Short Message Service (SMS) Friedhelm Hillebrand,2010-01-21 Contributions from Finn Trosby, Kevin Holley, Ian Harris Written to celebrate the 25th anniversary of SMS standardization by the people who produced the standards, *Short Message Service (SMS): The Creation of Personal Text Messaging*, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the only messaging service, and so an SMS evolution is put forward.

Without Precedent Anna R. Hayes,2009-06-01 The first woman judge in the state of North Carolina and the first woman in the United States to be elected chief justice of a state supreme court, Susie Marshall Sharp (1907-1996) broke new ground for women in the legal profession. When she retired in 1979, she left a legacy burnished by her tireless pursuit of lucidity in the law, honesty in judges, and humane conditions in prisons. Anna Hayes presents Sharp's career as an attorney, distinguished judge, and politician within the context of the social mores, the legal profession, and the political battles of her day, illuminated by a careful and revealing examination of Sharp's family background, private life, and personality. Judge Sharp was viewed by contemporaries as the quintessential spinster, who had sacrificed marriage and family life for a successful career. The letters and journals she wrote throughout her life, however, reveal that Sharp led a rich private life in which her love affairs occupied a major place, unsuspected by the public or even her closest friends and family. With unrestricted access to Sharp's abundant journals, papers, and notes, Anna Hayes uncovers the story of a brilliant woman who transcended the limits of her times, who opened the way for women who followed her, and who improved the quality of justice for the citizens of her state. Without Precedent also tells the story of a complicated woman, at once deeply conservative and startlingly modern, whose intriguing self-contradictions reflect the complexity of human nature.

Training-Within-Industry Job Programs for Improved Construction Safety Lesiba George Mollo,Fidelis Emuze,John Smallwood,2023-10-06 The purpose of this book is to demonstrate how a Training-Within-Industry (TWI) Job-Program could reduce human factor-related harm in construction. The construction industry has a significant impact on issues relating to the health, safety, and well-being (HSW) of people in the workforce. It is important to acknowledge that workers' behaviour influences the safety management system (SMS) of construction projects either negatively or positively and that it is important for a management team to identify relevant behaviours and take appropriate action to solve problems. In most cases, accidents happen because of the results of human failure in the form of errors, violations and system failures. Human failure causes accidents and site management needs to reduce hazards that might cause such errors, violations and system failures on worksites. The chapters in the book address factors causing human failure on construction sites, how to mitigate errors and violations through SMS and 'learning by doing' and improving practice of using safety instructors on sites. The book closes with insights from a TWI-informed human failure reduction framework. This book provides valuable insights into safety management in a construction site context that can be applied to other areas. It is essential reading for safety managers, construction managers, researchers, and advanced students.
