Multi-sided Music Platforms and the Law Chijioke Ifeoma Okorie, 2019-10-28 *Multi-Sided Music Platforms and the Law* explores the legal and regulatory frameworks surrounding copyright protection, competition and privacy concerns arising from the way multi-sided platforms use copyright-protected content in digital advertising. This book suggests how stakeholders in Africa, and their advisors, may ingeniously reform and apply various legal and regulatory frameworks to address these issues which arise from the manner in which multi-sided platforms use copyright-protected content in digital advertising. The book critically engages with the regulatory efforts in other jurisdictions, particularly the EU, with a view to bringing an African perspective to the debate and practice. It undertakes a consideration of this issue by asking how multi-sided platforms may be deployed in a manner that continues innovative uses of copyright content while protecting the economic freedom of African copyright owners as small businesses. Providing the first pro-Africa approach to the regulation of multi-sided platforms, particularly with reference to music, this book focuses on key aspects of digital commercial activity and highlights the main challenges and opportunities for its regulation. It will be of interest to lawyers, policymakers and students across Nigeria, South Africa, and internationally among the African Union, European Union and beyond. .

**Independent Music and Digital Technology in the Philippines** Monika E. Schoop, 2017-04-21 Since the turn of the century, the impact of digital technologies on the promotion, production and distribution of music in the Philippines has both enabled and necessitated an increase in independent musical practices. In the first in-depth investigation into the independent music scene in the Philippines, Monika E. Schoop exposes and portrays the as yet unexplored restructurings of the Philippine

music industries, showing that digital technologies have played an ambivalent role in these developments. While they have given rise to new levels of piracy, they have also offered unprecedented opportunities for artists. The near collapse of the transnational recording industry in the Philippines stands in stark contrast to a thriving independent music scene in the country's national capital region, Metro Manila, which cuts across musical genres and whose members successfully adjust to a rapidly evolving industry scenario. Independent practices have been facilitated by increased access to broadband Internet, the popularity of social media platforms and home recording technology. At the same time, changing music industry structures often leave artists with no other option but to operate independently. Based on extensive fieldwork online and offline, the book explores the diverse and innovative music production, distribution, promotion and financing strategies that have become constitutive of the independent music scene in twenty-first-century Manila.
