Shaheen Shariff

Technocreep Thomas P. Keenan, 2014-09-13

"Technology is rapidly moving into our bodies," writes cyber expert Keenan, "and this book gives a chilling look ahead into where that road may lead us – on a one way trip to the total surrender of privacy and the commoditization of intimacy." Here is the definitive dissection of privacy-eroding and life-invading technologies, coming at you from governments, corporations, and the person next door. Take, for example, "Girls Around Me": a Russian-made iPhone App that allowed anyone to scan the immediate vicinity for girls and women who checked in on Foursquare and had poorly secured Facebook profiles. It combined this information in a way never intended by the original poster. Going to a Disney theme park? Your creepy new "MagicBand" will alert Minnie Mouse that you're on the way and she'll know your kid's name when you approach her. Thinking about sending your DNA off to Ancestry.com for some "genetic genealogy"? Perhaps you should think again: your genetic information could be used against you. With security scares like the Heartbleed bug (which compromised even supposedly safe internet behemoths like Google and Yahoo!) becoming more commonplace, this book is a must-read for anybody who values their privacy in a wired world.

Third International Congress on Information and Communication Technology Simon Sherratt, Nilanjan Dey, Amit Joshi, 2019 The book includes selected high-quality research papers presented at the Third International Congress on Information and

Communication Technology held at Brunel University, London on February 27-28, 2018. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IOT), and e-mining. Written by experts and researchers working on ICT, the book is suitable for new researchers involved in advanced studies.

A Parent's Guide to Understanding Social Media

Mark Oestreicher, Adam McLane, 2012-12 With each passing day, teenagers' lives become increasingly intertwined with social media. How can you help your child make wise decisions and remain safe online? How can you stay informed and involved in healthy ways?

Sexting and Youth Todd C. Hiestand, W. Jesse Weins, 2014 Sexting among youth, the use of mobile technology to create and share sexual content and sexually explicit images of themselves and peers, has become a notable issue in recent years in the fields of social science, law, and public policy. This text synthesizes research findings and presents a comprehensive review of the topic in a multidisciplinary format. It is a timely and readable book fit for use in undergraduate and graduate classrooms, as well as college and public libraries. Sexting and Youth offers students and scholars a tool for understanding recent developments in this previously uncharted area, making contributions in the relevant fields and subfields of the topic. Chapters review introductory matters like the concepts and context

surrounding youth sexting and the results of prevalence studies and the research methodologies used in determining the number of youths engaging in sexting. Chapters then consider social science matters like personal and behavioral motivations, adolescent sexual development and risky behavior associations, as well as cultural and sociological facets such as sex and technology and media activity and impact. The text concludes with chapters that analyze possible formal and informal social control techniques, including justice system issues, alternative responses or approaches, constitutional and privacy concerns, civil liability and tort questions, and education system liability. Bringing together many perspectives and reviewing theory and research from a variety of disciplines, this text presents youth sexting with new clarity, while exposing all of its complexity. It is the first of its kind, a comprehensive and multidisciplinary review of the topic. Contributing authors include, among others, researchers and faculty from the University of Texas Medical Branch and UT Prevention Research Center, The Ohio State University, University of Louisville (Brandeis) School of Law, and the Australian Institu

Measuring User Engagement Mounia Lalmas, Heather O'Brien, Elad Yom-Tov, 2022-05-31 User engagement refers to the quality of the user experience that emphasizes the positive aspects of interacting with an online application and, in particular, the desire to use that application longer and repeatedly. User engagement is a key concept in the design of online applications (whether for

desktop, tablet or mobile), motivated by the observation that successful applications are not just used, but are engaged with. Users invest time, attention, and emotion in their use of technology, and seek to satisfy pragmatic and hedonic needs. Measurement is critical for evaluating whether online applications are able to successfully engage users, and may inform the design of and use of applications. User engagement is a multifaceted, complex phenomenon; this gives rise to a number of potential measurement approaches. Common ways to evaluate user engagement include using self-report measures, e.g., questionnaires; observational methods, e.g. facial expression analysis, speech analysis; neuro-physiological signal processing methods, e.g., respiratory and cardiovascular accelerations and decelerations, muscle spasms; and web analytics, e.g., number of site visits, click depth. These methods represent various trade-offs in terms of the setting (laboratory versus 'in the wild'), object of measurement (user behaviour, affect or cognition) and scale of data collected. For instance, small-scale user studies are deep and rich, but limited in terms of generalizability, whereas large-scale web analytic studies are powerful but negate users' motivation and context. The focus of this book is how user engagement is currently being measured and various considerations for its measurement. Our goal is to leave readers with an appreciation of the various ways in which to measure user engagement, and their associated strengths and weaknesses. We emphasize the multifaceted nature of user

engagement and the unique contextual constraints that come to bear upon attempts to measure engagement in different settings, and across different user groups and web domains. At the same time, this book advocates for the development of ``good'' measures and good measurement practices that will advance the study of user engagement and improve our understanding of this construct, which has become so vital in our wired world.

