Green Communication and China Jingfang Liu, Phaedra C. Pezzullo, 2020-09-01 How does China speak for nature? How are the pollution and climate change crises being addressed? What are the possibilities and limitations of mobilizing publics to care about the environment through new media, tourism, and government policy? *Green Communication and China* is the first volume to identify the importance of studying environmental communication in, about, and with China, a rising global environmental leader whose ecological and political controversies often make international headlines. Organized into three sections on communicating crisis, communicating care, and environmental futurity, these essays span multimodal communication practices and methods in green public culture and address topics ranging from The North Face advertisements to NGO advocacy to global governmental policy. The volume showcases the work of leading scholars, all of them deeply intimate with China, in disciplines ranging from cultural studies and rhetoric to public opinion polling, discourse analysis, ethnic studies, and sociology. These complex projects engage transnational and national politics, ecological and economic challenges, media saturation, and government control. Holding these tensions together without glossing over differences, *Green Communication and China* will inform new agendas for environmental communication in China, the United States, and beyond.

The Object of Data Abstraction and Structures Using Java David D. Riley, 2003 *JS123-6, 0-201-71359-4, Riley, David; *The Object of Data Abstraction and Structures (Using Java)* This book covers traditional data structures using an early object-oriented approach, and by paying special attention to developing sound software engineering skills. Provides extensive coverage of foundational material needed to study data structures (objects and classes, software specification, inheritance, exceptions, and recursion). Provides an object-oriented approach to abstract design using UML class diagrams and several design patterns. Emphasizes software-engineering skills as used in professional practice. **MARKET** Readers who want to use the most powerful features of Java to program data structures.

Best Technologies for Public Libraries Christopher DeCristofaro, James Hutter, Nick Tanzi, 2020-01-08 Emerging technologies can intimidate with their cost and uncertainty—this book provides flexible options for adopting the most popular ones. Introducing new technologies to your library can be a daunting process; they can be costly, they may be unfamiliar to many staff members, and their success is far from assured. To address these concerns, *Best Technologies for Public Libraries* accommodates budgets large and small, providing options for both the ambitious and the cost-conscious. Authors Christopher DeCristofaro, James Hutter, and Nick Tanzi provide a resource for staff looking to incorporate a number of emerging technologies into their library and makerspaces. Each chapter explores a new technology, including 3D printing, drones, augmented reality, and virtual reality, covering how the technologies work, the selection process, training, sample programming, best practices, and relevant policy. By describing a variety of program and service ideas across age groups, the book gives readers the ability to first evaluate them within the context of their own organization before incorporating ideas à la carte. This approach helps readers to adopt these new technologies and create policies with uses already in mind.

The Best 100 Free Apps for Libraries Jim Hahn, 2013-05-13 Librarian Jim Hahn has carefully culled the over 500,000 available apps down to the 100 that are the absolute best for day-in, day-out library services. know more about app uses for information access.

Interface Design for Learning Dorian Peters, 2014 In offices, colleges, and living rooms across the globe, learners of all ages are logging into virtual laboratories, online classrooms, and 3D worlds. Kids from kindergarten to high school are honing math and literacy skills on their phones and iPads. If that weren't enough, people worldwide are aggregating internet services (from social networks to media content) to learn from each other in "Personal Learning Environments." Strange as it sounds, the future of education is now as much in the hands of digital designers and programmers as it is in the hands of teachers. And yet, as interface designers, how much do we really know about how people learn? How does interface design actually impact learning? And how do we design environments that support both the cognitive and emotional sides of learning experiences? The answers have been hidden away in the research on education, psychology, and human computer interaction, until now. Packed with over 100 evidence-based strategies, in this book you'll learn how to: Design educational games, apps, and multimedia interfaces in ways that enhance learning Support creativity, problem-solving, and collaboration through interface design Design effective visual layouts, navigation, and multimedia for online and mobile learning Improve educational outcomes through interface design.

