Encyclopedia of Social Networks George A. Barnett, 2011-09-07 Request a FREE 30-day online trial to this title at www.sagepub.com/freetrial This two-volume encyclopedia provides a thorough introduction to the wide-ranging, fast-developing field of social networking, a much-needed resource at a time when new social networks or communities seem to spring up on the internet every day. Social networks, or groupings of individuals tied by one or more specific types of interests or interdependencies ranging from likes and dislikes, or disease transmission to the old boy network or overlapping circles of friends, have been in existence for longer than services such as Facebook or YouTube; analysis of these networks emphasizes the relationships within the network. This reference resource offers comprehensive coverage of the theory and research within the social sciences that has sprung from the analysis of such groupings, with accompanying definitions, measures, and research. Featuring approximately 350 signed entries, along with approximately 40 media clips, organized alphabetically and offering cross-references and suggestions for further readings, this encyclopedia opens with a thematic Reader's Guide in the front that groups related entries by topics. A Chronology offers the reader historical perspective on the study of social networks. This two-volume reference work is a must-have resource for libraries serving researchers interested in the various fields related to social networks.

The Oxford Handbook of Social Networks Ryan Light, James Moody, 2020-11-20 While some social scientists may argue that we have always been networked, the increased visibility of networks today across economic, political, and social domains can hardly be disputed. Social networks fundamentally shape our lives and social network analysis has become a vibrant, interdisciplinary field of research. In *The Oxford Handbook of Social Networks*, Ryan Light and James Moody have gathered forty leading scholars in sociology, archaeology, economics, statistics, and information science, among others, to provide an overview of the theory, methods, and contributions in the field of social networks. Each of the thirty-three chapters in this Handbook moves through the basics of social network analysis aimed at those seeking an introduction to advanced and novel approaches to modeling social networks statistically. They cover both a succinct background to, and future directions for, distinctive approaches to analyzing social networks. The first section of the volume consists of theoretical and methodological approaches to social networks, such as visualization and network analysis, statistical approaches to networks, and network dynamics. Chapters in the second section outline how network perspectives have contributed substantively across numerous fields, including public health, political analysis, and organizational studies. Despite the rapid spread of interest in social network analysis, few volumes capture the state-of-the-art theory, methods, and substantive contributions featured in this volume. This Handbook therefore offers a valuable resource for graduate students and faculty new to networks looking to learn new approaches, scholars interested in an overview of the field, and network analysts looking to expand their skills or substantive areas of research.

Social Media Listening and Monitoring for Business Applications Rao, N. Raghavendra, 2016-09-21 Social Media has

transformed the ways in which individuals keep in touch with family and friends. Likewise, businesses have identified the profound opportunities present for customer engagement and understanding through the massive data available on social media channels, in addition to the customer reach of such sites. Social Media Listening and Monitoring for Business Applications explores research-based solutions for businesses of all types interested in an understanding of emerging concepts and technologies for engaging customers online. Providing insight into the currently available social media tools and practices for various business applications, this publication is an essential resource for business professionals, graduate-level students, technology developers, and researchers.

Internet Law Michael O'Doherty, 2020-07-30 Shortlisted for DSBA Law Book of the Year Award 2020 The law in Ireland regarding causes of action involving the internet is a rapidly growing area of law and litigation. This book examines issues such as privacy, data protection, defamation, data protection, crime, intellectual property and employment, all through the prism of online behaviour. This book examines key pieces of legislation such as the E-Commerce Directive, GDPR, and Defamation Act 2009; forthcoming legislation such as the Digital Content Directive and proposed Irish legislation to combat harmful online content. With Ireland being the European base of many international IT and tech firms such as Google, Facebook, LinkedIn, Amazon and Twitter, it is anticipated that the Irish courts will be the forum for many important cases in the near future. Internet Law provides a comprehensive overview of the state of the law in Ireland, EU Member States, and other common law countries such as Canada, Australia and New Zealand. And in such a fast-developing area of law, the book also anticipates many of the issues that will face courts in the near future. Key cases that this book considers include: Data protection: Google Spain [2014] – an in depth review of what exactly this case established, and the manner in which it has been interpreted in subsequent case law. Lloyd v Google [2019] – in which the English Court of Appeal made a significant finding about the availability of damages for non-pecuniary loss arising from the breach of a person's data protection rights. Defamation: Monroe v Hopkins [2017] - the first UK case to consider at length defamation on Twitter, with an in-depth analysis of meaning, identification and how to assess the degree of publication via that medium. Eva Glawischnig-Piesczek v Facebook [2019] – a significant recent decision of the CJEU on the liability of social media platforms for content posted by its users. Copyright: Sony Music v UPC [2018] - a Court of Appeal judgment on the duties of internet service providers to restrict the illegal downloading of copyright material by its customers. Land Nordrhein-Westfalen v Renckhoff [2018] - a recent decision of the CJEU on the nature of copyright protection attaching to photographs which are uploaded to the internet. Trade Marks: Interflora Inc v Marks and Spencer plc [2011] - a decision of the CJEU which analyses the rights of an advertiser to use the trade mark of a rival company when promoting its services on the Google Ads service. Employment: Barbulescu v Romania [2017] - a significant CJEU decision which sets out the restrictions to an employer's right to monitor the electronic communications of its employees. Privacy/ Harassment: CG v Facebook [2016], in which the Northern Ireland Court of Appeal considered the tort of harassment via social media, and the potential liability of Facebook for comments made by a user following notification of the alleged harassment. Evidence: Martin & Ors v

