The Creation of Sustainable Value Guy McManus, Marcus Powe, 2009 To most people the term 'value' only relates to money. Value is much more than this and often occurs at three different levels - the individual, the organisation and the community. Creating sustainable value is the process of linking these three levels. The 'glue' that holds them together comprises the creative mindset and the tools of innovation, and when linked they can create enduring sustainable value.--P. 4.