Television and the Second Screen James Blake, 2016-11-10 Television is changing almost beyond recognition. In the battle for consumers, social media sites, smart phones and tablets have become rivals to traditional linear TV. However, audiences and producers are also embracing mobile platforms to enhance TV viewing itself. This book examines the emerging phenomenon of the second screen: where users are increasingly engaging with content on two screens concurrently. The practice is transforming television into an interactive, participatory and social experience. James Blake examines interactive television from three crucial angles: audience motivation and agency, advances in TV production and the monetisation of second screen content. He also tracks its evolution by bringing together interviews with more than 25 television industry professionals - across the major UK channels - including commissioning editors, digital directors, producers and advertising executives. These reveal the successes and failures of recent experiments and the innovations in second screen projects. As the second screen becomes second nature for viewers and producers, the risks and opportunities for the future of television are slowly beginning to emerge. **Television and the Second Screen** will offer students and scholars of television theory, industry professionals and anyone with an abiding interest in television and technology, an accessible and illuminating guide to this important cultural shift.

The Alignment Ingress Thomas Greanias, From New York Times bestselling author Thomas Greanias — A New Adventure and a New Hero The wait is over for fans of the worldwide bestselling Raising Atlantis novels. Archaeologist Conrad Yeats and Serena Serghetti return for the first time since The Atlantis Revelation in an all-new adventure that introduces adventurer and exotic matter tracker Hank Johnson. Their quest takes them to the dark heart of Africa in search of the secret behind King Solomon's gold. But they unleash the curse of the legendary Queen of Sheba and must stop an ancient evil before it destroys the world. The Alignment: Ingress is your portal into the larger world of Ingress, the new augmented reality experience from Google's own Niantic Labs. Now you too, like Hank Johnson, can track exotic matter or XM, join the Enlightened or Resistance factions, and open your own transdimensional portals around the globe--and glimpse what's on the other side. Visit www.ingress.com to learn how you can experience Ingress for yourself. Watch the book trailer at <http://www.youtube.com/watch?v=B7Aad1zYEwA>

Artificial Intelligence Supported Educational Technologies Niels Pinkwart, Sannyuya Liu, 2020-04-29 This book includes a collection of expanded papers from the 2019 Sino-German Symposium on AI-supported educational technologies, which was held in Wuhan, China, March, 2019. The contributors are distinguished researchers from computer science and learning science. The contributions are organized in four sections: (1) Overviews and systematic perspectives, (2) Example Systems, (3) Algorithms, and (4) Insights gained from empirical studies. For example, different data mining and machine learning methods to quantify different profiles of a learner in different learning situations (including interaction patterns, cognitive modes, knowledge skills, interests and emotions etc.) as well as connections to measurements in psychology and learning sciences are discussed in the chapters.

Dark Skies Nick Dunn, Tim Edensor, 2023-11-27 Dark Skies addresses a significant gap in knowledge in relation to perspectives from the arts, humanities, and social sciences. In providing a new multi- and interdisciplinary field of inquiry, this book brings together engagements with dark skies from a variety of disciplinary backgrounds, empirical studies, and theoretical orientations. Throughout history, the relationship with dark skies has generated a sense of wonder and awe, as well as providing the basis for important cultural meanings and spiritual beliefs. However, the connection to dark skies is now under threat due to the widespread growth of light pollution and the harmful impacts that this has upon humans, non-humans, and the planet we share. This book, therefore, examines the rich potential of dark skies and their relationships with place, communities, and practices to provide new insights and understandings on their importance for our world in an era of climate emergency and environmental degradation. This book is intended for a wide audience. It will be of interest to scholars, students, and professionals in geography, design, astronomy, anthropology, ecology, history, and public policy, as well as anyone who has an interest in how we can protect the night sky for the benefit of us all and the future generations to follow. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