Contagious Jonah Berger, 2016-05-03 Upper Saddle River, N.J. : Creative Homeowner,

New Femininities R. Gill, C. Scharff, 2013-05-31 This collection of original essays looks at the way in which experiences and representations of femininity are changing, and explores the possibilities for producing 'new' femininities in the twenty-first century. The volume includes a Preface by leading feminist scholar Angela McRobbie.

Cyber-Bullying Shaheen Shariff, 2008-03-14 This book looks in depth at the emerging issue of cyber-bullying. In this increasingly digital world cyber-bullying has emerged as an electronic form of bullying that is difficult to monitor or supervise because it often occurs outside the physical school setting and outside school hours on home computers and personal phones. These web-based and mobile technologies are providing young people with what has been described as: 'an arsenal of weapons for social cruelty'. These emerging issues have created an urgent need for a practical book grounded in comprehensive scholarship that addresses the policy-vacuum and provides practical educational responses to cyber-

bullying. Written by one of the few experts on the topic Cyber-Bullying develops guidelines for teachers, head teachers and administrators regarding the extent of their obligations to prevent and reduce cyber-bullying. The book also highlights ways in which schools can network with parents, police, technology providers and community organizations to provide support systems for victims (and perpetrators) of cyber-bullying.

EBOOK: Girls And Education 3-16: Continuing Concerns, New Agendas Carolyn Jackson, Carrie Paechter, Emma Renold, 2010-01-16 This is a book to own, read and re-read for its insights and which should then provoke us to act so that all children at school are able to enjoy and benefit from education. Professor Debbie Epstein, Cardiff University, UK, Editor, Gender and Education This excellent book offers evidence from a rich vein of research covering all aspects of girls' and young women's experiences of education, in and out of school, and is therefore an absolute must for all involved in teaching, learning, researching and policy-making on gender. Professor Gaby Weiner, University of Edinburgh, UK Countering claims that we live in 'post-feminist' times in which girls 'have it all' and can do, and be, whatever they like, this book explores some of the current concerns of, and about, girls today. Issues relating to girls' schooling and femininities have been sidelined and depoliticised in recent education agendas. Yet questions and concerns relating to schoolgirls' lives and experiences deserve immediate attention. Not all girls are academically successful; many girls face exclusion

in schools; career aspirations are still gendered; rates of smoking and drinking alcohol are high amongst some groups of girls. With contributions from leading researchers in gender and education, this book: Draws on cutting edge research to consider ongoing problems and explore new agendas. Includes contributions relating to the entire 3-16 year age range. Considers both the within- and out-of-school experiences of girls, and locates them within wider debates about gender anxieties in contemporary education. This topical collection highlights the main issues faced by girls in Britain today, and endeavours to put girls back on the educational agenda. It is essential reading for students, academics and researchers in education, sociology, and girls' studies, as well as for school teachers and education policy makers. Contributors: Alexandra Allan, Sheryl Clark, Fin Cullen, Jannette Elwood, Becky Francis, Rosalyn George, Valerie Hey, Laura Hills, Jean Kane, Gwynedd Lloyd, Jackie Marsh, Barbara Martin, Gillean McCluskey, Emma Renold, Sheila Riddell, Jessica Ringrose, Farzana Shain, Joan Stead, Elisabet Weedon

Sexting Panic Amy Adele Hasinoff, 2015-02-28
Sexting Panic illustrates that anxieties about technology and teen girls' sexuality distract from critical questions about how to adapt norms of privacy and consent for new media. Though mobile phones can be used to cause harm, Amy Adele Hasinoff notes that the criminalization and abstinence policies meant to curb sexting often fail to account for distinctions between consensual sharing and malicious distribution.

