Cereal City Guide: London Rosa Park, Rich Stapleton, 2018-10-09 From the leading independent travel and style magazine Cereal comes Cereal City Guide: London: a portrait of the English capital offering a finely curated edit on what to see and do for discerning travelers and locals alike. Rich Stapleton and Rosa Park, Cereal's founders, travel extensively for the magazine and were inspired to create a series of city guides that highlighted their favorite places to visit. Now, after building a loyal readership that counts on their unique, considered advice, they are relaunching the books with a fresh design and new content. Rather than a comprehensive directory of all there is to see and do, these Cereal City Guides offer instead an edit of points of interest and venues that reflect Cereal's values, in both quality and aesthetic sensibility. Rich and Rosa have personally visited hundreds of venues in London, distilling their preferred locales down to their firm favorites. From the intimate local shops to the eclectic galleries that evoke London's dual sense of history and modernity, these are the finds that that will offer a more personal take on the city. Meticulously researched and illustrated with original photography, each guide includes: photo essays of striking images of the city an illustrated neighborhood map interviews and essays from celebrated locals such as architectural designer John Pawson, fashion designer Margaret Howell, and more lists of essential architectural points of interest, museums, galleries, day trips outside the city, and unique goods to buy an itinerary for an ideal day in London Cereal City Guide: London is a design-focused portrait of an iconic city, offering a distinctive look at the best museums, galleries, hotels, restaurants, and shops. Also, check out Cereal City Guide: Paris and Cereal City Guide: New York.

People-Smart Sustainable Cities United Nations Publications, 2021-03-02 This publication advocates a cities-based approach to sustainable development which recognizes the central and integrating role that cities and urban living play in developing sustainability. It highlights that, similarly to the financial crisis of 2008, the COVID-19 (coronavirus) pandemic has shown that different cities have different capacities to cope with crises. Both crises disproportionately affected different cities and population groups; the most vulnerable suffering most. Cities need to develop innovative methods to confront infectious diseases without relying on drastic lockdown restrictions.

Biophilic Cities Timothy Beatley, 2011 Tim Beatley has long been a leader in advocating for the greening of cities. But too often, he notes, urban greening efforts focus on everything except nature, emphasizing such elements as public transit, renewable energy production, and energy efficient building systems. While these are important aspects of reimagining urban living, they are not enough, says Beatley. We must remember that human beings have an innate need to connect with the natural world (the biophilia hypothesis). And any vision of a sustainable urban future must place its focus squarely on nature, on the presence, conservation, and celebration of the actual green features and natural life forms. A biophilic city is more than simply a biodiverse city, says Beatley. It is a place that learns from nature and emulates natural systems, incorporates natural forms and images into its buildings and cityscapes, and designs and plans in conjunction with nature. A biophilic city cherishes the natural features that already exist but also works to restore and repair what has been lost or degraded. In *Biophilic Cities* Beatley not only outlines the essential elements of a biophilic city, but provides examples and stories about cities that have successfully integrated biophilic elements--from the building to the regional level--around the world. From urban ecological networks and connected systems of urban greenspace, to green rooftops and green walls and sidewalk gardens, Beatley reviews the emerging practice of biophilic urban design and planning, and tells many compelling stories of individuals and groups working hard to transform cities from grey and lifeless to green and biodiverse.

Smart Cities and Construction Technologies Sara Shirowzhan, Kefeng Zhang, 2020-05-13 This book includes nine chapters presenting the outcome of research projects relevant to building, cities, and construction. A description of a smart city and the journey from conventional to smart cities is discussed at the beginning of the book. Innovative case studies of underground cities and floating city bridges are presented in this book. BIM and GIS applications on different projects, and the concept of intelligent contract and virtual reality are discussed. Two concepts relevant to conventional buildings including private open spaces and place attachments are also included, and these topics can be upgraded in the future by smart technologies.

Speculative Everything Anthony Dunne, Fiona Raby, 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

Tourism and Dictatorship S. Pack, 2006-10-02 Following WWII, the authoritarian and morally austere dictatorship of General Francisco Franco's Spain became the playground for millions of carefree tourists from Europe's prosperous democracies. This book chronicles how this helped to strengthen Franco's regime and economic and political standing.

Living as Form Nato Thompson, 2012 'Living as Form' grew out of a major exhibition at Creative Time in New York City. Like the exhibition, the book is a landmark survey of more than 100 projects selected by a 30-person curatorial advisory team; each project is documented by a selection of colour images.

Walkable City Jeff Speck, 2013-11-12 Presents a plan for American cities that focuses on making downtowns walkable and less attractive to drivers through smart growth and sustainable design.

Sustainability Prospects for Autonomous Vehicles George T. Martin, 2019-05-31 The Autonomous Vehicle (AV) has been strongly heralded as the most exciting innovation in automobility for decades. Autonomous Vehicles are no longer an innovation of the future (seen only in science fiction) but are now being road-tested for use. And yet while the technical and economic success and possibilities of the AV have been widely debated, there has been a notable lack of discussion around the social, behavioural, and environmental implications. This book is the first to address these issues and to deeply consider the environmental and social sustainability outlook for the AV and how it will impact on communities. Environmental and social sustainability are goals unlike those of technical development (a new tool) and economic development (a new investment). The goal of sustainability is development of societies that live well and equitably within their ecological limits. Is it reasonable and desirable that only technical and economic success comprise the swelling AV parade, or should we be looking at the wider impacts on personal well-being, wider society, and the environment? The uptake for AVs looks to be lengthy, disjointed, and episodic, in large measure because it faces a range of known unknown risks. This book assesses the environmental and social sustainability potential for AVs based on their prospective energy use and their impacts on climate change, urban landscapes, public health, mobility inequalities, and individual and social well-being. It examines public attitudes about AV use and its risk of fostering a rebound effect that compromises potential sustainability gains. The book concludes with a discussion of critical issues involved in sustainable AV diffusion.