The alien house Owen Jones, 2022-04-12 Michael has lived with his Thai wife in Thailand for twelve years and Spain for two, but failed to get her a residence permit for the UK. She was sent back to Thailand and he moved back to his home town of Barry in South Wales to try to 'get her from the inside. The chances are slim, and he sinks ever deeper into despair, even sleeping on the beach to save money. In truth, he starts to lose his mind with worry and loneliness. He won't even go to his family for help, because he feels that they have shunned him, but is he right? One day, a chance accident brings him into contact with four people who change his life forever, but who are they and where do they come from? His Alter Ego, Ralph, makes fantastic insinuations, but could they be true? Alien House is a fantasy, but the problems within the story are very real for thousands of couples. Heart & Home for Christmas Victoria Duerstock, 2019-09-17 As a writer, teacher, and speaker with a busy work and family life, Victoria Duerstock understands that all the tasks of the holiday season can make it easy to forget the true joy that Christmas can bring. In Heart & Home for

Christmas, Duerstock brings her mission to inspire hope for God's purpose, and her 20 years of experience in the furniture and design industry together, connecting Scripture with design elements and easy decorating tips in a way that reflects the true spirit of Christmas. The devotions and holiday decorating tips will encourage spiritual growth and inspiration to have both a captivating heart and home at Christmas. Praise for *Heart & Home: Design Basics for Your Soul and Living Space* Seldom do I discover a book which ministers to mind, body and soul, but Victoria Duerstock's *Heart & Home* is just such a jewel! I was immediately drawn to the unique design elements through color photographs, and especially the carefully selected accompanying Scripture, meditation and prayer. All of these work together to address one small element of life on which I can meditate all day long (and even bring into my own home through her practical suggestions.) While I am neither an interior designer nor DIY crafter, I am someone who embraced "hygge" long before I knew what the word meant—a beauty through coziness and care. You too? Good. My gift list for this special volume is already quite lengthy... Lucinda Secrest McDowell, author *Dwelling Places and Graces* As I read *Heart & Home*, I was captivated not only by the beauty and elegance on every page and in every word, but more importantly I was inspired to see how spaces can transform lives. Creating a home is a sacred undertaking. Building a home or office that inspires, comforts, engages and transforms hearts leads to healthy individuals, families and communities. I was challenged to think about how our homes can be used to focus us on God; how every color, design and object can strengthen our soul. I hope that Victoria's book will also inspire you and refresh your heart and home. Robert Wallstrom, CEO Vera Bradley

100 Things We've Lost to the Internet Pamela Paul, 2021-10-26 The acclaimed editor of The New York Times Book Review takes readers on a nostalgic tour of the pre-Internet age, offering powerful insights into both the profound and the seemingly trivial things we've lost. NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY CHICAGO TRIBUNE AND THE DALLAS MORNING NEWS • "A deft blend of nostalgia, humor and devastating insights."—People Remember all those ingrained habits, cherished ideas, beloved objects, and stubborn preferences from the pre-Internet age? They're gone. To some of those things we can say good riddance. But many we miss terribly. Whatever our emotional response to this departed realm, we are faced with the fact that nearly every aspect of modern life now takes place in filtered, isolated corners of cyberspace—a space that has slowly subsumed our physical habitats, replacing or transforming the office, our local library, a favorite bar, the movie theater, and the coffee shop where people met one another's gaze from across the room. Even as we've gained the ability to gather without leaving our house, many of the fundamentally human experiences that have sustained us have disappeared. In one hundred glimpses of that pre-Internet world, Pamela Paul, editor of The New York Times Book Review, presents a captivating record, enlivened with illustrations, of the world before cyberspace—from voicemails to blind dates to punctuation to civility. There are the small losses: postcards, the blessings of an adolescence largely spared of documentation, the Rolodex, and the genuine surprises at high school reunions. But there are larger repercussions, too: weaker memories, the inability to entertain oneself, and the utter demolition of privacy. *100 Things We've Lost to the Internet* is at once an evocative swan song for a disappearing era and, perhaps, a guide to reclaiming just a little bit more of the world IRL.