Challenging the idea that sexting inevitably victimizes young women, Hasinoff argues for recognizing young people's capacity for choice and encourages rethinking the assumption that everything digital is public. Timely and engaging, *Sexting Panic* analyzes the debates about sexting while recommending realistic and nuanced responses.

The Psychology of the Selfie Barrie

Gunter, 2021-09-01 *The Psychology of the Selfie* provides a comprehensive overview and analysis of research on the significance of selfies, offering insights into the topic from a psychological perspective and examining important issues such as body image, self-objectification, mental health and psychological benefits. Selfies are a worldwide phenomenon. Although dismissed by critics as a sign of self-absorbed narcissism, they are also a social currency that maintains and reinforces friendships, a feedback loop for self-identity affirmation, a promotional tool for gaining social influence, and a method for preserving memories of life events. In this book, Barrie Gunter expertly explores the psychological underpinnings of the contemporary global phenomenon of selfies, from the historical roots and meteoric rise due to technical advancements, to the different personality types of selfie-takers, to social relationships, to group and personal identity. Looking at both the psychological nature and impact of selfies, this book reviews different psychological outcomes for selfie-takers, both positive and negative, and the growth in psychological and physical problems that

can sometimes arise. Presenting a comprehensive analysis specifically of selfie behaviour, this book is an essential reference for students and researchers in communications and media, journalism, information studies, psychology and sociology, as well as anyone with a general interest in the phenomenon.

A Networked Self Zizi Papacharissi, 2010-09-10 A Networked Self examines self presentation and social connection in the digital age. This collection brings together new work on online social networks by leading scholars from a variety of disciplines. The focus of the volume rests on the construction of the self, and what happens to self-identity when it is presented through networks of social connections in new media environments. The volume is structured around the core themes of identity, community, and culture – the central themes of social network sites. Contributors address theory, research, and practical implications of many aspects of online social networks including self-presentation, behavioral norms, patterns and routines, social impact, privacy, class/gender/race divides, taste cultures online, uses of social networking sites within organizations, activism, civic engagement and political impact.

The Third Wave Steve Case, 2017-04-18 Steve Case, co-founder of America Online (AOL) and one of America's most accomplished entrepreneurs, shares a roadmap for how anyone can succeed in a world of rapidly changing technology. We are entering, he explains, a new paradigm called the Third Wave of the Internet. The first wave saw AOL and other

companies lay the foundation for consumers to connect to the Internet. The second wave saw companies like Google and Facebook build on top of the Internet to create search and social networking capabilities, while apps like Snapchat and Instagram leverage the smartphone revolution. Now, Case argues, we're entering the Third Wave: a period in which entrepreneurs will vastly transform major real world sectors like health, education, transportation, energy, and food-and in the process change the way we live our daily lives.

Privacy in the Modern Age Marc Rotenberg, Jeramie Scott, Julia Horwitz, 2015-05-12 The threats to privacy are well known: the National Security Agency tracks our phone calls; Google records where we go online and how we set our thermostats; Facebook changes our privacy settings when it wishes; Target gets hacked and loses control of our credit card information; our medical records are available for sale to strangers; our children are fingerprinted and their every test score saved for posterity; and small robots patrol our schoolyards and drones may soon fill our skies. The contributors to this anthology don't simply describe these problems or warn about the loss of privacy—they propose solutions. They look closely at business practices, public policy, and technology design, and ask, "Should this continue? Is there a better approach?" They take seriously the dictum of Thomas Edison: "What one creates with his hand, he should control with his head." It's a new approach to the privacy debate, one that assumes privacy is worth protecting, that

there are solutions to be found, and that the future is not yet known. This volume will be an essential reference for policy makers and researchers, journalists and scholars, and others looking for answers to one of the biggest challenges of our modern day. The premise is clear: there's a problem—let's find a solution.

