**Flipped Classrooms with Diverse Learners** Zachary Walker, Desiree Tan, Noi Keng Koh, 2020-06-29 This book addresses the background of classroom flipping, explores the theoretical underpinnings for why flipping works, and shares current success stories in practice. It provides diverse international examples of classroom flipping for all ages, includes discussions of the authors' studies in the context of the existing research, and illustrates the impact that classroom flipping has had across a range of educational settings instead of focusing on a specific domain or learner context. Intended as a handbook for practitioners, the analysis of commonly used, highly effective techniques for learners of various ages fills a major gap in the literature. It offers a valuable resource for educators, helping them make the flipped

learning experience an impactful and meaningful one.

**Researching Practitioner Inquiry as Professional Development** Rose M. Pringle, 2020-12-14 This book presents the authentic voices of science teachers engaged in practitioner inquiry as one component of a comprehensive professional development program. Practitioner inquiry as a genre of educational research, allows teachers to intentionally study their practices thus generating practical solutions to problems in their teaching and students' learning. The teachers' voices allowed us to enter their science classrooms to observe their posture and practices as reflective practitioners. They encountered issues such as culturally responsive teaching and low literacy proficiency and metacognitive skills among their struggling science learners. Their firsthand accounts provide new insights about practitioner inquiry as a tool to support teachers continuous learning, regardless of the disciplinary content areas. The book therefore provides a blueprint that can inform inservice teacher educators and support school and district administrators as they seek to nurture teachers' professional growth.

*Brand Platform in the Professional Sport Industry* Jingxuan Zheng, Daniel S. Mason, 2018-05-17 This book examines how the emergence of new media brings brought challenges to the North American sport industry, discussing challenges in terms of a shift from an information economy to an attention economy perspective. Historically, the arrival of new forms of media, including radio and television, were not universally supported by sports leagues, wary of existing industry relationships with stakeholders, and new media have made the multi-sided market model of professional sports leagues – which has focused on protection and exploitation of league content – inefficient, and calls for a new model to integrate new media into the market. By integrating platform theory with the Service Dominant Logic (SDL) of marketing we describe how the multi-sided market of professional sports is

evolving into a platform ecosystem, and the role of its most important customers – the fans – will also evolve from end users, to value co-creators, complementors and innovators. This book will create a new way of understanding the evolution of professional sports leagues and future growth of the industry, and lay the foundation for new research within the academic realm of sport management and sports marketing.

**Contemporary British Television Drama** James Chapman,2020-05-28 The early twenty-first century has seen the emergence of a new style of television drama in Britain that adopts the professional practices and production values of high-end American television while remaining emphatically 'British' in content and outlook. This book analyses eight of these dramas - Spooks, Foyle's War, Hustle, Life on Mars, Ashes to Ashes, Downton Abbey, Sherlock and Broadchurch - which have all proved popular with audiences and in their different ways represent the thematic and formal paradigms of post-millennial drama. James Chapman locates new British drama in its institutional and economic contexts, considers their critical and popular reception, and analyses their social politics in relation to their representations of class, gender and nationhood. He demonstrates how contemporary drama has mobilised both new and residual elements in re-configuring genres such as the spy series, cop show and costume drama for the cultural tastes of modern audiences. And it concludes that television drama has played an integral role

in both the economic and the cultural export of 'Britishness'.
