Office and SharePoint 2010 User's Guide Michael Antonovich, 2010-08-06 Web sites, collaboration, document management, paperless offices—we want it all in business today, but how do we achieve all of these goals? More importantly, if you work for one of the millions of small-to-medium-sized businesses, how do you find the time to build the expertise necessary to reach these goals? Even the most powerful tool will not allow you to succeed unless you can get the majority of your staff to use it efficiently and effectively. You need a guide that demonstrates a platform that small-to-medium-sized businesses can use to reach these goals. *Office and SharePoint 2010 User's Guide* demystifies the path that every Microsoft Office user can follow to benefit from the synergism of tools they are already familiar with. Together with *SharePoint 2010*, users can achieve goals like web sites with a consistent single view, improved collaboration within their organization, and better document management, and may even get one step closer to the paperless office we've been promised for years. This book has topics for Office users of all skill levels, from those just starting to use Office tools to experienced power users. It examines each major Office tool and shows how it contributes to the support and use of *SharePoint* in today's increasingly electronic-based office environment.

Coming Home Wendy Kline, 2019-01-16 By the mid-twentieth century, two things appeared destined for extinction in the United States: the practice of home

birth and the profession of midwifery. In 1940, close to half of all U.S. births took place in the hospital, and the trend was increasing. By 1970, the percentage of hospital births reached an all-time high of 99.4%, and the obstetrician, rather than the midwife, assumed nearly complete control over what had become an entirely medicalized procedure. Then, seemingly out of nowhere, an explosion of new alternative organizations, publications, and conferences cropped up, documenting a very different demographic trend; by 1977, the percentage of out-of-hospital births had more than doubled. Home birth was making a comeback, but why? The executive director of the American College of Obstetricians and Gynecologists publicly noted in 1977 the rising tide of demand for home delivery, describing it as an anti-intellectual-anti-science revolt. A quiet revolution spread across cities and suburbs, towns and farms, as individuals challenged legal, institutional and medical protocols by choosing unlicensed midwives to catch their babies at home. Coming Home analyzes the ideas, values, and experiences that led to this quiet revolution and its long-term consequences for our understanding of birth, medicine, and culture. Who were these self-proclaimed midwives and how did they learn their trade? Because the United States had virtually eliminated midwifery in most areas by the mid-twentieth century, most of them had little knowledge of or exposure to the historic practice, drawing primarily on obstetrical texts, trial and error, and sometimes instruction from aging home birth physicians to learn their craft. While their

constituents were primarily drawn from the educated white middle class, their model of care (which ultimately drew on the wisdom and practice of a more diverse, global pool of midwives) had the potential to transform birth practices for all women, both in and out of the hospital.

Media Networks Hassnaa Moustafa,Sherali Zeadally,2016-04-19 A rapidly growing number of services and applications along with a dramatic shift in

users' consumption models have made media networks an area of increasing importance. Do you know all that you need to know? Supplying you with a clear understanding of the technical and deployment challenges, Media Networks: Architectures, Applications, and Standard

World Development Report 2016 World Bank Group, 2016-01-14 Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not

when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

Biomedical Advances in HIV Prevention Lisa A. Eaton, Seth C. Kalichman, 2013-10-08 Biomedical Advances in HIV Prevention: Social and Behavioral Perspectives Lisa A. Eaton and Seth C. Kalichman, editors Three decades into the epidemic, a great deal is known about HIV and its transmission, more people are living with the disease, and the virus is no longer seen as a death sentence. But new people continue to be infected with HIV each year, making prevention strategies that are medically effective and behaviorally engaging as urgent a priority as ever. Biomedical Advances in

HIV Prevention: Social and Behavioral Perspectives assembles the latest improvements, barriers to implementation, and possibilities for--and challenges to--future progress. Innovations such as pre-exposure prophylaxis (antiretroviral regimens for the high-risk uninfected) and treatment as prevention (early use of ART to reduce infectiousness of new patients) are examined, as are current findings on ongoing prevention and treatment concerns. Contributors illuminate the complex realities entailing adherence, pointing out technological, behavioral, and cultural roadblocks as well as opportunities to significantly reduce infection rates. Detailed up-to-the-minute coverage includes: Prevention services for persons living with HIV Adherence to HIV treatment as prevention and pre-exposure prophylaxis Advocating for rectal microbicides and safe lubricants Mental health and substance use in the scale-up of HIV prevention Risk compensation in response to HIV prevention Implementing biomedical HIV prevention advances: reports from South Africa, Uganda, Australia, Thailand, United States, Ecuador, and Peru Researchers, practitioners, and policy makers working in the fields of HIV/AIDS and public health will look toward Biomedical Advances in HIV Prevention: Social and Behavioral Perspectives as both a means for developing and assessing current programs and a blueprint for the next generation of prevention efforts.

China Martin Wolff, 2011-12-08 China's annual 5+ million university graduates are the elite of Chinese society. They are the future leaders, be

they community, economic, industrial, political, religious, or social; they are the privileged class who have been educated for future leadership roles. Common Chinese people look up to them and follow them because they are the anointed. A look into their psyche now may be a window into the future of China. What they think and feel as students will undoubtedly carry over into and shape their adult attitudes and thoughts. Post-graduate students at a 1st tier comprehensive university in Guangzhou, Guangdong Province and a 2nd tier science and technology university in Hangzhou, Zhejiang Province were given various topics of current importance and afforded an opportunity to express their thoughts on the issues presented. Participation was voluntary. Herein, we present the issues and a random selection of the students' responses. All of the students' responses can be viewed at <http://chinaholisticenglish.org>.

SMS Uprising: Mobile Activism in Africa Sokari Ekine, 2010-01-30 Providing a unique insight into how activists and social change advocates are addressing Africa's many challenges from within, this collection of essays by those engaged in using mobile phone technologies for social change provides an analysis of the socioeconomic, political, and media contexts faced by activists in Africa today. The articles address a broad range of issues--including inequalities in access to technology based on gender and rural and urban usage--and it offers practical examples of how activists are using mobile technology to organize and document their experiences. An overview of the lessons learned in making effective use of mobile phone technologies without any of the romanticism so often associated with the use of new

technologies for social change is given. Examples are shared in a way that makes them easy to replicate, hoping to lead to greater reflection about the real potential and limitations of mobile technologies. Contributors include Ken Banks, Nathan Eagle, Anil Naidoo, Berna Ngolobe, and Juliana Rotich.
