Reassessing the Roles of Women as 'Makers' of Medieval Art and Architecture (2 Vol. Set) Therese Martin,2012 The twenty-four studies in this volume propose a new approach to framing the debate around the history of medieval art and architecture to highlight the multiple roles played by women, moving beyond today's standard division of artist from patron.

Sound of the Crowd: a Discography of the '80s (Fourth Edition) Steve Binnie,2018-11-05 SOUND OF THE CROWD: A DISCOGRAPHY OF THE '80s is the ultimate record collector's guide to the 1980s. In the era of multi-formatting, picture discs, coloured vinyl, multiple remixes, funny shaped records and tiny CDs you could lose down the back of the sofa, this book lists every format of every single, EP and album released in the UK in the 1980s by over 140 of the decade's biggest acts, from ABBA to Paul Young. This fourth edition has been fully revised and expanded to include even more acts than ever before, with additional sections to cover Band Aid-style charity congregations and compilation albums from the early '80s K-Tel efforts through to the Now That's What I Call Music series and its competitors. Compiled by Steve Binnie, editor of the '80s music website Sound of the Crowd and writer, producer and co-host of the unconventional '80s chart show Off The Chart, broadcast weekly on Mad Wasp Radio.

STOP, THAT and One Hundred Other Sleep Scales Azmeh Shahid, Kate Wilkinson, Shai Marcu, Colin M Shapiro, 2012-01-06

There are at least four reasons why a sleep clinician should be familiar with rating scales that evaluate different facets of sleep. First, the use of scales facilitates a quick and accurate assessment of a complex clinical problem. In three or four minutes (the time to review ten standard scales), a clinician can come to a broad understanding of the patient in question. For example, a selection of scales might indicate that an individual is sleepy but not fatigued; lacking alertness with no insomnia; presenting with no symptoms of narcolepsy or restless legs but showing clear features of apnea; exhibiting depression and a history of significant alcohol problems. This information can be used to direct the consultation to those issues perceived as most relevant, and can even provide a springboard for explaining the benefits of certain treatment approaches or the potential corollaries of allowing the status quo to continue. Second, rating scales can provide a clinician with an enhanced vocabulary or language, improving his or her understanding of each patient. In the case of the sleep specialist, a scale can help him to distinguish fatigue from sleepiness in a patient, or elucidate the differences between sleepiness and alertness (which is not merely the inverse of the former). Sleep scales are developed by researchers and clinicians who have spent years in their field, carefully honing their preferred methods for assessing certain brain states or characteristic features of a condition. Thus, scales provide clinicians with a repertoire of questions, allowing them to draw upon the extensive experience of their colleagues when attempting to tease apart nuanced problems. Third, some scales are helpful for tracking a patient's progress. A particular patient may not remember how alert he felt on a series of different stimulant medications. Scale assessments administered periodically over the course of treatment provide an objective record of the intervention, allowing the clinician to examine and possibly reassess her approach to the patient. Finally, for individuals conducting a double-blind crossover trial or a straightforward clinical practice audit, those who are interested in research will find that their own clinics become a source of great discovery. Scales provide standardized measures that allow colleagues across cities and countries to coordinate their practices. They enable the replication of previous studies and facilitate the organization and dissemination of new research in a way that is accessible and rapid. As the emphasis placed on evidence-based care grows, a clinician's ability to assess his or her own practice and its relation to the wider medical community becomes invaluable. Scales make this kind of standardization possible, just as they enable the research efforts that help to formulate those standards. The majority of Rating Scales in Sleep and Sleep Disorders:100 Scales for Clinical Practice is devoted to briefly discussing individual scales. When possible, an example of the scale is provided so that readers may gain a sense of the instrument's content. Groundbreaking and the first of its kind to conceptualize and organize the essential scales used in sleep medicine, Rating Scales in Sleep and Sleep Disorders:100 Scales for Clinical Practice is an

invaluable resource for all clinicians and researchers interested in sleep disorders.

Literacy and Democracy in Fifth-Century Athens Anna Missiou,2011-02-17 The first full study of the relationship between literacy and democracy in fifth-century Athens. Through a close analysis of key democratic institutions, such as ostracism, the Council of 500, and the demes and tribes, Missiou argues that literacy was widespread among the common citizens of Athens.

Denial and Repression of Anti-Semitism Jovan Byford,2008-06-20 Bishop Nikolaj Velimirović (1881–1956) is arguably one the most controversial figures in contemporary Serbian national culture. Having been vilified by the former Yugoslav Communist authorities as a fascist and an antisemite, this Orthodox Christian thinker has over the past two decades come to be regarded in Serbian society as the most important religious person since medieval times and an embodiment of the authentic Serbian national spirit. Velimirović was formally canonised by the Serbian Orthodox Church in 2003. In this book, Jovan Byford charts the posthumous transformation of Velimirović from 'traitor' to 'saint' and examines the dynamics of repression and denial that were used to divert public attention from the controversies surrounding the bishop's life, the most important of which is his antisemitism. Byford offers the first detailed examination of the way in which an Eastern Orthodox Church manages controversy surrounding the presence of antisemitism within its ranks and he considers the implications of the continuing reverence of Nikolaj Velimirović for the persistence of antisemitism in Serbian Orthodox culture and in Serbian society as a whole. This book is based on a detailed examination of the changing representation of Bishop Nikolaj Velimirović in the Serbian media and in commemorative discourse devoted to him. The book also makes extensive use of exclusive interviews with a number of Serbian public figures who have been actively involved in the bishop's rehabilitation over the past two decades.

The Excavations at Ancient Halieis, Vol. 1 Marian Holland McAllister,2005-11-24 Other contributions include a study of the fortifications that are now submerged in the ancient harbor, a study of the city mint, and a report on an engineering study to establish the elevations at the site.

The Early Black-Figured Pottery of Attika in Context (c. 630-570 BCE) Alexandra Alexandridou,2010-12-17 Based on the archaeological context of the vessels, this book offers an overview of the production and distribution of early Attic black-figured pottery until the end of the first quarter of the sixth century B.C., aiming at an afresh approach to early Archaic Attika.

In War's Wake Gerard Daniel Cohen,2012-10-01 After WWII, Europe was awash in refugees. Never in modern times had so many been so destitute and displaced. No longer subjects of a single nation-state, this motley group of enemies and victims consisted of Jewish survivors of the Holocaust, ex-Soviet POWs, ex-forced laborers in the Third Reich, legions of people who fled the advancing Red Army, and many thousands uprooted by the sheer violence of the war. This book argues that postwar international relief operations went beyond their stated goal of civilian rehabilitation and contributed to the rise of a new internationalism, setting the terms on which future displaced

persons would be treated by nations and NGOs.
