John G. Horgan

The Psychology of Terrorism John G. Horgan, 2014-06-16 This new edition of John Horgan's critically acclaimed book is fully revised and expanded. The book presents a critical analysis of our existing knowledge and understanding of terrorist psychology. Despite the on-going search for a terrorist pathology, the most insightful and evidence-based research to date not only illustrates the lack of any identifiable psychopathology in terrorists, but demonstrates how frighteningly 'normal' and unremarkable in psychological terms are those who engage in terrorist activity. By producing a clearer map of the processes that impinge upon the individual terrorist, a different type of terrorist psychology emerges, one which has clearer implications for efforts at countering and disrupting violent extremism in today's world. In this 2nd edition, Horgan further develops his approach to the arc of terrorism by delving deeper into his IED model of Involvement, Engagement and Disengagement – the three phases of terrorism experienced by every single terrorist. Drawing on new and exciting research from the past decade, with new details from interviews with terrorists ranging from al-Qaeda to left-wing revolutionaries, biographies and autobiographies of former terrorists, and insights from historic and contemporary terrorist attacks since 2005, Horgan presents a fully revised and expanded edition of his signature text. This new edition of *The Psychology of Terrorism* will be essential reading for students of terrorism and political violence, and counterterrorism studies, and recommended for forensic psychology, criminology, international security and IR in general.

American Sniper Chris Kyle,Scott McEwen,Jim DeFelice,2012-01-03 The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood’s blockbuster, Academy-Award nominated movie. “An amazingly detailed account of fighting in Iraq--a humanizing, brave story that’s extremely readable.” — PATRICIA CORNWELL, New York Times Book Review Jaw-dropping...Undeniably riveting. —RICHARD ROEPER, Chicago Sun-Times From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him “The Legend”; meanwhile, the enemy feared him so much they named him al-Shaitan (“the devil”) and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle’s masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

Security and Privacy John Kleinig,Seumas Miller,Peter Mameli,Douglas Salane,Adina Schwartz,2011-12-01 This study is principally concerned with the ethical dimensions of identity management technology - electronic surveillance, the mining of personal data, and profiling - in the context of transnational crime and global terrorism. The ethical challenge at the heart of this study is to establish an acceptable and sustainable equilibrium between two central moral values in contemporary liberal democracies, namely, security and privacy. Both values are essential to individual liberty, but they come into conflict in times when civil order is threatened, as has been the case from late in the twentieth century, with the advent of global terrorism and trans-national crime. We seek to articulate legally sustainable, politically possible, and technologically feasible, global ethical standards for identity management technology and policies in liberal democracies in the contemporary global security context. Although the standards in question are to be understood as global ethical standards potentially to be adopted not only by the United States, but also by the European Union, India, Australasia, and other contemporary liberal democratic states, we take as our primary focus the tensions that have arisen between the United States and the European Union.

The Human Rights Industry Alfred de Zayas,2023-08-01 The promotion and protection of human rights is a pillar of the United Nations, enshrined in the Charter, the international bill of rights, elaborated in General Assembly resolutions and declarations, and buttressed by monitoring mechanisms and regional human rights courts. After WWII the world demanded respect for collective and individual rights and freedoms, including the right to live in peace, i.e.freedom from fear and want, the right to food, water, health, shelter, belief and expression. Human dignity was understood as an inalienable entitlement of every member of the human family, rights that were juridical. justiciable and enforceable. It did not take long for these noble goals to be politicized. Many States systematically weaponize human rights for geopolitics. A “human rights industry” operates at all levels and instrumentalizes values with the complicity of diplomats, politicians, non-governmental organizations, academics, journalists, -independent experts-, rapporteurs, secretariat members and media conglomerates. This book addresses the decisive role played by major governmental and private agencies such as the National Endowment for Democracy, USAID, elite think tanks, Council on Foreign Relations, Trilateral Commission, World Economic Forum and others in shaping a “perception” of human rights that primarily serves geopolitical interests. Major non-governmental organizations that once were truly independent, including Amnesty and HRW, today belong to the leading narrative managers. The voting record in the General Assembly and Human Rights Council by China, Russia, the United States, Canada, UK, EU, OIC, Group of 77, Non-aligned movement, etc. documents who supports and who subverts human rights. Why do the Council and NGOs practice double-standards and allow States to brazenly lie, blackmail and bully weaker States? Under the pretext of providing humanitarian assistance, lethal military interventions are conducted, e.g. in Libya, emblematic example of how the noble idea of the “responsibility to protect” was corrupted. Propagandistic use of the words “human rights”, “democracy”, “rule of law”, freedom - demean them and subvert rational discourse. Drawing on more than four decades of working in the field of human rights as UN staff member, rapporteur, consultant, professor and NGO president, Alfred de Zayas examines how the tools of implementation of human rights serve to entrench political narratives promoted by the “industry”.

Accountability for Mass Starvation Bridget Conley, Alex de Waal, Catriona Murdoch, Wayne Jordash QC, 2022-08-25 Famine is an age-old scourge that almost disappeared in our lifetime. Between 2000 and 2011 there were no famines and deaths in humanitarian emergencies were much reduced. The humanitarian agenda was ascendant. Then, in 2017, the United Nations identified four situations that threatened famine or breached that threshold in north-eastern Nigeria, Somalia, South Sudan, and Yemen. Today, this list is longer. Each of these famines is the result of military actions and exclusionary, authoritarian politics conducted without regard to the wellbeing or even the survival of people. Violations of international law including blockading ports, attacks on health facilities, violence against humanitarian workers, and obstruction of relief aid are carried out with renewed impunity. Yet there is an array of legal offenses, ranging from war crimes and crimes against humanity to genocide, available to a prosecutor to hold individuals to account for the deliberate starvation of civilians. However, there has been a dearth of investigations and accountability for those violating international law. The reasons for this neglect and the gaps between the black-letter law and practice are explored in this timely volume. It provides a comprehensive overview of the key themes and cases required to catalyze a new approach to understanding the law as it relates to starvation. It also illustrates the complications of historical and ongoing situations where starvation is used as a weapon of war, and provides expert analysis on defining starvation, early warning systems, gender and mass starvation, the use of sanctions, journalistic reporting, and memorialization of famine.