Gabriele Giambrone P/A Giambrone & Law [2013]- one of several cases to consider the admissibility of evidence taken by a defendant from a plaintiff's social media account in order to question the latter's testimony.

The Oxford Handbook of Political Communication Kate Kenski, Kathleen Hall Jamieson, 2017 The Oxford Handbook of Political Communication provides contexts for viewing the field, examines political discourse, media, and interpersonal and small group political communication, and considers political communication's evolution inside the altered political communication landscape. Agendas for future research and innovation are presented.

Understanding Information Retrieval Systems Marcia J. Bates, 2011-12-20 In order to be effective for their users, information retrieval (IR) systems should be adapted to the specific needs of particular environments. The huge and growing array of types of information retrieval systems in use today is on display in Understanding Information Retrieval Systems: Management, Types, and Standards, which addresses over 20 typ

Health Care Management and the Law Donna K. Hammaker, Thomas M. Knadig, 2017-03-02 Health Care Management and the Law-2nd Edition is a comprehensive practical health law text relevant to students seeking the basic management skills required to work in health care organizations, as well as students currently working in health care organizations. This text is also relevant to those general health care consumers who are simply attempting to navigate the complex American health care system. Every attempt is made within the text to support health law and management theory with practical applications to current issues.

The SAGE Handbook of Political Communication Holli A Semetko, Margaret Scammell, 2012-07-15 This authoritative and comprehensive survey of political communication draws together a team of the world's leading scholars to provide a state-of-the-art review that sets the agenda for future study. It is divided into five sections: Part One: explores the macro-level influences on political communication such as the media industry, new media, technology,

and political systems Part Two: takes a grassroots perspective of the influences of social networks - real and online - on political communication Part Three: discusses methodological advances in political communication research Part Four: focuses on power and how it is conceptualized in political communication Part Five: provides an international, regional, and comparative understanding of political communication in its various contexts The SAGE Handbook of Political Communication is an essential benchmark publication for advanced students, researchers and practitioners in the fields of politics, media and communication, sociology and research methods.

Animal Communication Networks P. K. McGregor, 2005-03-31 Most animal communication has evolved and now takes place in the context of a communication network, i.e. several signallers and receivers within communication range of each other. This idea follows naturally from the observation that many signals travel further than the average spacing between animals. This is self evidently true for long-range signals, but at a high density the same is true for short-range signals (e.g. begging calls of nestling birds). This book provides a current summary of research on communication networks and appraises future prospects. It combines information from studies of several taxonomic groups (insects to people via fiddler crabs, fish, frogs, birds and mammals) and several signalling modalities (visual, acoustic and chemical signals). It also specifically addresses the many areas of interface between communication networks and other disciplines (from the evolution of human charitable behaviour to the psychophysics of signal perception, via social behaviour, physiology and mathematical models).

