Banksters, Bosses, and Smart Money Timothy Messer-Kruse,2004 Banksters, Bosses, and Smart Money uncovers the causes of one city's economic collapse by tracing the interlocking directorships, political machines, and insider deals that made quick fortunes for the well-connected while jeopardizing the savings of tens of thousands of depositors. It documents how the power of the city's financial elites continued even after the calamitous bank crash of 1931, skewing the liquidation of insolvent banks in their favor and shielding those responsible from criminal prosecution.

Smart Cards, Tokens, Security and Applications Keith Mayes,Konstantinos Markantonakis,2017-05-18 This book provides a broad overview of the many card systems and solutions that are in practical use today. This new edition adds content on RFIDs, embedded security, attacks and countermeasures, security evaluation, javacards, banking or payment cards, identity cards and passports, mobile systems security, and security management. A step-by-step approach educates the reader in card types, production, operating systems, commercial applications, new technologies, security design, attacks, application development, deployment and lifecycle management. By the end of the book the reader should be able to play an educated role in a smart card related project, even to programming a card application. This book is designed as a textbook for graduate level students in computer science. It is also as an invaluable post-graduate level reference for professionals and researchers. This volume offers insight into benefits and pitfalls of diverse industry, government, financial and logistics aspects while providing a sufficient level of technical detail to support technologists, information security specialists, engineers and researchers.

Smart Cities Policies and Financing John R. Vacca,2022-01-19 Smart Cities Policies and Financing: Approaches and Solutions is the definitive professional reference for harnessing the full potential of policy making and financial planning in smart cities. It covers the effective tools for capturing the dynamic relations between people, policies, financing, and environments, and where they are most often useful and effective for all relevant stakeholders. The book examines the key role of science, technology, and innovation (STI) - especially in information and communications technologies - in the design, development, and management of smart cities policies and financing. It identifies the problems and offers practical solutions in implementation of smart infrastructure policies and financing. Smart Cities Policies and Financing is also about how the implementation of smart infrastructure projects (related to the challenges of the lack of financing and the application of suitable policies) underlines the key roles of science, technology and innovation (STI) communities in addressing these challenges and provides key policies and financing that will help guide the design and development of smart cities. Brings together experts from academia, government and industry to offer state-of-the-art solutions for improving the lives of billions of people in cities around the globe Creates awareness among governments of the various policy tools available, such as output-based contracting, public-private partnerships, procurement policies, long-term contracting, and targeted research funds in order to promote smart infrastructure implementation, and encouraging the use of such tools to shape markets for smart infrastructure and correct market failures Ensures the inclusiveness of smart city projects by adequately addressing the special needs of marginalized sections of society including the elderly, persons with disabilities, and inhabitants of informal settlements and informal sectors Ensures gender considerations in the design of smart cities and infrastructure through the use of data generated by smart systems to make cities safer and more responsive to the needs of women Demonstrate practical implementation through real-life case studies Enhances reader comprehension using learning aids such as hands-on exercises, checklists, chapter summaries, review questions, and an extensive appendix of additional resources

A Village Lost and Found Elena Vidal Brian May, Elena Vidal, 2009-10-22 An Annotated Tour of the 1850s series of Stereo Photographs Scenes in our Village by T.R. Williams This book is the perfect antidote to the stress of life in the 21st Century. It portrays the idyll of life in an 1850s village, far from the sound of the train's whistle. The identity of the village was lost to the world for 150 years, and only by a miracle does this magical set of stereoscopic views survive, brought together for the very first time by Brian May and his co-author, photohistorian Elena Vidal. Their research is amazingly in-depth, but the book is utterly readable, and the pictures leap into glorious 3-D, viewed in the new focussing stereoscope which May has designed and produced, to bring the stereos to life, and then fold neatly into the slip-case of the book. The book gives an extraordinary insight into everyday village life at the time - with a woman at her spinning wheel, the blacksmith outside his smithy, three men at the grind stone sharpening a tool, the villagers in the fields, bringing in the harvest as well as often taking time to enjoy a good gossip. In every case the original verse which accompanied the view is reproduced. In addition, May and Vidal have researched and annotated all the views, revealing another layer of meaning, by exploring the history of these real characters, this idyllic village and its links with the present day. The result is a powerfully atmospheric and touching set of photographs. A Village Lost and Found brings master pioneering stereographer T. R. Williams's passionate life-work Scenes in Our Village to a new audience - in glorious 3-D, as never before. For an Electronic Press Kit for A Village Lost and Found [click here](#)

Designing High-Density Cities Edward Ng, 2009-12-16 Compact living is sustainable living. High-density cities can support closer amenities, encourage reduced trip lengths and the use of public transport and therefore reduce transport energy costs and carbon emissions. High-density planning also helps to control the spread of urban suburbs into open lands, improves efficiency in urban infrastructure and services, and results in environmental improvements that support higher quality of life in cities. Encouraging, even requiring, higher density urban development is a major policy and a central principle of growth management programmes used by planners around the world. However, such density creates design challenges and problems. A collection of experts in each of the related architectural and planning areas examines these environmental and social issues, and argues that high-density cities are a sustainable solution. It will be essential reading for anyone with an interest in sustainable urban development.

Introduction to Information Retrieval Christopher D. Manning, Prabhakar Raghavan, Hinrich Schütze, 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
