**Encyclopedia of Social Networks** George A. Barnett, 2011-09-07 Request a FREE 30-day online trial to this title at [www.sagepub.com/freetrial](http://www.sagepub.com/freetrial) This two-volume encyclopedia provides a thorough introduction to the wide-ranging, fast-developing field of social networking, a much-needed resource at a time when new social networks or communities seem to spring up on the internet every day. Social networks, or groupings of individuals tied by one or more specific types of interests or interdependencies ranging from likes and dislikes, or disease transmission to the old boy network or overlapping circles of friends, have been in existence for longer than services such as Facebook or YouTube; analysis of these networks emphasizes the relationships within the network. This reference resource offers comprehensive coverage of the theory and research within the social sciences that has sprung from the analysis of such groupings, with accompanying definitions, measures, and research. Featuring approximately 350 signed entries, along with approximately 40 media clips, organized alphabetically and offering cross-references and suggestions for further readings, this encyclopedia opens with a thematic Reader's Guide in the front that groups related entries by topics. A Chronology offers the reader historical perspective on the study of social networks. This two-volume reference work is a must-have resource for libraries serving researchers interested in the various fields related to social networks.

**The Oxford Handbook of Social Networks** Ryan Light, James Moody, 2020-11-20 While some social scientists may argue that we have always been networked, the increased visibility of networks today across economic, political, and social domains can hardly be disputed. Social networks fundamentally shape our lives and social network analysis has become a vibrant, interdisciplinary field of research. In *The Oxford Handbook of Social Networks*, Ryan Light and James Moody have gathered forty leading scholars in sociology, archaeology, economics, statistics, and information science, among others, to provide an overview of the theory, methods, and contributions in the field of social networks. Each of the thirty-three chapters in this Handbook moves through the basics of social network analysis aimed at those seeking an introduction to advanced and novel approaches to modeling social networks statistically. They cover both a succinct background to, and future directions for, distinctive approaches to analyzing social networks. The first section of the volume consists of theoretical and methodological approaches to social networks, such as visualization and network analysis, statistical approaches to networks, and network dynamics. Chapters in the second section outline how network perspectives have contributed substantively across numerous fields, including public health, political analysis, and organizational studies. Despite the rapid spread of interest in social network analysis, few volumes capture the state-of-the-art theory, methods, and substantive contributions featured in this volume. This Handbook therefore offers a valuable resource for graduate students and faculty new to networks looking to learn new approaches, scholars interested in an overview of the field, and network analysts looking to expand their skills or substantive areas of research.

**Internet Law** Michael O'Doherty, 2020-07-30 Shortlisted for DSBA Law Book of the Year Award 2020 The law in Ireland regarding causes of action involving the internet is a rapidly growing area of law and litigation. This book examines issues such as privacy, data protection, defamation, data

protection, crime, intellectual property and employment, all through the prism of online behaviour. This book examines key pieces of legislation such as the E-Commerce Directive, GDPR, and Defamation Act 2009; forthcoming legislation such as the Digital Content Directive and proposed Irish legislation to combat harmful online content. With Ireland being the European base of many international IT and tech firms such as Google, Facebook, LinkedIn, Amazon and Twitter, it is anticipated that the Irish courts will be the forum for many important cases in the near future. Internet Law provides a comprehensive overview of the state of the law in Ireland, EU Member States, and other common law countries such as Canada, Australia and New Zealand. And in such a fast-developing area of law, the book also anticipates many of the issues that will face courts in the near future. Key cases that this book considers include: Data protection: Google Spain [2014] – an in depth review of what exactly this case established, and the manner in which it has been interpreted in subsequent case law. Lloyd v Google [2019] – in which the English Court of Appeal made a significant finding about the availability of damages for non-pecuniary loss arising from the breach of a person's data protection rights. Defamation: Monroe v Hopkins [2017] – the first UK case to consider at length defamation on Twitter, with an in-depth analysis of meaning, identification and how to assess the degree of publication via that medium. Eva Glawischnig-Piesczek v Facebook [2019] – a significant recent decision of the CJEU on the liability of social media platforms for content posted by its users. Copyright: Sony Music v UPC [2018] – a Court of Appeal judgment on the duties of internet service providers to restrict the illegal downloading of copyright material by its customers. Land Nordrhein-Westfalen v Renckhoff [2018] – a recent decision of the CJEU on the nature of copyright protection attaching to photographs which are uploaded to the internet. Trade Marks: Interflora Inc v Marks and Spencer plc [2011] – a decision of the CJEU which analyses the rights of an advertiser to use the trade mark of a rival company when promoting its services on the Google Ads service. Employment: Barbulescu v Romania [2017] – a significant CJEU decision which sets out the restrictions to an employer's right to monitor the electronic communications of its employees. Privacy/ Harassment: CG v Facebook [2016], in which the Northern Ireland Court of Appeal considered the tort of harassment via social media, and the potential liability of Facebook for comments made by a user following notification of the alleged harassment. Evidence: Martin & Ors v Gabriele Giambrone P/A Giambrone & Law [2013] – one of several cases to consider the admissibility of evidence taken by a defendant from a plaintiff's social media account in order to question the latter's testimony.

