Super Deciders Claudio Feser, Daniella Laureiro-Martinez, Karolin Frankenberger, Stefan Brusoni, 2024-03-13 Dramatically improve the decisions you make every day using insights from the latest neuroscience We make hundreds of decisions daily, from small ones – such as what to wear today and how to drive to work – to big ones – such as the company strategy and whether to launch a restructuring program that may impact thousands of people. In business, studies suggest that company executives spend 40% of their time making decisions and that the effectiveness of their decisions largely drives the results of the companies that they lead. In *Super Deciders: The Science and Practice of Making Decisions in Dynamic and Uncertain Times*, a team of renown researchers and business advisors deliver an application of the latest advances in neuroscience to effectively making the most difficult decisions, those we make in dynamic environments, in situations of uncertainty when we need to predict outcomes, we're missing relevant information, time is scarce, and the environment is constantly changing. The book is written in three parts. In the first part, the book offers a practical framework for making effective decisions under uncertainty. In the second part, the book discusses approaches to effectively implement those decisions, thus managing change at every level, from the individual to the organizational. Finally, the book develops suggestions on how leaders can diagnose and improve – in themselves and in the people they lead – the cognitive abilities relevant to decision-making. You'll also find: An enlightening business narrative detailing the journey of a fictional leader of an international travel operator named Inuk. Six cases that put you into real-life situations of making difficult decisions and that help you assess your decision-making effectiveness. An accessible and fun introduction to the neuroscience of decision-making. Ideal for managers, executives, directors, and other business leaders, *Super Deciders* is a can't-miss decision-making playbook that you've been waiting for.

Smart Choices John S. Hammond, Ralph L. Keeney, Howard Raiffa, 2015-07-21 Become confident in your choices. Where should I live? Is it time to get a new job? Which job candidate should I hire? What business strategy should I pursue? We spend the majority of our lives making decisions, both big and small. Yet, even though our success is largely determined by the choices that we make, very few of us are equipped with useful

decision-making skills. Because of this, we often approach our choices tentatively, or even fearfully, and avoid giving them the time and thought required to put our best foot forward. In *Smart Choices*, John Hammond, Ralph Keeney, and Howard Raiffa—experts with over 100 years of experience resolving complex decision problems—offer a proven, straightforward, and flexible roadmap for making better and more impactful decisions, and offer the tools to achieve your goals in every aspect of your life. Their step-by-step, divide-and conquer approach will teach you how to:

- Evaluate your plans
- Break your potential decision into its key elements
- Identify the key drivers that are most relevant to your goals
- Apply systematic thinking
- Use the right information to make the smartest choice

Smart Choices doesn't tell you what to decide; it tells you how. As you routinely use the process, you'll become more confident in your ability to make decisions at work and at home. And, more importantly, by applying its time-tested methods, you'll make better decisions going forward. Be proactive. Don't wait until a decision is forced on you—or made for you. Seek out decisions that advance your long-term goals, values, and beliefs. Take charge of your life by making *Smart Choices* a lifetime habit.

Topics covered include policy problems formulated in terms of utility maximization such as benefit-cost, decision, and multi-attribute analysis, issues in the valuation of intangibles, uncertainty in policy analysis, selected topics in risk analysis and communication, limitations and alternatives to the paradigm of utility maximization, issues in behavioral decision theory, issues related to organizations and multiple agents, and selected topics in policy advice and policy analysis for government.

Unorthodox Lawmaking Barbara Sinclair,2016-06-22 Most major measures wind their way through the contemporary Congress in what Barbara Sinclair has dubbed “unorthodox lawmaking.” In this much-anticipated Fifth Edition of *Unorthodox Lawmaking*, Sinclair explores the full range of special procedures and processes that make up Congress's work, as well as the reasons these unconventional routes evolved. The author introduces students to the intricacies of Congress and provides the tools to assess the relative successes and limitations of the institution. This dramatically updated revision incorporates a wealth of new cases and examples to illustrate the changes occurring in congressional process. Two entirely new case study chapters—on the 2013 government shutdown and the 2015 reauthorization of the Patriot Act—highlight Sinclair's fresh analysis and the book is now introduced by a new foreword from noted scholar and teacher, Bruce I. Oppenheimer, reflecting on this book and Barbara Sinclair's significant mark on the study of Congress.

Why Study History? John Fea,2024-03-26 What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective, and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? Written by an accomplished historian, award-winning author, public evangelical spokesman, and respected teacher, this introductory textbook shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. John Fea shows that deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ. The first edition of this book has been used widely in Christian colleges across the country. The second edition provides an updated introduction to the study of history and the historian's vocation. The book has also been revised throughout and incorporates Fea's reflections on this topic from throughout the past 10 years.
