Contesting Aviation Expansion Steven Griggs,David Howarth,2023-05-31 This book analyses the strategies used by public authorities to expand the UK aviation industry in relation to growing political opposition and the negative impact of flying on local communities and climate change. Its genealogical investigations show how governmental practices and technologies designed to depoliticise aviation and expand airports have generally failed to constitute an effective political will to counter community resistance and environmental protest. Criticising the dominant logics of UK airport expansion, the authors promote a radical rethinking of our attitudes to aviation in terms of sufficiency, degrowth and alternative hedonism, laying the ground for a more sustainable future.

The Constitutional Legitimacy of Law Officers in the United Kingdom Conor McCormick,2022-07-14 This book provides a detailed account of each law officer's functions and draws on that account as the basis for a conceptual analysis of their constitutional legitimacy. In recent years, the constitutional legitimacy of law officers has been questioned repeatedly because of recurring controversies surrounding the discharge of their varied functions. Indeed, it has become increasingly clear that those functions enable law officers to play a highly influential part in the regulation and exercise of public power throughout the United Kingdom. McCormick argues that the most persuasive framework for analysing the offices which make up this diverse regime involves concentrating on the constitutional values of independence, accountability and trust which underpin it. Both aspects of

the book – namely the explanation of individual functions and the conceptual analysis of collective legitimacy – are written in a holistic way which encompasses critical analyses about the Attorney General and Solicitor General for England and Wales; the Counsel General for Wales; the Lord Advocate, Solicitor General and Advocate General for Scotland, as well as the Attorney General and Advocate General for Northern Ireland.

New Pathways to Civil Justice in Europe Xandra Kramer,Alexandre Biard,Jos Hoevenaars,Erlis Themeli,2021-09-17 This book focuses on four topical and interconnected, innovative pathways to civil justice within the context of securing and improving access to justice: the use of Artificial Intelligence and its interactions with judicial systems; ADR and ODR tracks in privatising justice systems; the effects of increased self-representation on access to justice; and court specialization and the establishment of commercial courts to counter the trend of vanishing court trials. Top academics and experts from Europe, the US and Canada address these topics in a critical and multidisciplinary manner, combining legal, socio-legal and empirical insights. The book is part of ‘Building EU Civil Justice’, a five-year research project funded by the European Research Council. It will be of interest to scholars and policymakers, as well as practitioners working in the areas of civil justice, alternative dispute resolution, court systems, and legal tech. The chapters “Introduction: The Future of Access to Justice – Beyond Science Fiction” and “Constituting a Civil Legal System Called “Just”: Law, Money, Power, and Publicity” are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.
