Units 1-3 introduce the theory of medical-surgical nursing, issues and trends in the healthcare system, and the role of the nurse. Organized by body system, Units 4-16 cover adult health issues systematically: the first chapter in each unit discusses the normal anatomy and physiology of the body system; subsequent chapters cover management of specific disorders, their etiology, pathophysiology, clinical manifestations, assessment and findings, and leadership and management. ♦ A wide-range of free online resources round out the learning experience. ♦ Key features include: - NEW!
