*The Discourse of Protest, Resistance and Social Commentary in Reggae Music* Elizabeth Turner,2021-09-30 A comprehensive, engaging and timely Bakhtinian examination of the ways in which the music and lyrics of Pacific reggae, aspects of performance, a record album cover and the social and political context construct social commentary, resistance and protest. Framed predominantly by the theory and philosophy of Russian literary theorist Mikhail Bakhtin, this innovative investigation of the discourse of Pacific reggae in New Zealand produces a multi-faceted analysis of the dialogic relationships that create meaning in this genre of popular music. It focuses on the award-winning EP What's Be Happen? by the band Herbs, which has been recognised for its ground-breaking music and social commentary in the early 1980s. Herbs' songs address the racism and ideology of the apartheid regime in South Africa and the relationship between sport and politics, as well as universally relevant conflicts over race relations, the experiences of migrants, and the historic and ongoing loss of indigenous people's lands. The book demonstrates the striking compatibility between Bakhtin's theorisation of utterances as ethical acts and reggae music, along with the Rastafari philosophy that underpins it, which speaks of resistance to social injustice, of ethical values

and the kind of society people seek to achieve. It will appeal to a cross-disciplinary audience of scholars in Bakhtin studies; discourse analysis; popular cultural studies; the literary analysis of popular music and lyrics, and those with an interest in the culture and politics of Aotearoa New Zealand and the Pacific region. Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Shake, Rattle and Roll: Yugoslav Rock Music and the Poetics of Social Critique** Dalibor Mišina, 2016-04-01 From the late-1970s to the late-1980s rock music in Yugoslavia had an important social and political purpose of providing a popular cultural outlet for the unique forms of socio-cultural critique that engaged with the realities and problems of life in Yugoslav society. The three music movements that emerged in this period - New Wave, New Primitives, and New Partisans - employed the understanding of rock music as the 'music of commitment' (i.e. as socio-cultural praxis premised on committed social engagement) to articulate the critiques of the country's 'new socialist culture', with the purpose of helping to eliminate the disconnect between the ideal and the reality of socialist Yugoslavia. This book offers an analysis of the three music movements and their particular brand of 'poetics of the present' in order to explore the movements' specific forms of socio-cultural engagement with Yugoslavia's 'new socialist culture' and demonstrate that their cultural praxis was oriented towards the goal of realizing the genuine Yugoslav socialist-humanist community 'in the true measure of man'. Thus, the book's principal argument is that the driving force behind the music of commitment was, although critical, a fundamentally constructive disposition towards the progressive ideal of socialist Yugoslavia.

**Music and Messaging in the African Political Arena** Onyebadi, Uche T., 2019-01-15 Political campaigning affects numerous realms under the communication umbrella with each channel seeking to influence as many individuals as possible. In higher education, there is a growing scholarly interest in communication issues and subjects, especially on the role of music, in the political arena. Music and Messaging in the African Political Arena provides innovative insights into providing music and songs as an integral part of sending political messages to a broader spectrum of audiences, especially during political campaigns. The content within this publication covers such topics as framing theory, national identity, and ethnic politics, and is designed for politicians, campaign managers, political communication scholars, researchers, and students.

**Give Peace a Chant** Dario Martinelli, 2017-02-13 This monograph offers a unique analysis of social protest in popular music. It presents theoretical descriptions, methodological tools, and an approach that encompasses various fields of musicology, cultural studies, semiotics, discourse analysis, media studies, and political and social sciences. The author argues that protest songs should be taken as a musical genre on their own. He points out that the general approach, when discussing these songs, has been so far that of either analyzing the lyrics or the social context. For some reason, the music itself has been often overlooked. This book attempts to fill this gap. Its central thesis is that a complete overview of these repertoires demands a thorough interaction among contextual, lyrical, and musical elements together. To accomplish this, the author develops a novel model that systemizes and investigates musical repertoires. The model is then applied to four case studies, those, too, chosen among topics that are little (or not at all) frequented by scholars.

