making it a valuable addition to any library and classroom.

Janice VanCleave's Wild, Wacky, and Weird Physics Experiments Janice VanCleave, 2016-07-15 In a series of fun and involving hands-on physics experiments, kids charge an object with static electricity, demonstrate how static charges produce sound, use magnetic force to suspend a paper airplane, determine that objects in water have a different weight than they do in air, and learn how a substance's buoyancy can be changed. They will also determine if shape determines the strength of an object, learn the effect that an object's center of gravity has on motion, demonstrate how the length of a pendulum affects the time of each swing, and discover how the center of gravity is also the balancing point of an object. Featuring color illustrations and safe, simple step-by-step instructions, Janice VanCleave again shows just how much fun science can be.

Many More of Janice VanCleave's Wild, Wacky, and Weird Physics Experiments Janice VanCleave, 2017-12-15 In a series of fun and involving hands-on physics experiments, kids learn how to create and operate first-, second-, and third-class levers, demonstrate apparent weightlessness, and determine an object's precise center of gravity and balancing point. They will also demonstrate how a rocket moves, how the length of a flute affects pitch, and how to create sound through vibration. Featuring color illustrations and safe, simple step-by-step instructions, Janice VanCleave shows just how much fun science can be.

Janice VanCleave's Crazy, Kooky, and Quirky Physics Experiments Janice VanCleave, 2018-07-15 Young scientists will learn the power of physics when they make their own lemon batteries, demonstrate centrifugal force, and exhibit how sound energy travels. They will identify magnetic poles, learn what the best conductor for heat is, and even determine why eggs don't break beneath their bird guardians. Color illustrations and safe, simple step-by-step instructions will guide readers through this collection of twenty-four physics experiments from celebrated educator Janice VanCleave, empowering them to learn in a tactile and entertaining way.

Even More of Janice VanCleave's Wild, Wacky, and Weird Physics Experiments Janice VanCleave, 2017-07-15

In a series of fun and involving hands-on physics experiments, kids learn how airspeed affects flight, how unbalanced forces produce motion, how polarized light moves, how to separate light into colors, and how a mirror affects the reflected image. They will also determine and demonstrate why popcorn pops, how temperature affects the bounce of a rubber ball, the effect of solids on the speed of sound, and how the length of a flute affects the pitch of the sound it produces. Featuring color illustrations and safe, simple step-by-step instructions, Janice VanCleave again shows just how much fun science can be.

Junk Drawer Physics ,2014-06-01 There's not need for expensive, high-tech lab equipment to perform physics experiments-you probably have all you need in your home junk drawer. Turn a plastic cup into a pinhole camera using waxed paper, a rubber band, and a thumbtack. Build a swinging wave machine using a series of washers suspended on strings from a yardstick. Use a cork, string, and water-filled plastic bottle to create a simple accelerometer. Or construct your own planetarium from an empty potato chip canister, construction paper, scissors, and a pin. Physics teacher Bobby Mercer provides readers with more than 50 great hands-on experiments that can be performed for just pennies . . . or less. Each project has a materials list, detailed step-by-step instructions with illustrations, and a brief explanation of the scientific principle being demonstrated. *Junk Drawer Physics* also includes sidebars of fascinating physics facts: did you know the Eiffel Tower is six inches taller in summer than in winter because its steel structure expands in the heat? Educators and parents will find this title a handy resource to teach children about physics topics that include magnetism, electricity, force, motion, light, energy, sound, and more, and have fun at the same time. Bobby Mercer

has been a high school physics teacher for over two decades. He is the author of The Flying Machine Book, The Racecar Book, and Smash It! Crash It! Launch It! and lives with his family outside of Asheville, North Carolina.
