Routledge Handbook of Politics and Technology Ulrich Hilpert,2015-10-05 This handbook provides a comprehensive global survey of the politics of technology. Written by an outstanding line up of distinguished scholars in the field, the handbook covers all aspects of the relationship between politics and technology including: Demand and

support for new technologies and innovation by the state The effects of technology policies
Technology development and innovation difference between various countries and regions Policy instruments and techno-industrial innovation
Dynamism and change as outcomes of government policies Driving forces for science and innovative development Forming the basis of this handbook are examples of regional development, country studies and a rich variety of technologies, as well as topical issues such as divergent political interests in relation to technology and the economic exploitation of technologies. Employing a comparative and interdisciplinary approach in order to analyse the interplay between government activities and the development of new technologies, this handbook will be an invaluable resource for all students, scholars and practitioners working in the politics of technology, public policy and policy analysis.

Optical Techniques Gerald Oster, Arthur W. Pollister, 2013-09-03 Physical Techniques in Biological Research, Volume I: Optical Techniques focuses on improvements in physical techniques used in biological research on cells and tissues. The selection first discusses photochemistry and luminescence and light scattering, including applications of luminescence, theory of light scattering and its applications, and light scattering apparatus. The text then examines absorption spectroscopy, ultraviolet absorption spectrophotometry, and infrared spectrophotometry. Discussions focus on factors involved in data gathering, empirical correlation between molecular structure and absorption spectra, buffers for ultraviolet absorption spectrophotometry, instrumentation and techniques, and interpretation of data. The text ponders on the light microscope and phase and interference microscopy, as well as the optical and mechanical systems of microscopes;

wave nature of light and its consequences; purposes of phase and interference microscopy; and principles of phase microscopy. The publication also reviews birefringence and dichroism and electron microscopy. The selection is highly recommended for students and readers interested in the physical techniques used in biological research.

Stress, Coping and Depression Sheri L.

Johnson, Adele M. Hayes, Tiffany M. Field, Neil Schneiderman, Philip McCabe, 1999-12-01 Stress, Coping, and Depression is the latest volume based on the Annual Stress and Coping Conference held at the University of Miami. In this timely collection, leading researchers offer a variety of new perspectives on depression. They review the social, biological, and psychological processes that put adults and their children at risk and discuss innovative treatments grounded in empirical studies. Research findings are integrated across domains to construct more effective models of etiology and intervention. The contributors' thought-provoking ideas will provide inspiration for the ongoing efforts addressing the problems associated with this devastating disorder. Content highlights include: * novel information processing approaches to depression; * an overview of the neural pathways guiding moods; * empirical approaches for the treatment of bipolar disorders; * integrated models of biological and environmental influences on the transmission of depression to children; and * new perspectives on the relationship between personality and stress.
