Planet Quest Ken Croswell,1999 Are we alone? In 1995 planet hunters discovered the first alien

solar system around a star like our own Sun. Ken Croswell tells the fascinating story of this discovery and the people who made it, then explores the possibility that one day we may have the technology to travel to different solar systems and find life.

The Solar System Ian Graham, 2019-12-15 The solar system can be a complicated topic, especially with young readers trying to obtain a grasp on this mind-boggling subject. However, this volume acts as an engaging primer to help young readers learn about the sun, the planets, and other aspects of the solar system. Challenging questions encourage readers to think about what they already know about the solar system. After a bit of self-query and pondering, they're provided with enlightening answers that also reinforce crucial concepts from the elementary science curriculum. They'll learn answers to where the sun goes at night, why the planets are different colors, why Earth is called Earth, and if there is life anywhere else.

Voyage Through the Solar System Catherine Barr, 2021-07-15 It's our own little corner of the universe, and it's amazing! In this guide to the solar system we live in—from our own Earth to the life-giving sun and far-off icy planets—readers will learn many fascinating facts and details about the planet we call home and all its neighbors. Diagrams, photographs, and artwork help young astronomy buffs make connections, and clear, informative text offers details on the history and science of our solar system.
