Histology Thomas Heinbockel,Vonnie D.C. Shields,2019-01-10 Histology is the science of tissues and as such histology studies cells and tissues of organs using a variety of techniques. Histological techniques are used in different disciplines: research, teaching, and clinical applications. This book explores the research currently being carried out at the molecular, subcellular, and cellular levels, both in normal and pathological processes, from genetic mechanisms to intra- and intercellular signaling. This book includes cutting-edge research reviews and descriptions of technological advances to modify bodily cells and tissues. Targeted at students and researchers in biological, medical, and related disciplines, this book will provide an overview of the work being done in this field, and will highlight gaps and areas that would benefit from further exploration. The book contains eight chapters in four sections and presents reviews in different areas of histology written by experts in their respective fields. Basic histology, cell biology, histopathology, and histological techniques are featured prominently as a recurring theme throughout the chapters. This book will be a most valuable resource for histologists, cell biologists, pathologists, and other scientists alike and contribute to the training of current and future biomedical scientists.

Textbook of Histology Leslie P. Gartner,2020-01-23 Textbook of Histology, 5th Edition, brings you up to date with all that's new in the field, while providing a solid foundation in the basic science and clinical application of cellular and molecular biology. Concise and highly illustrated, it functions as both a text and a histology laboratory guide and remains the only histology textbook that includes laboratory exercises for nearly every chapter. Numerous new clinical observations illustrate the importance of histology to clinical practice. More than 170 photomicrographs as well as new

drawings, and histology laboratory instructions in most chapters have been added to this edition. Greatly revised content includes new findings in cellular and molecular biology such as the newly discovered endoplasmic reticulum-shaping proteins, the abundance of stem cells in adipose tissue, the phases of Alzheimer's disease and the role of the newly discovered lymphatic system in slowing the progression of the disease, and developments in the microbiome. More quick-reference tables have been added to summarize information discussed in the text. PowerPoint™ presentations, bolded key terms, bulleted lists, and chapter summaries highlight need to know information and facilitate comprehension. A combination of USMLE-style questions and image-based questions are found in each chapter of the digital edition.

Histology Ray C. Henrikson, Joseph E. Mazurkiewicz, 1997. The purpose of this book is twofold: The concise presentation in outline format enables the student initially to gain an overview of histology and later to review the discipline. This is particularly important in today's biomedical curriculum because of the reduction in time devoted to basic sciences and the dispersal of specific disciplinary materials into evolving, nontraditional curricula. Second, the inclusion of approximately 300 study questions, and integration of their answers with the text, enables the student to review histology, in a timely and efficient manner, in the context of licensing and other comprehensive examinations.

From Cells to Organs Alfons T. L. van Lommel, 2003. Histology is the study of the microscopic structure of cells, tissues, and organs. It has often been taught as a matter of memorization. Dr. Van Lommel's approach is based on the understanding that the microscopic structure of the body has a logic, and the text and accompanying images are organized to proceed according to a rigorous logic, expanding from the anatomy and morphology to discuss the functions of the various kinds of cells, tissues, and organs. The material is thus more interesting and, as an extension of that, easier to remember. CD-ROM included.