Thinking with Theory in Qualitative Research

Alecia Youngblood Jackson, Lisa A Mazzei, 2011-12-02

Winner of the 2013 American Educational Studies Association's Critics Choice Award! Thinking With Theory In Qualitative Research shows how to use various philosophical concepts in practices of inquiry; effectively opening up the process of data analysis in qualitative research. It uses a common data set and utilizes various theoretical perspectives through which to view the data. It challenges qualitative researchers to use theory to accomplish a rigorous, analytic reading of qualitative data. Plugging in the theory and the data produces a variety of readings applying various theorists and their concepts, including: Derrida - Deconstruction Spivak – Postcolonial Marginality Foucault - Power/Knowledge Butler - Performativity Deleuze – Desire Barad – Material Intra-activity Thinking With Theory In Qualitative Research pushes against traditional qualitative

data analysis such as mechanistic coding, reducing data to themes, and writing up transparent narratives. These do little to critique the complexities of social life; such simplistic approaches preclude dense and multi-layered treatment of data. It shows that thinking with theory pushes research and data and theory to its exhaustion in order to produce knowledge differently. By refusing a closed system for fixed meaning, a new analytic is engaged to keep meaning on the move. The result is an extension of thought beyond an easy sense. Special features of the book include schematic cues to help guide the reader through what might be new theoretical terrain, interludes that explain the possibilities of thinking with a particular concept and theorist and detailed chapters that plug the same data set into a specific concept. This vital tool will help researchers understand and fully utilize their powers of data analysis and will prove invaluable to both students and experienced researchers across all of the social sciences.

Researching Children's Experience Sheila Greene, Diane Hogan, 2005-01-13 `Strongly recommended as it provides a very useful overview of a range of methods, mainly textual, for exploring children's experiences. These accounts are placed well in the broader conceptual frameworks concerning both methodologies and ethical considerations' - Educational Review How should the researcher approach the sensitive subject of the child? What are the ethical issues involved in researching children's experiences? In essays written by a collection of key,

international authors, *Researching Children's Experience* addresses these questions, and examines up-to-date methodological and conceptual approaches to researching children. This book is a practical, comprehensive and interdisciplinary guide for advanced students and researchers, exploring a range of studies, and the theoretical and ethical motivations behind them. The book is divided into three coherent sections: - Conceptual, methodological and ethical issues in researching children's experiences. - Methods for conducting research with children. - The generation and analysis of text. *Researching Children's Experience* provides examples of how researchers from a variety of social science perspectives have set about carrying out research into children's experience. Useful to students embarking on a research project, and to experienced researchers wishing to explore new methods, Greene and Hogan's book is an essential addition to anyone doing research on children. It will be especially useful to those in developmental psychology, education, nursing and other disciplines interested in studying children's experience.

Learning Bodies Julia Coffey, Shelley Budgeon, Helen Cahill, 2016-02-03 '*Learning Bodies*' addresses the lack of attention paid to the body in youth and childhood studies. Whilst a significant range of work on this area has explored gender, class, race and ethnicity, and sexualities – all of which have bodily dimensions – the body is generally studied indirectly, rather than being the central focus. This collection of

papers brings together a scholarly range of international, interdisciplinary work on youth, with a specific focus on the body. The authors engage with conceptual, empirical and pedagogical approaches which counteract perspectives that view young people's bodies primarily as 'problems' to be managed, or as sites of risk or deviance. The authors demonstrate that a focus on the body allows us to explore a range of additional dimensions in seeking to understand the experiences of young people. The research is situated across a range of sites in Australia, North America, Britain, Canada, Asia and Africa, drawing on a range of disciplines including sociology, education and cultural studies in the process. This collection aims to demonstrate – theoretically, empirically and pedagogically – the implications that emerge from a reframed approach to understanding children and youth by focusing on the body and embodiment.

Proceedings of Sixth International Congress on Information and Communication Technology Xin-She Yang, Simon Sherratt, Nilanjan Dey, Amit Joshi, 2021-09-23 This book gathers selected high-quality research papers presented at the Sixth International Congress on Information and Communication Technology, held at Brunel University, London, on February 25–26, 2021. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of things (IoT) and e-mining. The Visual Worlds of Social Network Sites Ulla Autenrieth, Klaus Neumann-Braun, 2011 The central form of communication on social network sites (sns) is the communication with and through images. Accordingly, the present volume highlights images and image-based communication on sns, such as Facebook, and on nightlife platforms, such as Tillllate. First, the authors analyze the two central image categories in depth - profile images and photo albums. What follows is the portrayal of dramaturgical and staging strategies of the (semi) professional photography on the nightlife platforms, which leads to an evaluation of the importance of the international glamour photography as a parameter of private photographic self-expression. Other questions that the authors ponder in the volume are: Which functions and meanings do images have for the communications between users on social network sites? To what extent could certain design characteristics in the image-based communication on sns establish themselves as prototypical staging patterns? Which staging traditions are followed thereby? Which staging strategies are followed on different online platforms by the users' (self) visualizations?
