File > New > Presentation Simon Guest,2013-11-01 If you're anything like me, you've experienced far

too many presentations in the IT industry that fail to connect with the audience and never achieve what they set out to do. Presentations that reel off facts, yet don't tell a story. Presentations that are overwhelmed with pages of text and bullet points. Presentations that show diagrams that no one understands. Presentations that go well under- or overtime, and are clearly not rehearsed. Presentations where demos routinely fail in front of packed crowds. All delivered by presenters who make numerous mistakes while they are on stage. File > New > Presentation was written to give you the tools and techniques to avoid these pitfalls, and dramatically increase your presentation skills. These skills go well beyond just creating a slide deck, and include understanding your audience, planning the structure of your talk, rehearsing, delivering demos, preparation, and improving what you do behind the podium. With recommendations targeted towards software developers and other technical professionals, you'll gain the knowledge to take your next presentation — and maybe even your career — to the next level.

   MindXpres: Conceptual and Technical Foundations for Next Generation Presentation Solutions Reinout Roels,2019-05-27 Presentation tools such as PowerPoint were initially created to simulate physical slides and have inherited a lot of their limitations. In this dissertation we identify the shortcomings and unmet user needs in presentation software by means of literature study, observations, a survey and the programmatic analysis of over 12000 PowerPoint documents. The results indicate that user needs are slowly evolving while existing software has hardly changed over the last 30 years. We motivate the need to rethink the concept of a presentation and we provide conceptual and technical foundations that can enable interoperable and well-integrated solutions for the identified shortcomings. The resulting MindXpres platform consists of a new conceptual framework, content model, information system and presentation engine. We present MindXpres as a presentation platform that enables researchers and developers to build innovative presentation solutions that cannot be implemented

in the existing tools. We further demonstrate the flexibility of the MindXpres platform by discussing a wide range of proof-of-concept plug-in solutions for the identified shortcomings and unmet user needs.
