, in the first book of its kind. Accompanying the collection of scenic photographs is an invaluable guide including maps of each national monument with carefully selected attractions identified and described based on the author's wide-ranging explorations. Our National Monuments invites readers to experience for themselves these lands and learn about the people and cultures who came before, and to whom these lands are still sacred places. QT Luong is one of the most prolific photographers working in America's public lands and the author of Treasured Lands, the best-selling and acclaimed photography book about the national parks. Combining hundreds of his sumptuously printed photographs with essays from citizen conservation associations caring for these national treasures; including a foreword by former Secretary of the Interior Sally Jewell and photographs of marine national monuments from Ansel Adams award-winning photographer Ian Shive, the comprehensive portrayals of Our National Monuments help readers understand how these essential landscapes are preserving America's past and shaping its future.

**Love in the Time of Algorithms** Dan Slater, 2013-01-24 “If online dating can blunt the emotional pain of separation, if adults can afford to be increasingly demanding about what they want from a relationship, the effect of online dating seems positive. But what if it’s also the case that the prospect of finding an ever more compatible mate with the click of a mouse means a future of relationship instability, a paradox of choice that keeps us chasing the illusive bunny around the dating track?” It’s the mother of all search problems: how to find a spouse, a mate, a date. The escalating marriage age and declining marriage rate mean we’re spending a greater portion of our lives unattached, searching for love well into our thirties and forties. It’s no wonder that a third of America’s 90 million singles are turning to dating Web sites. Once considered the realm of the lonely and desperate, sites like eHarmony, Match, OkCupid, and Plenty of Fish have been embraced by pretty much every demographic. Thanks to the increasingly efficient algorithms that power these sites, dating has been transformed from a daunting transaction based on scarcity to one in which the possibilities are almost endless. Now anyone—young, old, straight, gay, and even married—can search for exactly what they want, connect with more people, and get more information about those people than ever before. As journalist Dan Slater shows, online dating is changing society in more profound ways than we imagine. He explores how these new technologies, by altering our perception of what’s possible, are reconditioning our feelings about commitment and challenging the traditional paradigm of adult life. Like the sexual revolution of the 1960s and ’70s, the digital revolution is forcing us to ask new questions about what constitutes “normal”: Why should we settle for someone who falls short of our expectations if there are thousands of other options just a click away? Can commitment thrive in a world of unlimited choice? Can chemistry really be quantified by math geeks? As one of Slater’s subjects wonders, “What’s the etiquette here?” Blending history, psychology, and interviews with site creators and users, Slater takes readers behind the scenes of a fascinating business. Dating sites capitalize on our quest for love, but how do their creators’ ideas about profits, morality, and the nature of desire shape the virtual worlds they’ve created for us? Should we trust an industry whose revenue model benefits from our avoiding monogamy? Documenting the untold story of the online-dating industry’s rise from ignominy to ubiquity—beginning with its early days as “computer dating” at Harvard in 1965—Slater offers a lively, entertaining, and thought provoking account of how we have, for better and worse, embraced technology in the most intimate aspect of our lives.

**Nervous Energy** Chloe Carmichael, 2022-03-22 Many people reach success by deliberately being their own worst critic and obsessively double-checking their work; or by pushing their feelings aside. The somewhat OCD tendencies we pride ourselves on can become mismanaged, and lead us down a rabbit hole of excessive self-criticism, anxiety, and pessimism. Carmichael outlines nine tools with step-by-step instructions that can help you harness your nervous energy in order to live a more productive and fulfilling life. -- adapted from jacket