Resource Manual for Airport In-terminal Concessions, 2011 'TRB's Airport Cooperative Research Program (ACRP) Report 54: Resource Manual for Airport In-Terminal Concessions provides guidance on the development

and implementation of airport concession programs. The report includes information on the airport concession process; concession goals; potential customers; developing a concession space plan and concession mix; the Airport Concessions Disadvantaged Business Enterprise (ACDBE) program; and concession procurement, contracting, and management practices--Publisher's description.

Urban Mobility Report (2004) David Schrank,2008-10 Congestion continues to grow in America's urban areas. This report presents details on the 2004 trends, findings and what can be done to address the growing transportation problems. Trend data from 1982 to 2002 for 85 urban areas provides both a local view and a national perspective on the growth and extent of traffic congestion. The 2004 Report provides clear evidence that the time for improvements has arrived. Communicating the congestion levels and the need for improvements is a goal of this report. The decisions about which, and how much, improvement to fund will be made at the local level according to a variety of goals, but there are some broad conclusions that can be drawn from this database. International Business and Tourism Tim Coles,C. Michael Hall,2008-02-13 Whether it's bungee jumping in Queenstown or visiting the Guinness factory in Dublin, where we travel – and what we do when we get there - has changed significantly in the past twenty years. This innovative textbook explores what is possibly the most unrecognized of international service industries, placing tourism in the context of contemporary globalization and trade-in services. It provides new perspectives on tourism as a form of international business, and the implications for firms, the state and individuals. Split into four separate sections, with introductions outlining the key themes in each, it examines important topics such as: the role of governance and regulation in tourism services the effects of increased global mobility on tourism entrepreneurship how tourism businesses are becoming internationalized why other business sectors are increasingly interested in tourism. Case studies are used throughout to highlight important issues, from developments in the aviation industry to the rise of working holidays. This book gets to the core of a crucial service industry, and is essential reading for any researcher or student of tourism or international business.

Tourism, Smart Specialization and Sustainable Development João Romão,2021-02-26 This Special Issue addresses relations between tourism activities, smart specialization strategies, and sustainable development at different territorial levels, including the local, regional, national, and international. Framed by appropriate conceptual frameworks to define the contemporary dynamics of innovation in tourism, case studies supported by advanced quantitative methods and developed in rural and urban areas of Asia, Europe, and Africa are presented and discussed. The concept of smart specialization inspires the formulation of regional innovation policies and strategies, emphasizing the importance of endogenous resources and existing territorial capabilities. By exploring the diversity and variety of each economy to develop inter-sectoral relations, this approach aims at promoting the creation of spillover effects of innovation processes supported by adequate key enabling technologies, potentially leading to the sustainable development of places, regions, and countries. As an activity that mobilizes contributions from different economic sectors, tourism may play a central role in such strategies. As described and discussed in this Special Issue, aspects related to the creative sectors of economies, information and communication technologies, traditional products and lifestyles, food production, or diverse cultural values can be mobilized to generate innovative and sustainable solutions for tourism development.

Ethnic and Vernacular Music, 1898-1960 Paul Vernon,1995-12-11 Detailed information on almost all ethnic and vernacular recordings from many countries on 78rpm is provided in this seminal work. The current state of discographical research in this wide and varied field is such that a research tool of this nature is badly needed. Jesse Walter Fewkes and Mary Hemenway recorded Native American music as early as 1890; Bela Bartok recorded rural music in the Balkans; Erich von Hornbostel, the grand old man of ethnomusicology in Europe, recorded in Southeast Asia. More than just a discography, this work demonstrates that cultures around the world and over time have more similarities than differences. A necessity for scholars, students, archivists, and individual record collectors and dealers. The goals of this volume are many and varied: to promote thought and discussion toward a concise definition of recorded ethnic music; to assist specialists working on individual discographical projects; to introduce users to the interconnectedness of cultures through regional music; to gather heretofore disparate pieces of information under one cover in a way that for the first time allows specialists to accurately identify all manner of recordings in many languages. The four sections of the volume work together for easy usage through cross referencing. The philosophy behind the volume was expressed by Rodney Gallop when he remarked that music, for him, was often the key to the understanding of other cultures.

JR: Can Art Change the World? Nato Thompson,Joseph Remnant,Marc Azoulay,2015-10-12 The first major and in-depth retrospective monograph on JR, the enigmatic and anonymous Parisian photographer/street artist/activist behind some of the world's most provocative large-scale public photography projects. Created in close collaboration with JR, this book includes all bodies of his work, his collaborations with other artists and institutions such as the New York Ballet and previously unpublished behind-the-scenes documentation of his studios in Paris and New York, where he and his creative collaborators live and work. Introducing JR 's story is a specially commissioned graphic novel by comic artist Joseph Remnant, which charts his rise from graffiti roots and his decision to become a full-time artist. Features a survey essay by Nato Thompson, Chief Curator of Creative Time, New York.
