Artificial Intelligence of Health-Enabled Spaces Fadi Al-Turjman,2023-06-16 Artificial Intelligence of Health-Enabled Spaces (AIOH) has made a number of revolutionary advances in clinical studies that we are aware of. Among these advances, intelligent and medical services are gaining a great deal of interest. Nowadays, AI-powered technologies are not only used in saving lives, but also in our daily life activities in diagnosing, controlling, and even tracking of COVID-19 patients. These AI-powered solutions are expected to communicate with cellular networks smoothly in the next-generation networks (5G/6G and beyond) for more effective/critical medical applications. This will open the door for other interesting research areas. This book focuses on the development and analysis of artificial intelligence (AI) model applications across multiple disciplines. AI-based deep learning models, fuzzy and hybrid intelligent systems, and intrinsic explainable models are also presented in this book. Some of the fields considered in this smart health-oriented book include AI applications in electrical engineering, biomedical engineering, environmental engineering, computer engineering, education, cyber security, chemistry, pharmacy, molecular biology, and tourism. This book is dedicated to addressing the major challenges in fighting diseases and psychological issues using AI. These challenges vary from cost and complexity to availability and accuracy. The aim of this book is hence to focus on both the design and implementation aspects of AI-based approaches in the proposed health-related solutions. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via intelligent enabling technologies.

The solution? The Marketing Model can be fixed by slashing your ad budget, and investing in the Z.E.R.O. framework: Zealots Entrepreneurship Retention Owned Assets

Where Good Ideas Come From Steven Johnson, 2010-10-05 A fascinating deep dive on innovation from the New York Times bestselling author of *How We Got To Now* and *Unexpected Life* The printing press, the pencil, the flush toilet, the battery--these are all great ideas. But where do they come from? What kind of environment breeds them? What sparks the flash of brilliance? How do we generate the breakthrough technologies that push forward our lives, our society, our culture? Steven Johnson's answers are revelatory as he identifies the seven key patterns behind genuine innovation, and traces them across time and disciplines. From Darwin and Freud to the halls of Google and Apple, Johnson investigates the innovation hubs throughout modern time and pulls out the approaches and commonalities that seem to appear at moments of originality.

Collapsing Gracefully: Making a Built Environment that is Fit for the Future Emilio Garcia, Brenda Vale, Robert Vale, 2021-07-24 This innovative book investigates the concept of collapse in terms of our built environment, exploring the future transition of modern cities towards scenarios very different from the current promises of progress and development. This is not a book about the end of the world and hopeless apocalyptic scenarios. It is about understanding change in how and where we live. Collapse is inevitable, but in the built environment collapse could imply a manageable situation, an opportunity for change or a devastating reality. Collapsing gracefully means that there might be better ways to coexist with collapse if we learn more about it and commit to rebuild our civilisations in ways that avoid its worst effects. This book uses a wide range of practical examples to study critical changes in the built environment, to contextualise and visualise what collapse looks like, to see if it is possible to buffer its effects in places already collapsing and to propose ways to develop greater resilience. The book challenges all agents and institutions in modern cities, their designers and planners as well as their residents and users to think differently about built environment so as to ease our coexistence with collapse and not contribute to its causes. .
