North American Industry Classification System (NAICS) Reprint United States 2017 Edition Brian Greul,2021-01-17 The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. It is a joint work between the United States, Canada, and Mexico that allows a high level of comparability between the countries. The NAICS officially replaced the SIC (Standard Industrial Classification) system in 1997. The publisher has included the SBA Size Standards Table as an appendix at the back of this book to assist users of the data. Should you have suggestions or feedback on ways to improve this book please send email to Books@OcotilloPress.com If you would like to order a copy of this book as a 3 ring punched looseleaf print please contact Books@OcotilloPress.com

International Financial Statistics, September 2015 International Monetary Fund. Statistics Dept.,2015-08-28 This September issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of international and domestic finance. Official BPM6 Basis Data Availability table is now included in the Balance of Payments and International Investment Position Statistics section of the Introduction. Balance of Payments Statistics Yearbook contains two sections; World and Regional Tables, and Country Tables. The first section presents 21 world and regional tables for major components of the balance of payments, net International Investment Position (IIP), and total financial assets and total liabilities for the IIP. The second section provides detailed tables on balance-of-payments statistics for 189 economies and IIP data for 143 economies.

World Economic Outlook, April 2015 International Monetary Fund. Research Dept.,2015-04-14 Global growth remains moderate and uneven, and a number of complex forces are shaping the outlook. These include medium- and long-term trends, global shocks, and many country- or region-specific factors. The April 2015 WEO examines the causes and implications of recent trends, including lower oil prices, which are providing a boost to growth globally and in many oil-importing countries but are weighing on activity in oil-exporting countries, and substantial changes in exchange rates for major currencies, reflecting variations in country growth rates and in exchange rate policies and the lower price of oil. Additionally, analytical chapters explore the growth rate of potential output across advanced and emerging market economies, assessing its recent track and likely future course; and the performance of private fixed investment in advanced economies, which has featured prominently in the public policy debate in recent years, focusing on the role of overall economic weakness in accounting for this performance.
