The Concise Encyclopedia of American Radio Christopher H. Sterling, Cary O'Dell, 2010-04-12 The average American listens to the radio three hours a day. In light of recent technological developments such as internet radio, some argue that the medium is facing a crisis, while others claim we are at the dawn of a new radio revolution. The Concise Encyclopedia of American Radio is an essential single-volume reference guide to this vital and evolving medium. It brings together the best and most important entries from the three-volume Museum of Broadcast Communications Encyclopedia of Radio, edited by Christopher Sterling. Comprised of more than 300 entries spanning the invention of radio to the Internet, The Concise Encyclopedia of American Radio addresses personalities, music genres, regulations, technology, programming and stations, the golden age of radio and other topics relating to radio broadcasting throughout its history. The entries are updated throughout and the volume includes nine new entries on topics ranging from podcasting to the decline of radio. The Concise Encyclopedia of American Radio include suggestions for further reading as complements to most of the articles, biographical details for all person-entries, production credits for programs, and a comprehensive index.

**Sounds of Change** Christopher H. Sterling, Michael C. Keith, 2009-09-15 When it first appeared in the 1930s, FM radio was a technological marvel, providing better sound and nearly eliminating the static that plagued AM stations. It took another forty years, however, for FM's popularity to surpass that of AM. In *Sounds of Change*, Christopher Sterling and Michael Keith detail the history of FM, from its inception to its dominance (for now, at least) of the airwaves. Initially, FM's identity as a separate service was stifled, since most FM outlets were AM-owned and simply simulcast AM programming and advertising. A wartime hiatus followed by the rise of television precipitated the failure of hundreds of FM stations. As Sterling and Keith explain, the 1960s brought FCC regulations allowing stereo transmission and requiring FM programs to differ from those broadcast on co-owned AM stations. Forced nonduplication led some FM stations to branch out into experimental programming, which attracted the counterculture movement, minority groups, and noncommercial public and college radio. By 1979, mainstream commercial FM was finally reaching larger audiences than AM. The story of FM since 1980, the authors say, is the story of radio, especially in its many musical formats. But trouble looms. Sterling and Keith conclude by looking ahead to the age of digital radio--which includes satellite and internet stations as well as terrestrial stations--suggesting that FM's decline will be partly a result of self-inflicted wounds--bland programming, excessive advertising, and little variety.

*Media and Communications Technologies* Stephen Lax,2017-09-16 Complex technology is now widely available and commonplace, with new developments emerging almost every day. So how are we to keep up with and make sense of technological changes behind media and communication systems? Do new technologies change society, or are new media the products of social forces? This book examines how media and communication technologies work and considers the society that develops and uses them. From the telegraph to the future of mobile communication, Stephen Lax takes the reader through a critical examination of the most important technologies to come out of the past century. Each chapter is filled with insightful case studies and thought-provoking examples that clearly explain key concepts, whilst exploring historical context and chronological developments to show that 'new' technology depends upon its history. Assuming no prior technical knowledge, the book addresses both technical and social aspects of these developments, explaining bandwidths and frequencies alongside issues of policy and regulation. Illustrated with clear diagrams, boxes and tables, *Media and Communication Technologies* helps students to confront and make sense of the technological changes taking place in communications today.
