The Emergence of the Digital Humanities Steven E. Jones, 2013-08-15 The past decade has seen a profound shift in our collective understanding of the digital network. What was once understood to be a transcendent virtual reality is now experienced as a ubiquitous grid of data that we move through and interact with every day, raising new questions about the social, locative, embodied, and object-oriented nature of our experience in the networked world. In The Emergence of the Digital Humanities, Steven E. Jones examines this shift in our relationship to digital technology and the ways that it has affected humanities scholarship and the academy more broadly. Based on the premise that the network is now everywhere rather than merely out there, Jones links together seemingly disparate cultural events—the essential features of popular social media, the rise of motion-control gaming and mobile platforms, the controversy over the gamification of everyday life, the spatial turn, fabrication and 3D printing, and electronic publishing—and argues that cultural responses to changes in technology provide an

essential context for understanding the emergence of the digital humanities as a new field of study in this millennium. The Winning Way Brian Tracy,Nick Nanton, Esq.,Jw Dicks, Esq.,2014-04-15 By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by the CelebrityExperts(r) in this book will be of importance to you. The advice and suggestions of these CelebrityExperts(r) are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are going and to advise what to avoid. If you wish to develop The Winning Way to your goals, read on... You will never win if you never begin. Helen Row
