*Workshop Proceedings of the 10th International Conference on Intelligent Environments* J.C. Augusto,T. Zhang,2014-07-03 Advances in the engineering of sensing and acting capabilities, distributed in a wide range of specialized devices nowadays, provide an opportunity for the fundamental advances in computer science made in the past few decades to impact our daily lives. Sensors/actuators deployed in a physical space – a house, an office, a classroom, a car, a street – facilitate a link between an automated decision-making system and a technologically-enriched space. The Intelligent Environment, a digital environment that supports people in their daily lives, is a very active area of research which is attracting an increasing number of professionals (both in academia and industry) worldwide. The prestigious 10th International Conference on Intelligent Environments (IE’14) is focused on the development of advanced Intelligent Environments and stimulates the discussion on several specific topics that are crucial to the future of the area. This volume is the combined proceedings of the workshops co-located with IE’14: 9th Workshop on Artificial Intelligence Techniques for Ambient Intelligence (AITAmI’14); 2nd International Workshop on Applications of Affective Computing in Intelligent Environments (ACIE’14); 3rd edition of the Workshop on Future Intelligent Educational Environments (WOFIEE’14); 2nd Workshop on Cloud-of-Things 2014 (CoT’14); 3rd International Workshop on the Reliability of Intelligent Environments (WoRIE 2014); 4th Workshop on Creative Science 2014 (CS’14); and 1st Workshop on Hyperrealistic Intelligent Environments 2014 (HyperRealitIE’14). This book offers an overview of the latest developments in key areas of the development of Intelligent Environments.

**Creating Big Presence in Presentations** Wayne Keinick,2016-02-25 Even though most people have never heard of Glossophobia, almost all of us have experienced it—at least to some degree. Fear of public speaking is something most of us have suffered from at some point in our lives, and many of us never get past it. This explains why so many books have been written to help us cope with the crippling anxiety giving presentations can inspire. But what about not only delivering, but being fully present at the front of the room, while countless eyes look to you for information and leadership, and actually performing well? Visualizing a naked audience and repeatedly practising your speech from start to finish can only take you so far. That's where Creating Big Presence in Presentations comes in. Building upon the foundation of long-standing and accepted public-speaking wisdom, Wayne Keinick takes an in-depth look at the twin concepts of purpose and presence, adapting mindfulness in such a way so as to help presenters be fully aware within the parameters of a presentation situation, and enable them to adjust and adapt without missing a beat or panicking if things start to go off-script. Keinick’s simple explanations and adoptable methods will quickly have the most mediocre public speakers creating real bonds with their audience, and capturing their attention from beginning to end.