**The Guyde** Howie Reith, 2016-11-19 The Guyde is the most comprehensive men's dating and self-improvement book ever written, designed to be everything you need to transform into the most confident version of yourself. There are no lines or routines; instead you'll find exercises and information to improve your self-esteem, social skills, and other elements integral to social success. Everything in these pages is backed with scientific evidence, and when I say scientific evidence, I mean cited peer-reviewed literature, not pop evolutionary psychology or the law of attraction. You won't be reading anecdotes telling you about my successes or opinions; you'll be learning the practical steps necessary for the specific changes you want to manifest in your life. The Guyde is divided into four sections: Part I - Psychology Part I focuses on the internal elements of social interaction. How do you overcome your toxic self-limiting beliefs that keep you from being authentic with people? How do you overcome your fears? How can you stay motivated to make your changes? You will learn clinically effective approaches to all of these and more. Part II - Social Skills For many men, the biggest barrier between themselves and social success is a lack of social skills and awareness. In Part II, you'll learn how to shore up this weakness. You will learn how to listen, banter, share stories, and assert yourself with others. You'll learn how to improve your body language and vocal tonality to project confidence and charisma. Part III - Physical Attractiveness Part III will teach you how to improve your physical features. The first two chapters detail the most clinically effective approaches to diet and exercise. We'll also discuss the basics of fashion and how to dress to impress. Master Part III, and when you go out, you will turn heads. Part IV - Dating The final portion of The Guyde deals with dating, in this version, in a heterosexual male context. You'll learn the best places to meet potential dates, how to flirt, and how to ask someone out. You'll learn how to plan brag-worthy romantic evenings and how to address problems like rude cancellations and ghosting. You'll learn how to interact physically while being sensitive to your date's wishes, as well as how to perform better in bed. You'll learn why relationships fail and how to avoid the pitfalls most couples fall into, and you'll come to understand a bit about what it's like to date from a woman's perspective, including many of the cultural factors they face that most men don't understand. The Guyde is a labor of love. I wrote it to be everything I wish I'd

known when I was younger, the sorts of things that turned my life around for the better. I hope it does the same for you.

**Managing Media Creating Character** Kelly Newcom,2017-12-28 Technology, smartphones and social media are changing how we live but are these advancements changing who we are? In our globally-connected, instantly-accessible world, is it possible for parents to be more influential on their children's character than the internet? Parents everywhere are struggling to find a standard they can maintain while keeping their children protected online and connected with friends. In the absence of any such standard, many children have free reign with the technology they own and the media they consume. The result has been an unsettling amount of cyberbullying, self-harm, and suicides along with increased rates of adolescent depression and anxiety. In *Managing Media Creating Character*, you will learn how to use the technology and media your child craves in order to develop patience, respect, kindness, honesty, self-control, modesty, humility, and self-worth. Each chapter presents a character trait along with a practical and applicable media standard in order to teach responsible use and good character. These character traits are honed and polished through the use of digital media and screens and become the foundation and standard for how your child will engage with technology forever. This book helps establish a technology and media standard for families with: Babies & Toddlers who are incredibly drawn to the glow of your phone. Elementary age children when the school-issued tablet or a second grader with a smartphone brings up questions sooner than you are ready to answer. Middle School age children when smartphones, sexting, and depression begins. High School age teens who can either solidify or shatter their reputation by what is posted and shared online. Additionally, this book is a valuable guide for grandparents, teachers, caretakers, and pastors who are involved in children's lives and want to help curb obsession and promote character. There has never been a better time to unite on a standard for technology and media.

Trees Gregory McNamee,2018-11-20 Art Wolfe's immersive photos capture the wonder humans have felt about trees for millennia. From the biblical Tree of Life to the Native American Tree of Peace, trees have played an archetypal role in human culture and spirituality since time immemorial. An integral part of a variety of faiths—from Buddhism and Hinduism to Native American and aboriginal religions—trees were venerated long before any written historical records existed. Through the vivid images of legendary photographer Art Wolfe, *Trees* focuses on both individual specimens and entire forests, and offers a sweeping yet intimate look at an arboreal world that spans six continents. Author Gregory McNamee weaves a diverse and global account of the myths, cultures, and traditions that convey the long-standing symbiosis between trees and humans, and renowned ethnobotanist Wade Davis anchors the text with a penetrating introduction. Humans have always shared this planet with trees, and *Trees* by Art Wolfe is a breathtaking journey through and homage to that relationship and its past, present, and future.
