Analytical Bibliography of the Prehistory and the Early Dynastic Period of Egypt and Northern Sudan Stan Hendrickx, 1995 An analytical bibliography that contains 7407 references, covering the Egyptian prehistory (palaeolithic, neolithic and predynastic) as well as the period of the first two dynasties.

GeR4 Compounds and Ge(CH₃)₃ R Compounds up to Cyclic Alkyl Groups Frank Glockling, 2013-06-29 The present volume opens the Gmelin series on organogermanium compounds, that is, those compounds containing at least one germanium-to-carbon bond. This whole series is being coordinated by Professor J. Satge of the Universite Paul Sabatier in Toulouse. Germanium is of historical interest because its existence was predicted by Newlands in 1864 and by Mendeleeff in 1871 although it was not isolated until 1887 by Winkler. Mendeleeff's predictions of the properties of germanium and its compounds by comparison with what was known of the chemistry of its neighbors, silicon and tin, proved remarkably accurate and included predictions of the existence of organic derivatives GeR and of their properties. 4 Although significant applications are as yet lacking for organogermanium compounds in contrast to organo-silicon, -tin, and -lead compounds there has been considerable interest in the parallel development of its chemistry. Up to 1983 about 1500 publications have appeared on organogermanium chemistry. The material of the present series will be grouped in a similar way as for the organotin series beginning with compounds containing only one germanium atom (mononuclear compounds) and continuing with binuclear up to polynuclear compounds. Within each group the compounds are arranged by the kind of non-carbon substituents rather than by following the usual Gmelin principle of the last position using the Gmelin system of elements.

Ancient Conquest Accounts K. Lawson Younger, Jr., 1990-05-01 Works on Old Testament historiography, the 'Conquest', and the origins of ancient Israel have burgeoned in recent days. But while others have been issuing new reconstructions this novel work presents a close reading of the biblical text. The focus is on the literary techniques that ancient writers employed in narrating stories of conquest, and the aim is to pinpoint their communicative intentions in their own contexts. This reading is enhanced by engagement with the important discipline of the philosophy of history. Ancient Conquest accounts, replete with extensive quotations from Assyrian, Hittite and Egyptian conquest accounts, is a learned and methodologically sensitive study of a wide range of ancient Near Eastern texts as well as of Joshua 9-12.

Non-oxides / Nicht-Oxide M. Adachi, Y. Akishige, E. Nakamura, K. Deguchi, K. Gesi, T. Hikita, Y. Makita, T. Ikeda, M. Mitsui, E. Sawaguchi, T. Shigenari, I. Tatsuzaki, Y. Shiozaki, K. Toyoda, J. Harada, T. Yagi, T. Yamada, M. Okuyama, K. Yoshino, 1990-12-19 Volume III/28 is a supplement to volume III/16a+b Ferroelectrics and Related Substances. It also consists of two parts a and b. Subvolume III/28a which came out in December 1989, contains data on ferroelectric oxides, supplementing III/16a which appeared in 1981. The present subvolume III/28b covers non-oxides, supplementing III/16b (published in 1982). Reliable data on both pure compounds and solid solutions, published mostly between 1978 and 1986 and some data from the literature up to early

1988 are critically evaluated and included. The dielectric and ferroelectric behaviour, as well as all other properties relevant to the characterization of these substances are presented in tables and figures. About 22,000 references have been surveyed with the aid of a computer. All values are given in SI units. Rapid localization of the required data is facilitated by an alphabetical index of substances and a two-dimensional survey of substances and properties dealt with in both subvolumes III/28b and III/16b.

B Boron Compounds Gert Heller, Anton Meller, Thomas Onak, 2013-06-29 The 3rd supplement continues the updating of the original 20 volumes on boron compounds published between 1974 and 1979. The first supplement consisting of 3 volumes covered all the literature uniformly up to the end of 1977, whereas the two volumes of the 2nd supplement have extended the literature coverage of boron compounds to 1980 and the four volumes of the 3rd supplement to 1984. The present volume continues the description of boron compounds with halogens, presenting those with chlorine, bromine and iodine. The compounds with chalcogens are completed here along with those of boron with S, Se, Te and Po. The final chapter on carboranes contains the carboranes themselves, together with metallacarboranes, and in the last section a description of carborane-containing polymers, mostly derived from the three isomeric dicarbadodecarboranes. Volume 4 of the 3rd supplement brings this supplement series to an end. It will be supplemented by a separately appearing index volume, which contains all the boron compounds dealt with in volumes 1 - 4 of this supplement series.
