Inside Job Stephen Pizzo,Mary Fricker,Paul Muolo,2015-09-29 New York Times Bestseller: A history of the S&L scandal that caused a financial disaster for American taxpayers: “Hard to put down” (Library Journal). For most of the 20th century, savings and loans were an invaluable thread of the American economy. But in the 1970s, Congress passed sweeping financial deregulation at the insistence of industry insiders that allowed these once quaint and useful institutions to spread their taxpayer-insured assets into new and risky investments. The looser regulations and reduced federal oversight also opened the industry to an army of shady characters, white-collar criminals, and organized crime groups. Less than 10 years later, half the nation’s savings and loans were insolvent, leaving the American taxpayer on the hook for a large hunk of the nearly half a trillion dollars that had gone missing. The authors of Inside Job saw signs of danger long before the scandal hit nationwide. Decades after the savings and loan collapse, Inside Job remains a thrilling read and a sobering reminder that our financial institutions are more fragile than they appear.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide ‘perpetual opportunism’, as they are always with us. The authors show how the smartphone is more than an ‘app device’ and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people’s lives around the world.