**Animal Communication Networks** P. K. McGregor, 2005-03-31 Most animal communication has evolved and now takes place in the context of a communication network, i.e. several signallers and receivers within communication range of each other. This idea follows naturally from the observation that many signals travel further than the average spacing between animals. This is self evidently true for long-range signals, but at a high density the same is true for short-range signals (e.g. begging calls of nestling birds). This book provides a current summary of research on communication networks and appraises future prospects. It combines information from studies of several taxonomic groups (insects to people via fiddler crabs, fish, frogs, birds and mammals) and several signalling modalities (visual, acoustic and chemical signals). It also specifically addresses the many areas of interface between communication networks and other disciplines (from the evolution of human charitable behaviour to the psychophysics of signal perception, via social behaviour, physiology and mathematical models).

**Food Pedagogies** Dr Elaine Swan, Dr Rick Flowers, 2015-12-28 In recent years everyone from politicians to celebrity chefs has been proselytizing about how we should grow, buy, prepare, present, cook, taste, eat and dispose of food. In light of this, contributors to this book argue that food has become the target of intensified pedagogical activity across a range of domains, including schools, supermarkets, families, advertising and TV media. Illustrated with a range of empirical studies, this edited and interdisciplinary volume - the first book on food pedagogies - develops innovative and theoretical perspectives to problematize the practices of teaching and learning about food. While many different pedagogues - policy makers, churches, activists, health educators, schools, tourist agencies, chefs - think we do not know enough about food and what to do with it, the aims, effects and politics of these pedagogies has been much less studied. Drawing on a range of international studies, diverse contexts, genres and different methods, this book provides new sites of investigation and lines of inquiry. As a result of its broad ranging critical evaluation of 'food as classroom' and 'food as teacher', it provides theoretical resources for opening up the concept of pedagogy, and assessing the moralities and politics of teaching and learning about food in the classroom and beyond.

*Are Social Networking Sites Harmful?* Noah Berlatsky, 2014-10-23 How do we navigate a world in which social media data collection often seems to violate privacy? To what degree does social media encourage political reform and to what degree can it be used by authoritarian governments to suppress dissent? Social media complicates our social, cultural, and political lives in vast and often difficult-to-understand ways. Supporting critical thinking skills and text analysis, this informative anthology tackles issues related to social media. Readers are presented with a diverse spectrum of essays on social networking site issues such as privacy, addiction, personality disorders, and education.

*Developmental Science and the Holistic Approach* Lars R. Bergman, Robert B. Cairns, Lars-Goran Nilsson, Lars Nystedt, 2000 This book is the outcome of a symposium where leading researchers, mainly in developmental psychology, came together to discuss the implications of the emerging developmental science and the holistic approach. In doing this, the authors wanted to honor a distinguished colleague, David Magnusson, and his career-long contributions to this field. The purpose of the book is to discuss the profound implications for developmental science of the holistic paradigm, especially with regard to the individual development within psychology. Against the background of their own empirical, theoretical, or methodological research, the authors have tried to identify what is needed for the developmental theory and methods within this paradigm and discuss possibilities and limitations in relation to conventional approaches.

**Routledge Handbook of Indian Cinemas** K. Moti Gokulsing, Wimal Dissanayake, 2013-04-17 India is the largest film producing country in the world and its output has a global reach. After years of

marginalisation by academics in the Western world, Indian cinemas have moved from the periphery to the centre of the world cinema in a comparatively short space of time. Bringing together contributions from leading scholars in the field, this Handbook looks at the complex reasons for this remarkable journey. Combining a historical and thematic approach, the Handbook discusses how Indian cinemas need to be understood in their historical unfolding as well as their complex relationships to social, economic, cultural, political, ideological, aesthetic, technical and institutional discourses. The thematic section provides an up-to-date critical narrative on diverse topics such as audience, censorship, film distribution, film industry, diaspora, sexuality, film music and nationalism. The Handbook provides a comprehensive and cutting edge survey of Indian cinemas, discussing Popular, Parallel/New Wave and Regional cinemas as well as the spectacular rise of Bollywood. It is an invaluable resource for students and academics of South Asian Studies, Film Studies and Cultural Studies.