Learning PHP, MySQL, and JavaScript Robin Nixon, 2009-07-14 If you know HTML, this guide will have you building interactive websites quickly. You'll learn how to create responsive, data-driven websites with PHP, MySQL, and JavaScript, regardless of whether you already know how to program. Discover how the powerful combination of PHP and MySQL provides an easy way to build modern websites complete with dynamic data and user interaction. You'll also learn how to add JavaScript to create rich Internet applications and websites. Learning PHP, MySQL, and JavaScript explains each technology separately, shows you how to combine them, and introduces valuable web programming concepts, including objects, XHTML, cookies, and session management. You'll practice what you've learned with review questions in each chapter, and find a sample social networking platform built with the elements introduced in this book. This book will help you: Understand PHP essentials and the basics of object-oriented programming Master MySQL, from database structure to complex queries Create web pages with PHP and MySQL by integrating forms and other HTML features Learn about JavaScript, from functions and event handling to accessing the Document Object Model Use libraries and packages, including the Smarty web template system, PEAR program repository, and the Yahoo! Food Pedagogies Dr Elaine Swan, Dr Rick Flowers, 2015-12-28 In recent years everyone from politicians to celebrity chefs has been proselytizing about how we should grow, buy, prepare, present, cook, taste, eat and dispose of food. In light of this, contributors to this book argue that food has become the target of intensified pedagogical activity across a range of domains, including schools, supermarkets, families, advertising and TV media.

Illustrated with a range of empirical studies, this edited and interdisciplinary volume - the first book on food pedagogies - develops innovative and theoretical perspectives to problematize the practices of teaching and learning about food. While many different pedagogues - policy makers, churches, activists, health educators, schools, tourist agencies, chefs - think we do not know enough about food and what to do with it, the aims, effects and politics of these pedagogies has been much less studied. Drawing on a range of international studies, diverse contexts, genres and different methods, this book provides new sites of investigation and lines of inquiry. As a result of its broad ranging critical evaluation of 'food as classroom' and 'food as teacher', it provides theoretical resources for opening up the concept of pedagogy, and assessing the moralities and politics of teaching and learning about food in the classroom and beyond.

Social and Economic Networks Matthew O. Jackson, 2008 Jackson also describes the varied statistical and modeling techniques used to analyze social networks.

Developmental Science and the Holistic Approach Lars R. Bergman, Robert B. Cairns, Lars-Goran Nilsson, Lars Nystedt, 2000 This book is the outcome of a symposium where leading researchers, mainly in developmental psychology, came together to discuss the implications of the emerging developmental science and the holistic approach. In doing this, the authors wanted to honor a distinguished colleague, David Magnusson, and his career-long contributions to this field. The purpose of the book is to discuss the profound implications for developmental science of the holistic paradigm, especially with regard to the individual development within psychology. Against the background of their own empirical, theoretical, or methodological research, the authors have tried to identify what is needed for the developmental theory and methods within this paradigm and discuss possibilities and limitations in relation to conventional approaches.

Routledge Handbook of Indian Cinemas K. Moti Gokulsing, Wimal Dissanayake, 2013-04-17 India is the largest film

producing country in the world and its output has a global reach. After years of marginalisation by academics in the Western world, Indian cinemas have moved from the periphery to the centre of the world cinema in a comparatively short space of time. Bringing together contributions from leading scholars in the field, this Handbook looks at the complex reasons for this remarkable journey. Combining a historical and thematic approach, the Handbook discusses how Indian cinemas need to be understood in their historical unfolding as well as their complex relationships to social, economic, cultural, political, ideological, aesthetic, technical and institutional discourses. The thematic section provides an up-to-date critical narrative on diverse topics such as audience, censorship, film distribution, film industry, diaspora, sexuality, film music and nationalism. The Handbook provides a comprehensive and cutting edge survey of Indian cinemas, discussing Popular, Parallel/New Wave and Regional cinemas as well as the spectacular rise of Bollywood. It is an invaluable resource for students and academics of South Asian Studies, Film Studies and Cultural Studies.

ITNG 2021 18th International Conference on Information Technology-New Generations Shahram Latifi, 2021-06-04 This volume represents the 18th International Conference on Information Technology - New Generations (ITNG), 2021. ITNG is an annual event focusing on state of the art technologies pertaining to digital information and communications. The applications of advanced information technology to such domains as astronomy, biology, education, geosciences,

security, and health care are the among topics of relevance to ITNG. Visionary ideas, theoretical and experimental results, as well as prototypes, designs, and tools that help the information readily flow to the user are of special interest. Machine Learning, Robotics, High Performance Computing, and Innovative Methods of Computing are examples of related topics. The conference features keynote speakers, a best student award, poster award, service award, a technical open panel, and workshops/exhibits from industry, government and academia. This publication is unique as it captures modern trends in IT with a balance of theoretical and experimental work. Most other work focus either on theoretical or experimental, but not both. Accordingly, we do not know of any competitive literature.