**Songs about Politics and Protest** Gini Scott, 2021-01-10 Songs about Politics and Protest features 11 songs about political struggles, protesting, and the future, inspired by the growing problems of economic inequality, homelessness, and other issues that have led to protests around the world. Yet the songs also express hope for positive social change. The songs are recorded in a mix of country and pop styles. The book includes the lyrics, illustrations, and a link to the recording on YouTube for each song, so the reader can hear the recording, and even sing along with the lyrics. The illustrations feature the cover image for each song. All of the recordings are distributed through SongTradr to major music retail outlets, including iTunes, Spotify, TikTok, Twitch, Network TV, and others. The songs that featured in this book are these: Social Problems and Protests They're Losing Their Homes Fighting to Be Free There Are Growing Protests Viva The Revolution Political Turmoil and Power Struggles Are We Gonna Have a Civil War? They're Playing Political Games What If a Loser Refuses to Lose? He Lost, He Lost When a King Goes Mad The Changes Ahead So Many Things Are Going Away There's a New Day Coming GINI GRAHAM SCOTT, PhD is a writer, publisher, and film producer, who has published over 200 books, 50 for traditional publishers and 150 for her own company Changemakers Publishing, specializing in books on self-help, popular business, and social issues. She also writes, reviews, and ghostwrites books and scripts for clients. She has written and executive produced 10 feature films, documentaries, and TV series.

**Music, Lyrics, and Life** Mike Errico, 2021-11-15 Music, Lyrics, and Life is the songwriting class you always wish you'd taken, taught by the professor you always wish you'd had. It's a deep dive into the heart of questions asked by songwriters of all levels, from how to begin journaling to when you know that a song is finished. With humor and empathy, acclaimed singer-songwriter Mike Errico unravels both the mystery of songwriting and the logistics of life as a songwriter. For years, this set of tools, prompts, and ideas has inspired students on campuses including Yale, Wesleyan, Berklee,

Oberlin, and NYU's Clive Davis Institute of Recorded Music. Alongside his own lessons, Errico interviews the writers, producers, and A&R executives behind today's biggest hits and investigates the larger questions of creativity through lively conversations with a wide range of innovative thinkers: astrophysicist Janna Levin explains the importance of repetition, both in choruses and in the exploration of the universe; renowned painter John Currin praises the constraints of form, whether it's within a right-angled canvas or a three-minute pop song; bestselling author George Saunders unpacks the hidden benefit of writing, and revising, authentically; and much more. The result is that Music, Lyrics, and Life ends up revealing as much about the art of songwriting as it does about who we are, and where we may be going. This is a book for songwriters, future content creators, music lovers, and anyone who wants to understand how popular art forms are able to touch us so deeply. Mike Errico has honed these lessons over years of writing, performing, teaching, and mentoring, and no matter where you are on your songwriting journey, Music, Lyrics, and Life will help you build a creative world that's both intrinsic to who you are, and undeniable to whoever is listening.

*Music Data Mining* Tao Li,Mitsunori Ogihara,George Tzanetakis,2011-07-12 The research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data, such as styles, artists, lyrics, and reviews. Bringing together an interdisciplinary array of top researchers, Music Data Mining presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing. The book first covers music data mining tasks and algorithms and audio feature extraction, providing a framework for subsequent chapters. With a focus on data classification, it then describes a computational approach inspired by human auditory perception and examines instrument recognition, the effects of music on moods and emotions, and the connections between power laws and music aesthetics. Given the importance of social aspects in understanding music, the text addresses the use of the Web and peer-to-peer networks for both music data mining and evaluating music mining tasks and algorithms. It also discusses indexing with tags and explains how data can be collected using online human computation games. The final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining. The multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information. An excellent introduction to the field, this volume presents state-of-the-art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections.
